**Bernard Tschumi: Parc de la Villette** Samantha Hardingham, Kester Rattenbury, 2012 This title addresses the groundbreaking public space with art installations Supported by an extensive illustrated section this innovative text is an invaluable resource for any architecture student and an inspiring record of this fascinating project      *Von der Aufklärung*

zur Postmoderne: Gert Kähler, 2025-08-24 Die Aufklärung Mitte des 18. Jahrhunderts schuf eine Architektur auf der Grundlage der Rationalität den Klassizismus. Die sich verändernde Gesellschaft stellte aber Anforderungen, die mit den traditionellen Methoden gar nicht lösbar waren. Industrialisierung und Bevölkerungswachstum musste in traditionelle Architekturkonzepte überführt oder völlig neu gedacht werden. Die großen Umbrüche am Beginn des 20. Jahrhunderts, Industrialisierung und Kriege, und eine sich verändernde Gesellschaft zeigten, dass der Versuch, einen Stil für alle zu entwickeln, zum Scheitern verurteilt war. Die Moderne trat mit diesem Ansatz an, ein neuer voraussetzungsloser Stil für eine neue Gesellschaft musste aber scheitern. Heute stellen sich ganz andere als Stilfragen. Die Entwicklung weg von einer Stadt für alle hin zum Ort einer Zweidrittel-Gesellschaft.

**Architecture and Spectacle: A Critique** Gevork Hartoonian, 2016-12-05 Focusing on six leading contemporary architects: Peter Eisenman, Frank Gehry, Bernard Tschumi, Zaha Hadid, Rem Koolhaas and Steven Holl, this book puts forward a unique and insightful analysis of neo avant garde architecture. It discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making, but does so by applying the tectonic of theatricality discussed by the 19th century German architect Gottfried Semper. In doing so, it breaks new ground by opening up a dialogue between the study of the past and the design of the present. The work of each discussed architect is seen as addressing a historiographical problem. To this end, and this is the second important aspect of this book, the chosen buildings are discussed in terms of the thematic of the culture of building: the tectonic of column and wall, for example, rather than the formal, and this through a discussion that is informed by the latest available theories. Having set the aesthetic implication of the processes of the digitalization of architecture, the book's conclusion highlights strategies by which architecture might postpone the full consequences of digitalization and thus the becoming of architecture as ornament on its own right.

*Architectural Drawings as Investigating Devices* Marianna Charitonidou, 2023-07-10 *Architectural Drawings as Investigating Devices* explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived. The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries. It traces their transformations, paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation, to the diagrams of Team 10 architects, to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi, John Hejduk, Peter Eisenman and Oswald Mathias Ungers, and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture (OMA). Particular emphasis is placed on the spirit of truth and clarity in modernist architecture, the relationship between the individual and the community in post-war era architecture, the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture, the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post-autonomy era. This book is based on extensive archival research.

**Constructing Gardens, Cultivating the City** Amanda Shoaf Vincent, 2023-05-16 Constructing Gardens Cultivating the City is the first cultural history of major new parks developed in Paris in the late twentieth century as part of the city's program of adaptive reuse of industrial spaces Thanks to laws that gave the city more political autonomy Paris's local government launched a campaign of park creation in the late 1970s that continued to the turn of the millennium The parks in this book represent this campaign and illustrate different facets of their cultural and historical context Archival research interviews and analyses of the parks reveal how postmodern debates about urban planning the historic city public space and nature's presence in an urban setting influenced their designs In sum the city adopted the garden as a model for public parks investing in complex richly symbolic and representational spaces These parks were intended to represent contemporary twists on traditional designs and serve local residents as much as they would contribute to Paris's role as a world city The parks development process often included points of conflict pointing to differing views on what Parisian space should represent and fundamental contradictions between the characteristics of public space and the garden as it is traditionally defined These parks demonstrate the ongoing cultivation of the city over time in which transformed sites not only fulfil new functions but also engage with history and their surroundings to create new meaning They stand for landscape as a form of signifying cultural production that directly engages with other art forms and ways of knowing Just as the Luxembourg Gardens the Tuileries and the Buttes Chaumont parks exemplify their eras cultural dynamics such parks as the Jardin Atlantique Parc Andr Citro n and the Jardin des Halles express contemporary French culture within the archetypal space of their era the city Finally they point the way to current trends in landscape architecture such as citizen gardening and ecological initiatives
