**Computer Aided Systems Theory - EUROCAST 2001** Roberto Moreno-Diaz, Bruno Buchberger, Jose-Luis Freire, 2003-08-14 The concept of CAST as Computer Aided Systems Theory was introduced by F. Pichler in the late 1980s to include those computer theoretical and practical developments as tools to solve problems in System Science. It was considered as the third component, the other two being CAD and CAM, necessary to build the path from Computer and Systems Sciences to practical developments in Science and Engineering. The University of Linz organized the first CAST workshop in April 1988, which demonstrated the acceptance of the concepts by the scientific and technical community. Next, the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST. Las Palmas, February 1989, under the name EUROCAST 89. This was a very successful gathering of systems theorists, computer scientists and engineers from most European countries, North America and Japan. It was agreed that EUROCAST international conferences would be organized every two years, alternating between Las Palmas de Gran Canaria and a continental European location. Thus successive EUROCAST meetings have taken place in Krems 1991, Las Palmas 1993, Innsbruck 1995, Las Palmas 1997 and Vienna 1999, in addition to an extra European CAST Conference in Ottawa in 1994.

Die Marketing-Gleichung Dirk Lippold, 2012-10-18 Der Stellenwert des klassischen Marketings für den Unternehmenserfolg ist in den letzten Jahren spürbar zurückgegangen. Viele Marketingabteilungen haben sich zu Inseln entwickelt, die unabhängig von anderen Unternehmensbereichen und unabgestimmt Maßnahmen vorantreiben, die nur selten in die Aktivitäten an der Kundenfront integriert sind. Die in diesem Buch vorgestellte Marketing-Gleichung als praxisorientierter Ansatz für ein wertorientiertes Management orientiert sich an folgenden Eckpunkten: Strikte Orientierung an den Wünschen und Bedürfnissen des Kunden und nicht an der eigenen Produkt- und Technikausrichtung; Selbstverständnis des Marketingmanagements als strategischer Business Partner; Betrachtung der Aktivitäten des Marketingmanagements als Wertschöpfungskette, deren Werttreiber zu identifizieren sind; Internationale Ausrichtung des Marketingmanagements; Nutzung der neuen Technologien der veränderten Medienlandschaft und der enormen Potenziale, die das Internet dem Unternehmen und seinen Kunden bietet. Stärkere Differenzierung zwischen dem B2C und dem B2B Marketing

Deshalb ist eine weite Markt- sowie Bedürfnisperspektive erforderlich, in der der Kunde im Mittelpunkt als Brennpunkt verstanden wird, der die vielfältigen Einflussfaktoren durch sein von Bedürfnissen und Einstellungen geprägtes Verhalten

**Green Logistics** Alan McKinnon, Michael Browne, Anthony Whiteing, Maja Piecyk, 2015-02-03 Leading the way in current thinking on environmental logistics Green Logistics provides a unique insight on the environmental impacts of logistics and the actions that companies and governments can take to deal with them. It is written by leading researchers in the field and provides a comprehensive view of the subject for students, managers and policy makers. Fully updated, the 3rd edition of Green Logistics has a more global perspective than previous editions. It introduces new contributors and international case studies that illustrate the impact of green logistics in practice. There is a new chapter on the links between green logistics and corporate social responsibility and a series of postscripts examining the effects of new developments such as 3D printing, distribution by drone, the physical internet and the concept of peak freight. Other key topics examined include carbon auditing of supply chains, transferring freight to greener transport modes, reducing the environmental impact of warehousing, improving the energy efficiency of freight transport, making city logistics more environmentally sustainable, reverse logistics for the management of waste, role of government in promoting sustainable logistics. The 3rd edition of Green Logistics includes indispensable online supporting materials including graphics, tables, chapter summaries and guidelines for lecturers.

**Chassis Handbook** Bernhard Heißing, Metin Ersoy, 2010-11-09 In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition.

**Sustainable Urban Design** Adam Ritchie, Randall Thomas, 2013-12-16 By the end of the twenty-first century, it is thought that three quarters of the world's population will be urban; our future is in cities. Making these cities healthy, vibrant and sustainable is an exceptional challenge which this book addresses. It sets out some of the basic principles of the design of our future cities and, through a series of carefully selected case studies from leading designers, experience illustrates how these ideas can be put into practice. Building on the first edition's original format of design guidance and case studies, this new edition updates the ideas and techniques resulting from further research and practice by the contributors. This book emphasises the enormous progress made towards exciting new designs that integrate good design with resource efficiency.
