corpse photographs of Joel Peter Witkin However these representations of objects perpetually fall short of our aspirations Schwenger examines what is left over debris and waste and asks what art can make of these What emerges is not an art that reassembles but one that questions what it means to assemble in the first place Contained in this catalog of waste is that ultimate still life the cadaver where the subject object dichotomy receives its final ironic reconciliation Peter Schwenger is professor of English at Mount St Vincent University in Halifax Nova Scotia He is the author of *Fantasm and Fiction On Textual Envisioning Letter Bomb Nuclear Holocaust and the Exploding Word* and *Phallic Critiques Masculinity and Twentieth Century Literature*

Symbolism Florian Klaeger, Klaus Stierstorfer, Marlena Tronicke, 2022-10-03 Special Focus Omission edited by Patrick Gill Throughout literary history and in many cultures we encounter an astute use of conspicuous absences to conjure an imagined reality into a recipient's mind The term omission as used in the present study then demarcates a common artistic phenomenon a silence blank or absence introduced against the recipient's generic or experiential expectations but which nonetheless frequently encapsulates the tenor of the work as a whole Such omissions can be employed for their affective potential when emotions represented or evoked by the text are deemed to be beyond words They can be employed to raise epistemological questions as when an omission marks the limits of what can be known Ethical questions can also be approached by means of omissions as when a character's voice is omitted for instance Finally omission always carries within it the potential to reflect on the media and genres on which it is brought to bear as its efficacy depends on the recipient's generic expectations omission is frequently characterized by a high degree of meta discursiveness This volume investigates the various strategies with which

the phenomenon of omission is employed across a range of textual forms and in different cultures to conclusively argue for its status as a highly effective and near universal form of artistic signification

The Greatest Invention Silvia Ferrara, 2022-03-17 Ferrara's book is an introduction to writing as a process of revelation but it's also a celebration of these things still undeciphered and many other tantalising mysteries besides The Spectator This book tells the story of our greatest invention Or it almost does Almost because while the story has a beginning in fact it has many beginnings not only in Mesopotamia 3 100 years before the birth of Christ but also in China Egypt and Central America and it certainly has a middle one that snakes through the painted petroglyphs of Easter Island through the great machines of empires and across the desks of inspired brilliant scholars the end of the story remains to be written The invention of writing allowed humans to create a record of their lives and to persist past the limits of their lifetimes In the shadows and swirls of ancient inscriptions we can decipher the stories they sought to record but we can also tease out the timeless truths of human nature of our ceaseless drive to connect create and be remembered The Greatest Invention chronicles an uncharted journey one filled with past flashes of brilliance present day scientific research and the faint fleeting echo of writing's future Professor Silvia Ferrara a modern day adventurer who travels the world studying ancient texts takes us along with her we touch the knotted coloured strings of the Incan khipu and consider the case of the Phaistos disk Ferrara takes us to the cutting edge of decipherment where high powered laser scanners bring tears to an engineer's eye and further still to gaze at the outline of writing's future The Greatest Invention lifts the words off every page and changes the contours of the world around us just keep reading The Greatest Invention is a celebration not of achievements but of moments of illumination and the most important thing in the world our desire to be understood TLS **Initiating Learning** Bosse

Bergstedt, Anna Herbert, Anja Kraus, 2012 Learning processes are never at hand or evident How we learn something is for the most part not visible for us and for others Primarily learning is carried out by implicit and unspoken attitudes and mindsets as it is stimulated by more or less ungraspable former experiences Furthermore it is influenced by opaque actual happenings such as subtexts of a spoken text by forms of bodily communication and interaction and by the material conditions of learning processes and their limitations Thus learning cannot be reduced to its visible side such as its tasks to the conscious motives and to forms of controlling it When looking at learning only as an explicit process its taciturnity and by this the real challenges of educating teaching and learning get out of sight Therefore the endeavor to initiate learning cannot but deal with its explicit as well with its tacit aspects
