Megatrends und ihre Implikationen für die Logistik Fontius, Jörn,2014-01-23 Megatrends können aufgrund ihrer tief greifenden und langfristig anhaltenden Veränderungen als Ausgangsbasis für globalwirtschaftliche Entwicklungen und Rahmenbedingungen gesehen werden an denen sich Unternehmen orientieren müssen Die Logistik als ganzheitlich integrierende Netzwerkfunktion nimmt eine zunehmend wichtigere Rolle ein indem sie sich zu einem entscheidenden Differenzierungsmerkmal im Wettbewerb entwickelt Um dieser Aufgabe gerecht zu werden muss sie sich den sich ständig verändernden externen Bedingungen stellen Das in dieser Arbeit betrachtete Forschungsdefizit besteht darin dass die Identifikation der Megatrends und ihrer Einflüsse auf die Logistik aufgrund einer Vielzahl existierender Entwicklungen sowie teilweise gegenläufiger Auswirkungen in einem Wirkmodell und daraus ableitbare Implikationen weder in der Literatur noch in der Praxis verfügbar ist Ziel der Arbeit ist es die für die Logistik relevanten aktuellen langfristigen Entwicklungen zu identifizieren zu systematisieren sowie deren Wirkungen auf die Logistikstrategie von Unternehmen aufzuzeigen Das Forschungsvorhaben wird durch drei primäre Forschungsfragen definiert in denen 1 nach den globalen gesamtwirtschaftlichen Megatrends 2 nach deren Wirkung auf die Logistik und 3 nach den Anpassungsmöglichkeiten der Logistik auf die Wirkungen der Megatrends gefragt wird Zur Bearbeitung des Forschungsgegenstandes wurden zunächst die konzeptionellen Grundlagen sowie das

forschungstheoretische Fundament der Arbeit gelegt Darauf aufbauend wurden auf Basis eines ausführlichen Literatur überblicks vier vorherrschende Megatrends Globalisierung Innovation Nachhaltigkeit Nachfrageverhalten identifiziert Anschließend wurde unter Einbezug ressourcenorientierter situationsorientierter sowie systemtheoretischer Ansätze sowie unter Einbezug praxisorientierter Literatur theoriegeleitet die Wirkungszusammenhänge hergeleitet So konnten elf Treiber der Megatrends identifiziert und mit den Handlungsfeldern der Logistik im Sinne einer Systematisierung in Bezug gebracht werden Die Bestätigung der identifizierten Megatrends sowie der Wirkungszusammenhänge erfolgte anhand einer qualitativen Inhaltsanalyse mit neun repräsentativen und branchen übergreifenden Experteninterviews Die Ableitung der Handlungsmöglichkeiten ist durch eine strukturierte Herleitung aus der Theorie sowie eine anschließende Bestätigung der Praxis erfolgt Ergebnis der Arbeit ist ein empirisch bestätigter Ansatz zum Aufzeigen der Wirkungszusammenhänge von Megatrends auf die Logistik Auch wenn Intensität und Wirkrichtungen der Megatrends unterschiedlich sind konnte zusammenfassend festgestellt werden dass sich die direkten Konsequenzen der Megatrends durch eine Steigerung der Komplexität charakterisieren lassen Es ließen sich drei dominante Strategien zur Begegnung dieser Herausforderungen identifizieren eine stärkere Flexibilisierung der gesamten Logistikkette eine Intensivierung der Kooperationen über Unternehmensgrenzen hinweg sowie eine stärkere Dezentralisierung der Entscheidungskompetenzen Ein erfolgreicher Umgang der Praxis mit den Wirkungen der Megatrends auf die Logistik erfordert somit eine konsequente End to end Betrachtung innerhalb der gesamten Wertschöpfungskette und umfasst damit alle direkten und indirekten Beteiligten einer Logistikkette Due to the far reaching and long lasting changes they set in motion megatrends can be seen as a starting point for global economic developments and framework conditions towards which companies have to gear their activities Logistics plays an ever more important role in this context and is fast becoming a decisive distinguishing feature in the competitive arena Ongoing change is a fundamental characteristic of logistics and calls for permanent reinvention and reorientation In view of the many current developments and their sometimes counteracting effects the task of identifying megatrends and their impacts on logistics is complex and difficult There are neither in literature nor in practice any consensus as to what constitutes a megatrend nor are the effects of megatrends clear The aim of this paper is to identify systematize and assess the current long term developments that are of relevance in this respect and to outline their effects on logistics This realisation paved the way for the following three primary research questions 1 What are the global macroeconomic megatrends 2 How can we determine the effects of these megatrends on corporate logistics 3 How can companies adapt to allow for the effects of these megatrends on their logistics To address and answer the questions the first task was to define the conceptual basis and the theoretical research foundation for the paper Building on this four prevailing megatrends globalisation innovation sustainability demand patterns were identified based on an extensive review of the literature A first theory driven effect model was then derived using resource oriented situation oriented and system theory approaches This

model included eleven megatrend drivers which were in turn linked with relevant fields of logistics activity. In order to answer the research questions the specifics of the effect model were defined based on nine expert interviews logistics decision makers in German industrial companies. During the course of the interviews it was possible to confirm the megatrends previously analysed in the literature and their eleven drivers. The effects of these megatrends on logistics were then determined. Moreover it was possible to identify 13 relevant fields of logistics activity that are affected by the megatrends. Even though the intensity and effect directions of megatrends differ it was possible to determine by way of summary that the direct impact of megatrends is to increase overall complexity. Three dominant strategies to meet this challenge were identified: greater flexibilisation of the entire supply chain, more intensive cooperation across company boundaries and greater decentralisation of decision making powers. This means that successful management of the effects of megatrends on logistics requires systematic end to end analysis of the entire value added chain and therefore involves all the direct and indirect participants in a supply chain.

Circuits and Networks Anant Sudhakar, Shyammohan S. Palli, 2006. Part of the McGraw Hill Core Concepts in Electrical Engineering Series. Circuits and Networks Analysis and Synthesis is designed as a textbook for an introductory circuits course at the intermediate undergraduate level. The book may also be appealing to a non major survey course in electrical engineering course as well. A primary goal in Circuits and Networks is to establish a firm understanding of the basic laws of electrical circuits and to provide students with a working knowledge of the commonly used methods of analysis in electrical engineering. The text assumes no mathematical knowledge making it easy for students to immediately jump into circuit analysis. In addition all of the must have s for a circuits text such as an extensive introduction to PSpice are present in this book. About the Core Concepts in Electrical Engineering Series. As advances in networking and communications bring the global academic community even closer together it is essential that textbooks recognize and respond to this shift. It is in this spirit that we will publish textbooks in the McGraw Hill Core Concepts in Electrical Engineering Series. The series will offer textbooks for the global electrical engineering curriculum that are reasonably priced, innovative, dynamic and will cover fundamental subject areas studied by Electrical and Computer Engineering students. Written with a global perspective and presenting the latest in technological advances these books will give students of all backgrounds a solid foundation in key engineering subjects.
