Joshua Generation Rachel Havrelock, 2020-06-30 How a controversial biblical tale of conquest and genocide became a founding story of modern Israel No biblical text has been more central to the politics of modern Israel than the book of Joshua Named after a military leader who became the successor to Moses it depicts the march of the ancient Israelites into Canaan describing how they subjugated and massacred the indigenous peoples The Joshua Generation examines the book's centrality to the Israeli occupation today revealing why nationalist longing and social reality are tragically out of sync in the Promised Land Though the book of Joshua was largely ignored and reviled by diaspora Jews the leaders of modern Israel have invoked it to promote national cohesion Critics of occupation meanwhile have denounced it as a book that celebrates genocide Rachel Havrelock looks at the composition of Joshua showing how it reflected the fractious nature of ancient Israelite society and a desire to unify the populace under a strong monarchy She describes how David Ben Gurion Israel's first prime minister convened a study group at his home in the late 1950s where generals politicians and professors reformulated the story of Israel's founding in the language of Joshua Havrelock traces how Ben Gurion used a brutal tale of conquest to unite an immigrant population of Jews of different ethnicities and backgrounds casting modern Israelis and Palestinians as latter day Israelites and Canaanites Providing an alternative reading of Joshua The Joshua Generation finds evidence of a decentralized society composed of tribes clans and woman run households one with relevance to today when diverse peoples share the dwindling resources of a scarred land **Middle East Politics for the New Millennium** Louis

Israel's National Security Law Amichai Cohen, Stuart Cohen, 2012-08-06 Terror attacks on western civilian targets have stimulated interest in the dilemmas faced by liberal societies when combating threats to national security Combining the perspectives of political science and law this book addresses that discourse asking how democracies seek to harmonize the protection of individual liberties with the defence of state interests The book focuses on the experience of Israel a country whose commitment to democratic values has continuously been challenged by multiple threats to national survival It examines the legal legislative and institutional methods employed to resolve the dilemmas generated by that situation and thus provides a unique interpretation of Israeli national security behaviour Policy making and policy implementation in this sphere it shows have reflected not just external constraints but also shifts in the domestic balance of power between the executive the legislature and the judiciary The book concludes with an agenda of the measures that each branch of government needs to implement in order to repair the flaws that have developed in this system over time Based on a close reading of legislative and court readings the book proposes a new taxonomy for the analysis of national security legal frameworks both in Israel and elsewhere in the democratic world As such it will be of great interest to students and scholars of political science national security law Israeli history and civil military relations *Gideon's Spies* Gordon

Efraim Karsh, 2002 **Statecraft in the Middle East** Imad Mansour, 2016-09-27 What role do ideas play in state building and state activity This book argues that government policies in both foreign relations and domestic politics must always be situated within a broader ideational and societal context Imad Mansour analyses how governments in the contemporary Middle East have governed internally and acted externally based on societal narratives which bring together a variety of ideas about a society's history and place in the world He argues that there is a dominant societal narrative that acts as a primary building block of statecraft where statecraft is understood as an ongoing set of local regional and global state building processes Mansour investigates the ways in which statecraft in the Middle East has been guided by narratives through a close historical reading and comparative discussion of the political activity of six states Egypt Israel Syria Turkey Saudi Arabia and Iran in the second half of the twentieth century and the early twenty first century His book demonstrates

the analytical power of narratives in understanding statecraft and explains why governments' decisions need to be understood in complex ways

Sarajevo Fran Markowitz, 2024-03-18 This fascinating urban anthropological analysis of Sarajevo and its cultural complexities examines contemporary issues of social divisiveness, pluralism and intergroup dynamics in the context of national identity and state formation. Rather than seeing Bosnia Herzegovina as a volatile postsocialist society, the book presents its capital city as a vibrant yet wounded center of multicultural diversity where citizens live in mutual recognition of difference while asserting a lifestyle that transcends boundaries of ethnicity and religion. It further illuminates how Sarajevans negotiate group identity in the tumultuous context of history, authoritarian rule and interactions with the built environment and one another. As she navigates the city, Fran Markowitz shares narratives of local citizenry played out against the larger dramas of nation and state building. She shows how Sarajevans' national identities have been forged in the crucible of power, culture, language and politics. *Sarajevo: A Bosnian Kaleidoscope* acknowledges this Central European city's dramatic survival from the ravages of civil war as it advances into the present-day global arena.

Upon What Does the Turtle Stand? Aharon Aviram, Janice Richardson, 2006-03-06 This book brings together the reflections of independent researchers from around the world. Sixteen authors from fourteen countries present their views on the use of information and communication technology (ICT) in education, offering valuable insights through the examination of current issues relevant to the future of education. What will education be in tomorrow's world? How can ICT be used without rendering education a purely technical process? How can we succeed in the renovation of educational subjects without transforming them into technical objects? The introductory chapter of this publication guides us into the essays through a classification organized by the editors to illustrate different attitudes to technologies. The Globalizers see the integration of ICT and education as a means of enhancing the competitiveness of their society in a global economy. The Reformists see it as a means of bringing about significant change in didactics in the various disciplines and even in the basics of education. The Humanists consider technologies as possible catalysts for changing the aims and values of education from learning-oriented to humanistic. The Heretic sees values and aims as being determined exclusively by technology and economy and culture as products of the technology-guided process. He therefore does not see any sense in interrogations as to which aims should guide us in integrating technology with education. Obviously, some arguments stretch across all four categories without completely matching any so-called type.

Israel and the Cold War Howard A. Patten, 2013-02-12 In the wake of its creation in 1948, the state of Israel was confronted with the challenge of establishing foreign relations with key players in the region in the face of opposition from most of the Arab states. Howard Patten explores the genesis and development of Israel's foreign relations with Iran, Turkey and Ethiopia, known as the Policy of the Periphery. Highlighting the pragmatism and Realpolitik at the heart of this policy, *Israel and the Cold War* analyses the national interests and mutual concerns which shaped relations and strategy at the United Nations during the critical moments of the establishment of the State of Israel and the following forty

years before the ramifications of the Iranian Revolution became apparent During this period Israel made efforts to create pragmatic alliances behind closed doors at the UN even as ambivalence and hostility reigned in the public sphere Patten thus examines the implications that the Cold War system of ideological combat had on these attempts to maintain implicit yet cordial understandings as world events such as the Suez Crisis of 1956 successive crises over Cyprus and the Ethiopian and Iranian Revolutions tested the Policy of the Periphery Israel and the Cold War traces the development of Israel s relations with these three states from their initial beginnings to consolidation then rejection and subsequent efforts to realign Patten highlights the extensive diplomatic and military reverberations that occurred throughout the region and the way in which these were played out at the UN Based primarily on UN documents this book is a vital primary resource for those researching the period in question and the formulation of foreign policy in the Middle East *Hitler - Films from Germany* K. Machtans,M. Ruehl,2012-11-30 The first book length study to critically examine the recent wave of Hitler biopics in German cinema and television A group of international experts discuss films like Downfall in the context of earlier portrayals of Hitler and draw out their implications for the changing place of the Third Reich in the national historical imagination *Narratives of Dissent* Rachel S. Harris,Ranen Omer-Sherman,2012-12-17 Students and teachers of Israeli studies will appreciate *Narratives of Dissent* *Israel: The First Hundred Years* Efraim Karsh,2013-09-13 Since its founding in 1948 Israel has faced many political social and psychological challenges unfamiliar to other nations on the western democratic political model and peculiar to the Jewish state This work covers the role of politics in Israel since 1948
