WORKING CAPITAL MANAGEMENT, Fourth Edition BHATTACHARYA, HRISHIKES, 2021-04-01 Working capital is commonly understood as the fund needed to meet the day to day expenses of an enterprise A finance manager finds that the funds for meeting these expenses get blocked in current assets He therefore looks for liquidity support in net working capital NWC which is equivalent to the excess of current assets over current liabilities A banker also looks at the size of NWC as the long term stake of the business in funding the current assets But for a production manager liquidity is synonymous to uninterrupted supply of material inputs to the production lines Similarly for a marketing manager if there is no production his marketing outlets dry up despite demand in the market While the finance manager discourages overstocking of inventory the production manager and the marketing manager dread of being out of stock In this conflict the goal of the organisation often takes a back seat This book aims at resolving these conflicts by
