*Blindheit und Hellsichtigkeit* Cornelia Klinger, 2014-10-02 Mit Beginn des Jahres 2014 erscheinen die Bände der renommierten Wiener Reihe ausschließlich im Verlag Walter de Gruyter. Das neue Layout der Bände wird modernisiert inhaltlich und personell. Jedoch wird das Profil der seit mehr als zwei Jahrzehnten erscheinenden Buchreihe von Kontinuität geprägt sein. In den Beiträgen des vorliegenden Bandes wird gefragt nach dem Ort der Kunst in der Gesellschaft der Gegenwart. Auf der Suche nach Antworten richtet sich der Blick ins 20. Jh zurück. Eine sich zu einem autonomen gesellschaftlichen Teilbereich ausdifferenzierende ästhetische Sphäre konnte sich einerseits zu einem selbstreferentiellen nur eigenen Gesetzen verpflichteten System entwickeln, andererseits konnte sie ihre unter dem Vorzeichen von Autonomie gewonnene Distanz von der Gesellschaft zur Kritik an den bestehenden Verhältnissen zum Engagement für eine andere Ordnung einsetzen. Die divergierenden Wege von Modernismus und Avantgarde sind im Verlauf des 20. Jh von Politik und Ökonomie durchkreuzt worden. Während die Avantgarden des frühen 20. Jh durch Verstrickung in totale Politik in Misskredit geraten sind, ist nach der Jahrhundertmitte die abstrakte, hermetische, sperrige Formensprache des Modernismus zum herrschenden Jargon des Marktes geworden. Gegenwärtig findet nicht zuletzt unter dem Eindruck neuer kommunikationstechnologischer Revolutionen eine umfassende Ästhetisierung statt, gleichzeitig erlebt gesellschaftskritische engagierte Kunst einen Boom. Den Fragen, was Kunst jenseits der Illusion ihrer Autonomie von der Gesellschaft in Zukunft sein, welche Stellung sie in der Gesellschaft einnehmen und wie sie diese verändern kann, ist dieses Buch gewidmet.

*Visioning Technologies* Graham Cairns, 2016-12-08 *Visioning Technologies* brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight understood to include orthographic projection, perspective drawing, telescopic devices, photography, film and computer visualization amongst others. Each chapter deals with its own area and historical period of expertise organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today. This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today. Paradoxically, it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world.

*Hypersexual City* Nicole Kalms, 2017-03-31 Much of feminist architectural scholarship focuses on the enormous task of instating women's experience of space into spatial praxis. *Hypersexual City: The Provocation of Soft Core Urbanism* suggests this attention to women's invisibility in sociocultural space has overlooked the complex ways in which women already occupy space, albeit mostly as an image or object to be consumed even purchased. It examines the occupation of urban space through the mediated representation of women's hypersexualized bodies. A complex transaction

Participatory Culture and the Social Value of an Architectural Icon: Sydney Opera House Cristina Garduno Freeman, 2017-09-22 This book develops new and innovative methods for understanding the cultural significance of places such as the World Heritage listed Sydney Opera House By connecting participatory media visual culture and social value Cristina Garduno Freeman contributes to a fast growing body of scholarship on digital heritage and the popular reception of architecture In this her first book she opens up a fresh perspective on heritage as well as the ways in which people relate to architecture via participation on social media Social media sites such as YouTube Pinterest Wikipedia Facebook and Flickr as well as others become places for people to express their connections with places for example the Sydney Opera House Garduno Freeman analyses real world examples from souvenirs to opera house shaped cakes and untangles the tangible and intangible ways in which the significance of heritage is created disseminated and maintained As people s encounters with World Heritage become increasingly mediated by the digital sphere there is a growing imperative for academics professionals and policy makers to understand the social value of significant places This book is beneficial to academics students and professionals of architecture

**On the Screen** Ariel Rogers, 2019-07-30 Today in a world of smartphones tablets and computers screens are a pervasive part of daily life Yet a multiplicity of screens has been integral to the media landscape since cinema s golden age In On the Screen Ariel Rogers rethinks the history of moving images by exploring how experiments with screen technologies in and around the 1930s changed the way films were produced exhibited and experienced Marshalling extensive archival research Rogers reveals the role screens played at the height of the era of classical Hollywood cinema She shows how filmmakers technicians architects and exhibitors employed a variety of screens within diverse spaces including studio soundstages theaters homes stores and train stations Far from inert screens served as means of structuring mediated space and time contributing to the transformations of modern culture On the Screen demonstrates how particular approaches to the use of screens traversed production and exhibition theatrical and

extratheatrical practice mainstream and avant garde modes and even cinema and television Rogers's history challenges conventional narratives about the novelty of the twenty first century multiscreen environment showing how attention to the variety of historical screen practices opens up new ways to understand contemporary media

**The Museum Age in Austria-Hungary** Matthew Rampley, Markian Prokopovych, Nóra Veszprémi, 2021-02-15 This important critical study of the history of public art museums in Austria Hungary explores their place in the wider history of European museums and collecting their role as public institutions and their involvement in the complex cultural politics of the Habsburg Empire Focusing on institutions in Vienna Cracow Prague Zagreb and Budapest The Museum Age in Austria Hungary traces the evolution of museum culture over the long nineteenth century from the 1784 installation of imperial art collections in the Belvedere Palace as a gallery open to the public to the dissolution of Austria Hungary after the First World War Drawing on source materials from across the empire the authors reveal how the rise of museums and display was connected to growing tensions between the efforts of Viennese authorities to promote a cosmopolitan and multinational social political and cultural identity on the one hand and on the other the rights of national groups and cultures to self expression They demonstrate the ways in which museum collecting policies practices of display and architecture engaged with these political agendas and how museums reflected and enabled shifting forms of civic identity emerging forms of professional practice the production of knowledge and the changing composition of the public sphere Original in its approach and sweeping in scope this fascinating study of the museum age of Austria Hungary will be welcomed by students and scholars interested in the cultural and art history of Central Europe

**Machine à Amuser** Wim Van Den Bergh, 2024-04-09 A richly illustrated history of a single building the celebrated and yet enigmatic penthouse of the wealthy playboy Charles de Beistegui designed by Le Corbusier and Pierre Jeanneret in late 1920s Paris What does it take to build not only a house but a machine for amusement In Machine Amuser

Wim van den Bergh chronicles the genesis of the famous penthouse of French born Mexican millionaire bachelor Charles de Beistegui. The penthouse was planned and constructed by Le Corbusier Pierre Jeanneret and built on a rooftop site on the Champs lys es between 1929-1932. Retracing the evolution of this icon of modern architecture from the initial competition between Gabriel Guevrekian and Andr Lurc at and Le Corbusier Pierre Jeanneret up to the executed version, van den Bergh tells the story of a client's ambition to build a house devoted to entertaining on one of the most well-heeled streets of Paris. Machine Amuser also examines the cultural milieu of artists and patrons that surrounded Beistegui and which ultimately determined the apartment's conception and use, including its rococo and surrealist inspired interior decor. Drawing on a panoply of archival material, van den Bergh narrates the tensions that arose between client and architects as each vied for creative control of the project. As the book shows, while Le Corbusier with his cousin Pierre Jeanneret remained the official architects of the penthouse, its famed interior was ultimately designed by the client, Charles de Beistegui. An account of a single building beloved by architects and architectural historians, Machine Amuser tells a story that has never been told before. Van den Bergh redresses this lacuna in rich detail, revealing the history of the Beistegui penthouse, the evolution of the project, and its eventual erasure from the roofscapes of Paris. *Borrowed Sceneries* Rahel Hartmann Schweizer, 2024-04-22

The garden as inspiration. The garden embodies a condensed version of nature just as in Japanese philosophy, the entire world is thought to be reflected in a single dewdrop. This notion may be the inspiration for the Swiss imitation of Japanese gardens in the 20th century, the impetus for the incorporation of Japanese design elements more generally, and the conversion principle from alpine landscapes to Japanese stone gardens. Taking ten Swiss landscape architecture studios as examples, the author illustrates how they drew inspiration from miniaturized gardens: bonsai, borrowed scenery, shakkei succumbed to the allure of the imperfect wabi-sabi and captured the spirit of Zen Buddhism. This book reveals parallels to the assimilation of Chinese influences in Japan and situates the phenomenon within the general reception of Japan in the West. Attractive and previously unpublished visual materials. Well researched content presented in a clear and appealing manner. Japanophilia in Swiss landscape architecture with a photoessay by Martin Linsi. **The Routledge Handbook of Architecture, Urban Space and Politics, Volume I** Nikolina Bobic, Farzaneh Haghighi, 2022-10-28

For architecture and urban space to have relevance in the 21st Century, we cannot merely reignite the approaches of thought and design that were operative in the last century. This is despite or because of the nexus between politics and space, often being theorized as a representation or by-product of politics. As a symbol or an effect, the spatial dimension is depoliticized. Consequently, architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role. This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing. Considering both ongoing and unprecedented global problems from violence and urban warfare, the refugee crisis, borderization, detention camps, terrorist attacks, to capitalist urbanization, inequity, social unrest, and climate

change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license
