Gross, Ronald S. Drabman, 2013-03-07 Since 1978 the editors have collaborated on several research projects and spent many hours at conventions discussing research graduate education and patient care The idea for this volume arose when we both concluded that the area of behavioral pediatrics needed a how to book Several important scholarly reviews had recently appeared They presented excellent summary information concerning the general assumptions and theories underlying the area of behavioral medicine with children But these volumes devote very little attention to the application of clinical methods What was needed we thought was a book that would allow graduate students and practicing clinicians the opportunity to peer into the minds of eminent practitioners and understand their thinking Thus the book was conceived Editing books represents a special kind of challenge One has to sell an idea to a group of distinguished colleagues They have to believe enough in that idea to devote the considerable time and effort necessary to bring thought into reality In this case there were two ideas we tried to sell to our colleagues *Sprachentwicklung bei misshandelten Kindern: Eine empirische Untersuchung an vernachlässigten Kindern unter sechs Jahren* Tina Schmid, 2011-04 Kindesmisshandlungen und deren massive Auswirkungen auf die gesamte kindliche Entwicklung beschreiben die Forschung bereits seit der Antike Jedoch wurden zunächst eher halbherzige Versuche unternommen deren Bedingungsfaktoren und Hintergründen oder deren Auswirkungen auf den Grund zu gehen Erst sehr spät ab den 1960er Jahren durch erste Untersuchungen der Forschergruppe um Ray E Helfer und C Henry Kempe rückte das Problemfeld allmählich wieder in den Vordergrund man begann dieses ernster zu nehmen und systematischer zu beleuchten Auch wenn man heute bereits einiges über die Entstehungsbedingungen von Kindesmisshandlungen und deren Einfluss auf die kindliche Entwicklung weiß so ist dennoch einiges an Forschungsarbeit

zu leisten auf deren Basis wirksame Präventionen und Interventionsansätze in der modernen Kinderschutzarbeit erstellt und umgesetzt werden können. Insbesondere neue Erkenntnisse und Theorien unterschiedlicher Fachdisziplinen zur Bindungsforschung und Gehirnentwicklung und damit auch der Sprachentwicklung als Teil der Kognition stehen hier im Vordergrund. Nach wie vor existiert insbesondere in Deutschland ein Forschungsdefizit, das sich unter anderem in fehlenden einheitlichen Definitionen, Terminologien, Klassifikationen, als auch Problemen der Abgrenzung zu gerade noch vertretbaren Erziehungspraktiken begründet. Besonders zur Auswirkung der Kindesmisshandlungen auf die Sprachentwicklung gibt es bisher und dies nicht nur in Deutschland nur wenige und kaum aktuelle Studien. Dieses Buch beschäftigt sich aus diesem Grunde mit den Auswirkungen von Kindesmisshandlungen durch primäre Bezugspersonen auf die Sprachentwicklung. Im Hinblick auf die Sprachentwicklung wird der aktuelle Forschungsstand zusammengetragen und mögliche Bedingungsfaktoren aufgedeckt, die bei misshandelten Kindern die Sprachentwicklung beeinflussen könnten. Anschließend werden einige Faktoren dieser Theorie speziell für die Unterform der Vernachlässigung mithilfe des standardisierten Sprachentwicklungstests für 3-5-jährige Kinder SETK3-5 an vierzehn 3- bis 5-jährigen Kindern näher beleuchtet. Es soll der Frage nachgegangen werden, ob vernachlässigte Kinder bei denen aufgrund der ungünstigen Lebensverhältnisse besonders große Defizite in kognitiven Bereichen vermutet werden, Verzögerungen bzw. Störungen der Sprachentwicklung aufweisen. Die aktuelle Forschungslage soll auch mit Blick auf eine Erhöhung der Sensibilität für diesen Zusammenhangsbereich und damit eine bessere sprachtherapeutische Versorgung misshandelter Kinder ein Stück weit gefördert werden.

Gottlieb, Janice E. Williams, 2013-11-11 Child adolescent development and behavior have been a traditional concern of primary health care providers However it was not until the mid 1960s that attempts were made to consolidate developmental behavioral issues into an identifiably distinct fund of medical knowledge During the ensuing two decades developmental behavioral pediatrics was recognized as a clinical and research subspecialty within the framework of comprehensive health care for children The influence of public advocacy groups topic dedicated journals national professional specialty societies subject related continuing education programs and federal legislation PL94 142 has served to crystallize developmental behavioral pediatrics as a specialized field of study As a consequence during the past ten years significant modifications have restructured medical student and pediatric resident education providing an emphasis on developmental behavioral issues The focus on neurodevelopmental educational and psychosocial issues reflects changing priorities in traditional health care for children The postgraduate training of pediatric fellows in two and three year training programs was initiated to accommodate professional manpower needs in both academic and practice settings Many of the problems in childhood development and behavior frequently span the traditional areas of child neurology child psychiatry and general pediatrics As a result there has been some confusion in demarcating professional responsibilities in diagnosis and management as well as poorly defined terminology and classification schemas With the birth of developmental pediatrics as a pediatric specialty a more cohesive fund of knowledge has been accumulated and more meaningful strategies have been designed for prevention diagnosis and management
