Seventh Art's Perspective on Ethical Conduct and Corporate Irresponsibility Iffet Kesimli, 2023-06-23. This book discusses the possibility of corporate professionals, specifically accountants, bankers and financiers, being influenced by the seventh art, i.e. cinema, and acting out fraudulent actions depicted in the cinematic world in the real life situations. It is widely known that real world scenarios influence cinema. Through a field study, this book evaluates if there is a reciprocal effect on events in the real world being impacted by scenarios depicted in movies. A questionnaire was designed in order to understand the perception of business ethics among above mentioned professionals and if such a perception was formed or influenced due to observed behaviors from movies. The book concludes with an assessment of the power of visual art in affecting real world behaviors and outlines strategies for recognizing and preventing such behaviors leading to unethical conduct and corporate irresponsibility.

Russell, 2017-12-07 The world of business books is a curious place where one can find everyone from great businesspeople like Warren Buffett Steve Jobs and Elon Musk to the most spectacular business failures such as Enron and the sub prime business market There are geniuses hard workers academics and entrepreneurs as well a few charlatans and hucksters There's even room for Donald Trump The 70 titles covered were chosen with various parameters in mind to cover a range of areas of business from sales and marketing to negotiation entrepreneurship to investing leadership to innovation and from traditional and corporate models of business to start up manuals and alternative angles on the subject Obvious bestselling titles such as *How to Make Friends and Influence People* or *7 Habits of Highly Effective People* have been included but there are also those books of more questionable value often included on

recommended lists of business classics included here by way of warning The chosen books also cover a wide span of time and acknowledge that some of the most powerful or entertaining insights into business can be found in texts that aren't perceived as being business books for instance The Art of War Microserfs Thinking Fast and Slow and The Wealth of Nations The selection includes a good range of the most recent successes in business publishing with which readers may be less familiar The titles are arranged chronologically allowing the reader to dip in but also casting an intriguing light on how trends in business titles have changed over the years Among these titles you will find expert advice based on solid research for instance The Effective Executive or Getting to Yes and inspirational guides to setting up businesses and running them on sound foundations such as True North Crucial Conversations or We alongside dubious management manuals that take a single flawed idea and stretch it out to the point of absurdity The hope is that the reader will be inspired to read the best of these titles ignore the worst of them and will come away with at least a basic idea of what each has to teach us about business

Gabriel, 2021-11-14 Political Economy Goes to the Movies provides an introduction to political economy using a wide range of popular films and documentaries as the objects of analysis The work helps readers to understand and analyze the economic and related political cultural and ecological relationships depicted in selected films This is achieved through the lens of past and present economic theories and in the context of debates over the dynamic influence of economics on individual life chances Film may have more to teach us about the real world than the abstractions of certain economic theories A world of income inequality child labor in mills and mines local rebellions against land seizures and wars triggered by economic conflicts provide the context for many films mirroring real world events Some films depict the interacting and intersecting political economic cultural and ecological contexts within and between variant economic relationships whereas other films show catastrophes such as economic depressions disruptive social transitions violent revolutions and existential environmental degradation a world in disequilibrium Films allow us to see a panoply of human social relationships and related problems even to explore cataclysmic moments in our species life but not to necessarily see the why of these

relationships and problems Simultaneously mainstream economics has severe constraints on what can be analyzed Film exposes this weakness of the mainstream model Twelve Years a Slave Trumbo The Big Short and others are analyzed for their realism by referencing documented historical social events and behavioral economics provides further data for analyzing the realism of social interaction within the films Exploring events and contexts absent from the typical economics text or the basic level economics classes this work is essential reading for students and scholars of political economy in both economics and politics departments as well as those of pluralist economics and Marxist economics

Critical Representations of Work and Organization in Popular Culture Carl Rhodes, Robert Westwood, 2007-12-21 This book challenges traditional organizational theory looking to representations of work and organizations within popular culture and the ways in which these institutions have also been conceptualized and critiqued there. Through a series of essays Rhodes and Westwood examine popular culture as a compelling and critical arena in which the complex and contradictory relations that people have with the organizations in which they work are played out. By articulating the knowledge in popular culture with that in theory they provide new avenues for understanding work organizations as the dominant institutions in contemporary society. Rhodes and Westwood provide a critical review of how organizations are represented in various examples of contemporary popular culture. The book demonstrates how popular culture can be read as an embodiment of knowledge about organizations often more compelling than those common to theory and explores the critical potential of such knowledge and the way in which popular culture can reflect on the spirit of resistance, carnivalisation and rebellion.

Managing With Power Jeffrey Pfeffer, 1993-11-12 Although much has been written about how to make better decisions, a decision by itself changes nothing. The big problem facing managers and their organizations today is one of implementation: how to get things done in a timely and effective way. Problems of implementation are really issues of how to influence behavior, change the course of events, overcome resistance and get people to do things they would not otherwise do. In a word, power. *Managing With Power* provides an in-depth look at the role of power and influence in organizations. Pfeffer shows convincingly that its effective use is an essential component of strong leadership. With vivid examples he makes a compelling case for the necessity of power in mobilizing the political support and resources to get things done in any organization. He provides an intriguing look at the personal attributes such as flexibility, stamina and a high tolerance for conflict and the structural factors such as control of resources, access to information and formal authority that can help managers advance organizational goals and achieve individual success.
