Between Mackinder And Spykman Geopolitics Containment:

The Foreign Policy of Modern Turkey Ozgur Tufekci, 2017-01-30 In the last three decades Turkey has attempted to build close relationships with Russia Iran and the Turkic World As a result there has been ongoing debate about the extent to which Turkey's international relations axis is shifting eastwards Ozgur Tufekci argues that Eurasianist ideology has been fundamental to Turkish foreign policy and continues to have influence today The author first explores the historical roots of Eurasianism in the 19th century comparing this to Neo Eurasianism and Pan Slavism The Ozal era 1983 1993 the Cem era 1997 2002 and Davutoglu era since 2003 are then examined to reveal how foreign policy making has been informed by discourses of Eurasianism and how Eurasianist ideas were implemented through internal and external socio economic and political factors *Eurasian Politics: Ideas, Institutions and External Relations* Mr Tulsiram, Mr Ajay Patnaik, 2013-06-15 The transitional politics of Eurasian space is marked by a constant struggle among three sets of ideas and institutions the 1 is the remarkable resilience of Soviet ideas and institutions 2 an attempt by the regimes of these states to reinvent the historical and cultural traditions of preSoviet periods and third is an attempt by a section of the powerful elite to superimpose Western liberal ideas and institutions There is a strange intertwining of these ideas and institutions This book examines the extent to which the postSoviet politics has departed from the Soviet one What are the new ideational structures emerging in these states and how far have they crystallised into institutions What are the external influences which are shaping the institutions in the Eurasian space And finally what are the various dynamics of geopolitics in this region Experts from various countries will delve into the shifting dynamics of Eurasian politics **Raumdeutungen** Sabine Feiner, Karl G. Kick, Stefan Krauss, 2001 *Space Strategy and Military Doctrine* Bert Chapman, 2025-07-24 Examining open access civilian and military space policy strategy and doctrine documents this book highlights emerging trends and developments in military space strategy Bert Chapman collects public documents from Australia Canada the European Union NATO the United States and the United Kingdom from 2017 onward to illustrate space's critical importance to national and international security and to multiple areas of civilian economic and personal use including climate change food security personal and global communications and the potential for expanded space exploration In light of recent revelations that Russia may be capable and desirous of exploding nuclear weapons in space to damage civilian and military space based infrastructures of the U S and other countries and China's increasing space assertiveness and capabilities it is more important than ever that civilian readers have the access and background knowledge necessary to parse publicly available documents relating to space strategy so that they may effectively participate in the legislative and regulatory policymaking processes of their governments **The Struggle for the Eurasian Borderlands** Alfred J. Rieber, 2014-03-20 A major new account of the Eurasian borderlands as shatter zones which have generated some of the world's most significant conflicts Great Powers and Geopolitical Change Jakub J. Grygiel, 2007-02-01 Named by Foreign Affairs as a book to read on geopolitics In an era of

high technology and instant communication the role of geography in the formation of strategy and politics in international relations can be undervalued But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns Here political scientist Jakub J Grygiel brings to light the importance of incorporating geography into grand strategy He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication Grygiel examines case studies of Venice the Ottoman Empire and China in the global fifteenth century all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered The location of resources the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers Grygiel asserts that though many other aspects of foreign policy have changed throughout history strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena

Weltordnung durch US-Leadership? Sabine Feiner, 2013-10-05 Die Rolle der einzigen Supermacht USA bei der Gestaltung einer neuen Weltordnung ist seit Beginn der neunziger Jahre Gegenstand einer kontroversen Debatte Diese Studie befaßt sich mit der Konzeption von Zbigniew K Brzezinski der in einer aktiven amerikanischen Führungsrolle die maßgebliche Voraussetzung für die Entstehung einer globalen Ordnung erkennt Der ehemalige Nationale Sicherheitsberater zählt seit fast dreißig Jahren zu den prominentesten Kommentatoren amerikanischer Weltpolitik Seine Einschätzungen werden in der vorliegenden Arbeit diskutiert und in ihrem theoretischen Kontext analysiert Dabei stehen die machtpolitischen und ideologischen Voraussetzungen die Möglichkeit internationaler Akzeptanz und die geopolitische Umsetzung von Weltführung im Mittelpunkt Am Ende steht die Frage inwieweit Brzezinskis Konzeption als eine allgemeine Strategie für eine zukünftige Weltordnung gelten kann

Walling, Boundaries and Liminality Agnes Horvath, Marius Ion Bența, Joan Davison, 2018-08-06 Contemporary challenges related to walls borders and encirclement such as migration integration and endemic historical conflicts can only be understood properly from a long term perspective This book seeks to go beyond conventional definitions of the long duration by locating the social practice of walling and encirclement in the broadest context of human history integrating insights from archaeology and anthropology Such an approach far from being simply academic has crucial contemporary relevance as its focus on origins helps to locate the essential dynamics of this practice and provides a rare external position from which to view the phenomenon as a transformative exercise with the area walled serving as an artificial womb or matrix The modern world with its ingrained ideas of borders nation states and other entities often makes it very difficult to gain a critical distance and detachment to see beyond conventional perspectives The unique approach of this book offers an antidote to this problem Cases discussed in the book range from Palaeolithic caves the ancient walls of Gobekli Tepe Jericho and Babylon to the foundation of Rome the Chinese Empire medieval Europe and the Berlin Wall The book

also looks at contemporary developments such as the Palestinian wall Eastern and Southern European examples Trump's proposed Mexican wall the use of Greece as a bulwark containing migration flows and the transformative experience of voluntary work in a Calcutta hospice In doing so the book offers a political anthropology of one of the most fundamental yet perennially problematic human practices the constructing of walls As such it will appeal to scholars of sociology anthropology and political theory

The Revenge of Geography Robert D. Kaplan, 2012-09-11 NEW YORK TIMES BESTSELLER In this ambitious and challenging The New York Review of Books work the bestselling author of Monsoon and Balkan Ghosts offers a revelatory prism through which to view global upheavals and to understand what lies ahead for continents and countries around the world In The Revenge of Geography Robert D Kaplan builds on the insights discoveries and theories of great geographers and geopolitical thinkers of the near and distant past to look back at critical pivots in history and then to look forward at the evolving global scene Kaplan traces the history of the world's hot spots by examining their climates topographies and proximities to other embattled lands The Russian steppe's pitiless climate and

limited vegetation bred hard and cruel men bent on destruction for example while Nazi geopoliticians distorted geopolitics entirely calculating that space on the globe used by the British Empire and the Soviet Union could be swallowed by a greater German homeland Kaplan then applies the lessons learned to the present crises in Europe Russia China the Indian subcontinent Turkey Iran and the Arab Middle East The result is a holistic interpretation of the next cycle of conflict throughout Eurasia Remarkably the future can be understood in the context of temperature land allotment and other physical certainties China able to feed only 23 percent of its people from land that is only 7 percent arable has sought energy minerals and metals from such brutal regimes as Burma Iran and Zimbabwe putting it in moral conflict with the United States Afghanistan's porous borders will keep it the principal invasion route into India and a vital rear base for Pakistan India's main enemy Iran will exploit the advantage of being the only country that straddles both energy producing areas of the Persian Gulf and the Caspian Sea Finally Kaplan posits that the United States might rue engaging in far flung conflicts with Iraq and Afghanistan rather than tending to its direct neighbor Mexico which is on the verge of becoming a semifailed state due to drug cartel carnage A brilliant rebuttal to thinkers who suggest that globalism will trump geography this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms
