Literary History Anders Pettersson, Gunilla Lindberg-Wada, Margareta Petersson, Stefan Helgesson, 2006 Literary History Towards a Global Perspective is a research project funded by the Swedish Research Council Vetenskapsr det Initiated in 1996 and launched in 1999 it aims at finding suitable methods and approaches for studying and analysing literature globally emphasizing the

comparative and intercultural aspect Even though we nowadays have fast and easy access to any kind of information on literature and literary history we encounter more than ever the difficulty of finding a credible overall perspective on world literary history Until today literary cultures and traditions have usually been studied separately each field using its own principles and methods Even the conceptual basis itself varies from section to section and the genre concepts employed are not mutually compatible As a consequence it is very difficult if not impossible for the interested layperson as well as for the professional student to gain a clear and fair perspective both on the literary traditions of other peoples and on one's own traditions The project can be considered as a contribution to gradually removing this problem and helping to gain a better understanding of literature and literary history by means of a concerted empirical research and deeper conceptual reflection The contributions to the four volumes are written in English by specialists from a large number of disciplines primarily from the fields of comparative literature Oriental studies and African studies in Sweden All of the literary texts discussed in the articles are in the original language Each one of the four volumes is devoted to a special research topic

Thinking with Classical Matter Miriam Leonard, Tim Whitmarsh, 2025-02-27 What is classical culture for Thinking with Classical Matter brings together leading experts from across the humanities and as a whole celebrates the career of Simon Goldhill in order to consider the place of the Ancient Greco Roman world in the formation and formulation of different orders of knowledge Since at least the eighteenth century the study of Greece and Rome has played a pivotal role in both the institutional and intellectual partition of disciplines from philology to theology aesthetics to anthropology Such regimes of knowing however are also materially embedded The knowing subject is at the same time a gendered body and the objects of knowledge are also their subject Thinking with Classical Matter explores these questions from a wide range of theoretically informed perspectives and shows how the ancient world continues to prompt some of the most pressing questions in the humanities today The Well-Trained Mind Susan Wise Bauer, Jessie Wise, 2016-08-09 Is your child getting lost in the system becoming bored losing his or her natural eagerness to learn If so it may be time to take charge of your child's education by doing it yourself The Well Trained Mind will instruct you step by step on how to give your child an academically rigorous comprehensive education from preschool through high school one that will train him or her to read to think to understand to be well rounded and curious about learning Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium which organizes learning around the maturing capacity of the child's mind and comprises three stages the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules the middle school logic stage in which the student begins to think more analytically and the high school rhetoric stage where the student learns to write and speak with force and originality Using

this theory as your model you ll be able to instruct your child whether full time or as a supplement to classroom education in all levels of reading writing history geography mathematics science foreign languages rhetoric logic art and music regardless of your own aptitude in those subjects Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well Trained Mind* to create a truly superior education for the children in their care This extensively revised fourth edition contains completely updated curricula and book lists links to an entirely new set of online resources new material on teaching children with learning challenges cutting edge math and sciences recommendations answers to common questions about home education and advice on practical matters such as standardized testing working with your local school board designing a high school program preparing transcripts and applying to colleges You do have control over what and how your child learns *The Well Trained Mind* will give you the tools you ll need to teach your child with confidence and success

East-West Symbioses Eugene Eoyang,2019-03-15 This book explores the encounters between East and West studying how they get along These exchanges involve deliberate exoticizations and incommensurabilities as well as creative fusions such as Matteo Ricci a Jesuit monk in the late 16th early 17th centuries who learned Chinese in Beijing well enough to compose works in Chinese and Octavio Paz the Mexican Nobel Laureate who admired Chinese civilization The book also considers the effect of the West on Asian countries the cases of Japan and Turkey who tried to modernize by becoming more Western and the examples of China and Korea who adopted Western forms of theatre to advance a distinctly Asian aesthetic It will appeal to anyone seeking more than a superficial understanding of the encounters between East and West

Development of the Idea of History in Antiquity Gerald A. Press,2003-09-10 An extensive scholarly literature written in the past century holds that in ancient Greek and Roman thought history is understood as circular and repetitive a consequence of their anti temporal metaphysics in contrast with Judaeo Christian thought which sees history as linear and unique a consequence of their messianic and hence radically temporal theology Gerald Press presents a more

general view that the Graeco Roman and Judaeo Christian cultures were fundamentally alien and opposed cultural forces and that therefore Christianity's victory over paganism included the replacement or supersession of one intellectual world by another and then shows that contrary to this view there was substantial continuity between pagan and Christian ideas of history in antiquity rather than a striking opposition between cyclic and linear patterns He finds that the foundation of the Christian view of history as goal directed lies in the rhetorical rather than the theological motives of early Christian writers

The Classical Tradition Michael Silk, Ingo Gildenhard, Rosemary Barrow, 2017-11-06 Reorganizes the field and challenges our preconceptions in both familiar areas and in disciplines that are not usually treated in studies on the classical tradition A must read Craig Kallendorf Texas A the role of translation the intricate relationship of pagan and Christian the ideological implications of the classical tradition the interplay between the classical tradition and the histories of scholarship and education the relation between high and low culture and the myriad complex relationships comparative contrastive and interactive between art literature and thought themselves Authoritative and accessible The Classical Tradition Art Literature Thought offers new insights into the powerful legacy of the ancient world from the Middle Ages and the Renaissance to the present day

Philosophy and Freedom David Peddle, Neil G. Robertson, 2003-01-01 Commentaries on his intricate works by twelve former colleagues and students explore various aspects of Doull's history and place it within the context of contemporary scholarship allowing the reader to judge the depth and rigour of Doull's writing
