Tremblay, Carol Horton Tremblay, 2012-07-20 This book covers the main topics that students need to learn in a course on Industrial Organization It reviews the classic models and important empirical evidence related to the field However it will differ from prior textbooks in two ways First this book incorporates contributions from behavioral economics and neuroeconomics providing the reader with a richer understanding of consumer preferences and the motivation for many of the business practices we see today The book discusses how firms exploit consumers who are prone to making mistakes and who suffer from cognitive dissonance attention lapses and bounded rationality for example and will help explain why firms invest in persuasive advertising offer 30 day free trials offer money back guarantees and engage in other observed phenomena that cannot be explained by the traditional approaches to industrial organization A second difference is that this book achieves a balance between textbooks that emphasize formal modeling and those that emphasize the history of the field empirical evidence case studies and policy analysis This text puts more emphasis on the micro foundations i e consumer and producer theory classic game theoretic models and recent contributions from behavioral economics that are pertinent to industrial organization Each topic will begin with a discussion of relevant theory and models and will also include a discussion of concrete examples empirical evidence and evidence from case studies This will provide students with a deeper understanding of firm and consumer behavior of the factors that influence market structure and economic performance and of policy issues involving imperfectly competitive markets The book is intended to be a textbook for graduate students MBAs and upper level undergraduates and will use examples graphical analysis algebra and simple calculus to explain important ideas and theories in industrial organization **Early Childhood in the Anglosphere** Peter Moss, Linda Mitchell, 2024-05-09 Written by two leading international experts Early Childhood in the Anglosphere offers a unique comparison of early childhood education and care services and parenting leave across seven high income Anglophone countries Peter Moss and Linda Mitchell explore what these systems have in common including the dominance of childcare

services widespread privatisation and marketisation and weak parenting leave They highlight the substantial failings of these systems and the causes and consequences of these failings But this book is ultimately about hope about how these failings might be made good through major changes In other words it is about transformation why transformation is both necessary and possible at this particular time what transformation might look like and how it might happen Part of that transformation concerns the need for new policies and structures but even more it is about how the Anglosphere thinks about early childhood The authors call for turning away from conceptualising early childhood services as childcare and marketised businesses selling commodities to parent consumers and for reconceptualising them as education imbued with an ethics of care a public good available as a right to all children and families and complemented by well paid individual entitlements to parenting leave Using examples from the Anglosphere and beyond and in a context of converging crises the book argues that transformation of thinking policies and structures is desirable and doable Selected Works of Joseph E.
