The first three chapters bring the theoretical notions that make it possible to cast inverse problems within a mathematical framework The next three chapters address the fundamental inverse problem of deconvolution in a comprehensive manner Chapters 7 and 8 deal with advanced statistical questions linked to image estimation In the last five chapters the main tools introduced in the previous chapters are put into a practical context in important applicative areas such as astronomy or medical imaging The Leading Edge ,2009 **Bayesian Deconvolution of Seismic Array Data** Eric Albert Suess,1998 **Seismic Methods and Applications** Andreas Stark, 2008 This book has been written for those who need a solid understanding of the seismic exploration method without difficult mathematics It is presented in a format that allows one to naturally progress from the underlying physical principles to the actual seismic method The mathematics needed for the subject is kept as simple as possible students only need high school physics and mathematics to thoroughly grasp the principles covered Dr Stark has developed this text and honed its content with feedback from hundreds of students over nearly two decades of teaching seismic exploration geophysics This textbook will teach students the principles for the detection of geologic structures earthquake zones and hazards resource exploration and geotechnical engineering **Journal** Canadian Society of Exploration Geophysicists, 1990 Integrated Imaging of the Earth Max Moorkamp, Peter G. Goswami, Andrew K. Chan, 2011-03-08 Most existing books on wavelets are either too mathematical or they focus on too narrow a specialty This book provides a thorough treatment of the subject from an engineering point of view It is a one stop source of theory algorithms applications and computer codes related to wavelets This second edition has been updated by the addition of a section on Other Wavelets that describes curvelets ridgelets lifting wavelets etc a section on lifting algorithms Sections on Edge Detection and Geophysical Applications Section on Multiresolution Time Domain Method MRTD and on Inverse problems
