**Critical Thinking in Psychology** Robert J. Sternberg, Diane F. Halpern, 2020-01-16 Good scientific research depends on critical thinking at least as much as factual knowledge; psychology is no exception to this rule. And yet, despite the importance of critical thinking, psychology students are rarely taught how to think critically about the theories, methods, and concepts they must use. This book shows students and researchers how to think critically about key topics such as experimental research, statistical inference, case studies, logical fallacies, and ethical judgments. Using updated research findings and new insights, this volume provides a comprehensive overview of what critical thinking is and how to teach it in psychology. Written by leading experts in critical thinking in psychology, each chapter contains useful pedagogical features such as critical thinking questions, brief summaries, and definitions of key terms. It also supplies descriptions of each chapter author's critical thinking experience, which evidences how critical thinking has made a difference to facilitating career development.

A New Synthesis for Solving the Problem of Psychology Gregg Henriques, 2022-12-10 In this incisive analysis of academic psychology, Gregg Henriques examines the fragmented nature of the discipline and explains why the field has had enormous difficulty specifying its subject matter and how this has limited its ability to advance our knowledge of the human condition. He traces the origins of the problem of psychology to a deep and profound gap in our knowledge systems that emerged in the context of the scientific Enlightenment. To address this problem, this book introduces a new vision for scientific psychology called mental behaviorism. The approach is anchored to a comprehensive metapsychological framework that integrates insights from physics and cosmic evolution, neuroscience, the cognitive and behavioral sciences, developmental and complex adaptive systems theory, attachment theory, phenomenology, and social constructionist

perspectives and is well grounded in the philosophy of science Building on more than twenty years of work in theoretical psychology and drawing on a wide range of literature Professor Henriques shows how this new approach to scientific knowledge fills in the gaps of our current understanding of psychology and can allow us to develop a more holistic and sophisticated way to understand animal and human mental behavioral patterns This work will especially appeal to students and scholars of general psychology and theoretical psychology as well as to historians and philosophers of science

Re-envisioning Theoretical Psychology Thomas Teo, 2019-05-29 This volume presents a re-envisioning of the field of theoretical psychology and offers unique visions for its present and future from leaders of North American philosophical psychology It contends that theoretical psychology has reached middle age and must consider new directions to renew its growth Rooted in a range of research traditions and the intellectual biographies of its authors it paves the way toward this necessary revitalization of the content activities responsibilities and hopes of theoretical psychology The authors situate their analyses in the context of the increasing gap between alternative and mainstream and between the discipline and the

profession of psychology They demonstrate that changes in society culture and technology the internationalization of the psychological humanities and the cross fertilization of intellectual innovations from other disciplines now afford possibilities for new orientations in theoretical psychology The volume aims to do justice to psychological topics human beings and the intellectual problems that psychologists encounter while also providing space for meta theoretical engagement often neglected in the discipline Together the chapters in this collection make the case that a renewal of the discipline and practice of psychology is a task that is best accomplished collectively and despite significant disagreements in solidarity **The**
