the volume Reichhold notes that Basho was a genius with words He obsessively sought out the right word for each phrase of the succinct seventeen syllable haiku seeking the very essence of experience and expression With equal dedication Reichhold sought the ideal translations As a result Basho The Complete Haiku is likely to become the essential work on this brilliant poet and will stand as the most authoritative book on the subject for many years to come Original sumi e ink drawings by artist Shiro Tsujimura complement the haiku throughout the book

The Fractal Self John L. Culliney, David Jones, 2017-07-31 Our universe science reveals began in utter simplicity then evolved into burgeoning complexity Starting with subatomic particles dissimilar entities formed associations binding bonding growing branching catalyzing cooperating as self joined other following universal laws with names such as gravity chemical attraction and natural selection Ultimately life arose in a world of dynamic organic chemistry and complexity exploded with wondrous new potential Fast forward to human evolution and a tension that had existed for billions of years now played out in an unprecedented arena of conscious calculation and cultural diversity Cooperation

interleaving with competition intimacy oscillating with integrity we dwell in a world where yin meets yang in human affairs on many levels In *The Fractal Self* John Culliney and David Jones uncover surprising intersections between science and philosophy Connecting evidence from evolutionary science with early insights of Daoist and Buddhist thinkers among others they maintain that sagely behavior envisioned in these ancient traditions represents a pinnacle of human achievement emerging out of our evolutionary heritage They identify an archetype the fractal self a person in any walk of life who cultivates a cooperative spirit A fractal self is a sage in training who joins others in common cause leads from within and achieves personal satisfaction in coordinating smooth performance of the group team or institution in which he or she is embedded Fractal selves commonly operate with dedication and compassionate practice in the service of human society or in conserving our planet But the competitive side of human nature is susceptible to greed and aggression Self aggrandizement dictatorial power and ego driven enforcement of will are the goals of those following a self serving path individuals the authors identify as antisages Terrorist leaders are an especially murderous breed but aggrandizers can be found throughout business religion educational institutions and governments Humanity has reached an existential tipping point will the horizon already in view expand with cooperative progress toward godlike emergent opportunities or contract in the thrall of corrupt oligarchs and tribal animosities We have brought ourselves to a chaotic edge between immense promise and existential danger and are even now making our greatest choice

Poetry, Publishing, and Visual Culture from Late Modernism to the Twenty-first Century Natalie Pollard, 2020-05-27 This is a book about contemporary literary and artistic entanglements word and image media and materiality inscription and illustration It proposes a vulnerable fugitive mode of reading poetry which defies disciplinary categorisations embracing the open endedness and provisionality of forms This manifests itself interactively in the six case studies which have been chosen for their distinctness and diversity across the long twentieth century the book begins with the early twentieth century work of writer and artist Djuna Barnes exploring her re animation of sculptural and dramatic sources It then turns to the late modernist artist and poet David Jones considering his use of the graphic and plastic arts in *The Anathemata* and next to the underappreciated mid century poet F T Prince whose work uncannily re activates Michelangelo's poetry and sculpture The second half of the book explores the collaborations of the canonical poet Ted Hughes with the publisher and artist Leonard Baskin during the 1970s the innovative late twentieth century poetry of Denise Riley who uses page space and embodied sound as a form of address and finally the contemporary poet Paul Muldoon who has collaborated with photographers and artists as well as ventriloquising nonhuman phenomena The resulting unique study offers contemporary writers and readers a new understanding of literary artistic and nonhuman practices and shows the cultural importance of engaging with their messy co dependencies The book challenges critical methodologies that make a sharp division between the textual work and the extra literary and raises urgent questions about the status and autonomy of art and its social role

Essays on Unfamiliar Travel-Writing John

Anthony Butler, 2017-01-06 This book comprises a number of essays on travel narratives which are somewhat unknown to the general reader. They include writing by people who travelled from the East to the West as well as those going the usual way. The travellers include a seventeenth century accountant, a Persian shah, an Indian rajah and a Hawaiian king as well as an Irish doctor, an American journalist and a Japanese poet. The book presents these travellers in an informal manner although there are discussions about identity, otherness and stereotyping as they are displayed in the narratives. The book will appeal to students and academics as well as the general reader. *Itadakimasu! The Food Culture of Japan* Becky A.

Brown, 2020-12-17 *Itadakimasu* The Food Culture of Japan is designed as a first or second year college course in Japanese culture for students who have little to no background in the Japanese language, culture, literature or history. Unlike any other culture text, *Itadakimasu* offers a unique approach to learning about culture through a country's cuisine. This account takes students on an exciting journey into the world of Japanese food culture, both past and present, exploring themes such as regional specialties, annual festivals, traditional foodways, prominent tea masters, culinary expressions, restaurant menus, dining etiquette, mealtime customs and culinary aesthetics. *Itadakimasu* also addresses current events in the food industry and agribusiness, health and nutrition, dieting trends, fast food and international and Western influences. Enhancing this wealth of cultural material are autobiographical essays written by guest contributors and varied literary excerpts featuring food themes across different genres in literature spanning many centuries. Each of the readings is supplemented by general comprehension questions followed by more probing queries calling on critical and analytical thinking to methodically guide students from a cursory understanding of a new culture to reflections on their own experiences and other world cultures. Resources also highlight food-centric films so that students can witness what they are learning about in an authentic cultural context. Furthermore, teachers and students alike can enjoy food tasting labs in the classroom, fostering yet another authentic experience for the students. With the intention of reaching a broad audience of students majoring or minoring in Japanese or Asian Studies or students learning English as a Foreign Language or English for Specific Purposes, *Itadakimasu* could also be useful for composition and conversation courses and the Writing Across the Curriculum series or as a supplement for Four Skills Japanese language courses and introductory Japanese literature offerings. Above all, its multifaceted design with a broad spectrum of self-contained sections welcomes individual teaching styles and preferences. *Itadakimasu* paints an appetizing image of Japan's society with just a dash of culture, a pinch of language and a taste of literature to tempt the palate of students new to the study of Japan. Meant to enhance the regular curriculum, this innovative approach to learning about Japan suggests that the culinary world can lend an insightful view into a country's culture. Historical and contemporary foodways are universal elements common to all cultures, making the subject matter inherently relatable.
