Treatment and Prognostic Assessment of Liver

Cirrhosis and Its Complications, Volume II Xingshun Qi,Andrea Mancuso,Thierry Thévenot,Yufu Tang, Hao

Wu,2025-05-14 Given the success of Research Topic Treatment and Prognostic Assessment of Liver Cirrhosis and Its

Complications and the rapidly evolving subject area we are pleased to announce the launch of Volume II About 2 million deaths worldwide annually are attributable to liver diseases Among them half die from cirrhosis and the other half from viral hepatitis and hepatocellular carcinoma When patients with liver cirrhosis develop to the decompensated stage a variety of complications will occur such as ascites spontaneous bacterial peritonitis variceal bleeding hepatic encephalopathy hepatorenal syndrome and jaundice which will seriously affect the patient s quality of life with reduced survival time and increased socioeconomic burden Therefore early assessment and clinical management of cirrhosis and its complications are crucial for both clinicians and patients

Microbiology and pathogenesis of Chlamydia, Coxiella, and Rickettsia Rey

Carabeo,Stacey Gilk,Scot P. Ouellette,Matteo Bonazzi,2024-07-08 Obligate intracellular parasitism is the associated with

genome reduction which is the process of reconfiguring the genome through systematic elimination of genetic loci deemed unnecessary The end result is an increasing dependence on the host for various factors essential for growth such as nutrients and a protective intracellular replicative niche The extreme genome reduction that some of the obligate intracellular bacteria have undergone while maintaining viability and virulence has revealed the level of adaptability including a plethora of survival strategies that more often than not functionally converge to modulate similar host cell processes such as cytoskeletal dynamics vesicular transport and pathogen recognition among others With the advent of molecular genetic approaches and in the case of Coxiella growth in axenic media the field of obligate intracellular pathogen research has progressed rapidly in the past five years redefining obligate intracellular parasitism as the field transitions from descriptive to mechanism based research An emerging theme is the adaptability and ingenuity of this class of pathogens Genome reduction prioritizes survival but because this occurs within a host there is also the need to maintain virulence As such survival strategies become intertwined and likely inseparable from virulence strategies The purpose of this Special Topics Issue is to bring together in one volume review articles from experts in the field This issue will have a broad scope Articles will describe the current state

of knowledge in genetics and genomics metabolism cell biology of infection immune evasion and vaccine design Importantly cutting edge information will also be discussed in the context of past seminal findings and future directions of research Overall this Special Topics Issue should serve as a valuable reference to colleagues and those new to the field of obligate intracellular pathogens research We welcome submission of review and mini review articles on the following topics Genome structure Development of genetic tools Molecular mechanisms of adhesion invasion and other early events in infection Establishment of the intracellular niche Niche interactions with organelles Translocation of effectors Metabolism and metabolic adaptations Gene regulation during stress response Pathogen recognition and immune evasion strategies Innate and adaptive immunity during infection Experimental models *Encyclopedia of Immunobiology* ,2016-04-27 Encyclopedia of Immunobiology Five Volume Set provides the largest integrated source of immunological knowledge currently available It consists of broad ranging validated summaries on all of the major topics in the field as written by a team of leading experts The large number of topics covered is relevant to a wide range of scientists working on experimental and clinical immunology microbiology biochemistry genetics veterinary science physiology and hematology The book is built in thematic sections that allow readers to rapidly navigate around related content Specific sections focus on basic applied and clinical immunology The structure of each section helps readers from a range of backgrounds gain important understanding of the subject Contains tables pictures and multimedia features that enhance the learning process In depth coverage allows readers from a range of backgrounds to benefit from the material Provides handy cross referencing between articles to improve readability including easy access from portable devices [Commerce Business Daily](#) ,1998-05 *Comprehensive Dissertation Index* ,1989
