International Handbook of Jewish Education Helena Miller, Lisa D. Grant, Alex Pomson, 2011-04-02. The International Handbook of Jewish Education, a two-volume publication, brings together scholars and practitioners engaged in the field of Jewish Education and its cognate fields worldwide. Their submissions make a significant contribution to our knowledge of the field of Jewish Education as we start the second decade of the 21st century. The Handbook is divided broadly into four main sections: Vision and Practice, focusing on issues of philosophy, identity, and planning; the big issues of Jewish Education; Teaching and Learning, focusing on areas of curriculum and engagement; Applications, focusing on the ways that Jewish Education is transmitted in particular contexts, both formal and informal, for children and adults; and Geographical, focusing on historical, demographic, social, and other issues that are specific to a region or where an issue or range of issues can be compared and contrasted between two or more locations. This comprehensive collection of articles, providing high-quality content, constitutes a definitive statement on the state of Jewish Education worldwide, as well as through a wide variety of lenses and contexts. It is written in a style that is accessible to a global community of academics and professionals.

Handbook of Research on Integrating ICTs in STEAM Education Xefteris, Stefanos, 2022-05-27. Modern society gives great importance to scientific and technological literacy, development of 21st-century skills, and creating individuals who are not passive users of ICT tools but active thinkers and even tinkerers. The learning process is thus constantly evolving to facilitate the acquisition of such skills, such as setting goals and making evidence-based decisions, thinking critically, and solving problems while efficiently managing time, as well as using technology cooperatively, ethically, and communicating effectively. STEAM is the approach to learning that uses concepts from natural sciences, technology, engineering, arts, and mathematics to foster critical thinking, computational, and design thinking, as well as working effectively together, mimicking the process followed by scientists. The end goal is engaged and motivated students who participate in experiential and inquiry-based learning in fun, immersive environments that facilitate learning through a
