Innovations in Ground Water and Soil Cleanup National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Innovative Remediation Technologies, 1997-11-21 Most books on ground water and soil cleanup address only the technologies themselves not why new technologies are or are not developed *Innovations in Ground Water and Soil Cleanup* takes a holistic approach to the entire field addressing both the sluggish commercial development of ground water and soil cleanup technologies and the attributes of specific technologies It warns that despite cleanup expenditures of nearly 10 billion a year the technologies remain rudimentary This engaging book focuses on the failure of regulatory policy to link cleanup with the financial interests of the company responsible for the contamination The committee explores why the market for remediation technology is uniquely lacking in economic drivers and why demand for innovation has been so much weaker than predicted The volume explores how to evaluate the performance of cleanup technologies from the points of view of the public regulators cleanup entrepreneurs and other stakeholders The committee discusses approaches to standardizing performance testing so that choosing a technology for a given site can be more timely and less contentious Following up on *Alternatives for Ground Water Cleanup* NRC 1994 this sequel presents the state of the art in the cleanup of various types of ground water and soil contaminants Strategies for making valid cost comparisons also are reviewed

The Subject of Prostitution Jane Scoular, 2015-12-22 *The Subject of Prostitution* offers a distinctive analysis of the links between prostitution and social theory in order to advance a critical analysis of the relationship of law to sex work Using the lens of social theory to disrupt fixed meanings the book provides an advanced analytical framework through which to understand the complexity and contingencies of sex work in late modernity The book analyses contemporary citizenship discourse and the law's ability to meet the competing demands of empowerment by sex workers and protection by radical feminists who view prostitution as the epitome of patriarchal sexual and economic relations Its central focus is the role of law in both structuring and responding to the problem of prostitution By developing a distinctive constitutive approach to law the author offers a more advanced analytical framework from which to understand how law matters in contemporary debates and also suggests how law could matter in more imaginative justice reforms This is particularly pertinent in a period of unprecedented legal reform both internationally and nationally as legal norms simultaneously attempt to protect empower and criminalise parties involved in the purchase of sexual services *The Subject of Prostitution* aims to overcome the current

aporia in these debates and suggest new ways to engage with the subject and law As such *The Subject of Prostitution* provides an advanced theoretical resource for policymakers researchers and activists involved in contemporary struggles over the meanings and place of sex work in late modernity *Report of the Attorney General* Massachusetts. Bringing Excellence to Substance Abuse Services in Rural and Frontier America ,1997 The Minute Men, 1775-1975 Council of Minute Men,1977 *Race and Racism* Peter Jackson,2003-09-02
First Published in 1987 In September 1985 the Social Geography Study Group of the Institute of British Geographers held a three day conference at Coventry Lanchester Polytechnic on the subject of Race and Racism The present volume is a selection of essays derived from some of the papers that were given at the conference together with one newly commissioned paper by Susan Smith and an introductory essay Connecticut Attacked Robert McDevitt,2017-12-01 America won the Revolutionary War against all odds They were outnumbered and outmaneuvered for the majority of the war but a few strategic wins turned the tables One such strategic encounter occurred after the war was won in Danbury the British planned a massive raid on Danbury s magazine of stores in April 1777 Robert McDevitt outlines the leading causes and comprehensive history of this tumultuous time from a British viewpoint As one phase of the Bicentennial observation The American Revolution Bicentennial Commission of Connecticut has authorized scholars in a wide range of study to write a series of monographs on the broadly defined Revolutionary Era of 1763 to 1787 These monographs appeared yearly beginning in 1973 through 1980 Emphasis is placed upon the birth of the nation rather than on the winning of independence on the field of battle **The Sculpted Ear** Ryan McCormack,2020-04-17 Sound and statuary have had a complicated relationship in Western aesthetic thought since antiquity Taking as its focus the sounding statue a type of anthropocentric statue that invites the viewer to imagine sounds the statue might make The Sculpted Ear rethinks this relationship in light of discourses on aurality emerging within the field of sound studies Ryan McCormack argues that the sounding statue is best thought of not as an aesthetic object but as an event heard by people and subsequently conceptualized into being through acts of writing and performance Constructing a history in which hearing plays an integral role in ideas about anthropocentric statuary McCormack begins with the ancient sculpture of Laoco n before moving to a discussion of the early modern automaton known as Tipu s Tiger and the statue of the Commendatore in Mozart s Don Giovanni Finally he examines statues of people from the present and the past including the singer Josephine Baker the violinist Aleksandar Nikolov and the actor Bob Newhart with each case touching on some of the issues that have historically plagued the aesthetic viability of the sounding statue McCormack convincingly demonstrates how sounding statues have served as important precursors and continuing contributors to modern ideas about the ontology of sound technologies of sound reproduction and performance

practices blurring traditional divides between music sculpture and the other arts A compelling narrative that illuminates the stories of individual sculptural objects and the audiences that hear them this book will appeal to anyone interested in the connections between aurality and statues in the Western world in particular scholars and students of sound studies and sensory history

Forging Democracy Geoff Eley, 2002-04-11 Democracy in Europe has been a recent phenomenon Only in the wake of World War II were democratic frameworks secured and even then it was decades before democracy truly blanketed the continent Neither given nor granted democracy requires conflict often violent confrontations and challenges to the established political order In Europe Geoff Eley convincingly shows democracy did not evolve organically out of a natural consensus the achievement of prosperity or the negative cement of the Cold War Rather it was painstakingly crafted continually expanded and doggedly defended by varying constellations of socialist feminist Communist and other radical movements that originally blossomed in the later nineteenth century Parties of the Left championed democracy in the revolutionary crisis after World War I salvaged it against the threat of fascism and renewed its growth after 1945 They organized civil societies rooted in egalitarian ideals which came to form the very fiber of Europe's current democratic traditions The trajectories of European democracy and the history of the European Left are thus inextricably bound together Geoff Eley has given us the first truly comprehensive history of the European Left its successes and failures its high watermarks and its low tides its accomplishments insufficiencies and excesses and most importantly its formative lasting influence on the European political landscape At a time when the Left's influence and legitimacy are frequently called into question *Forging Democracy* passionately upholds its vital contribution

Racism and Antiracism Peter Braham, Ali Rattansi, Richard Skellington, 1992-04-21 This key text explores the nature and extent of racial discrimination and the successes and failures of equal opportunities programmes A successful balance of important recent articles and substantial contributions specially written for the volume it presents analyses of institutional racism in immigration law housing social work employment training and the criminal justice system The contributors explore changes over time and examine the interwoven strands of race class and gender that form the pattern of disadvantage They then discuss the formulation implementation and outcomes of equal opportunities policies in the local state and the private sector rigorously investigating both liberal and radical appro
