Radiological, Chemical and Biological Agents** Grant N. Pierce,Volodymyr I. Mizin,Alexander Omelchenko,2014-07-08
The probability for exposure to damaging radiation toxic chemicals in the environment and adverse biological agents has
increased exponentially today The more frequent and faster travel that we experience today also escalates the risk of
contraction and transmission of potentially deadly infections This has created a very real and escalating risk for injuries and
deaths This is accentuated in the military and medical staff that is more frequently exposed to radiological chemical and
biological agents in their normal working environment Understanding the mechanisms whereby these toxic agents inflict
damage to our bodies is essential to prepare us for these challenges Much of the damage is inflicted through the generation
of free radicals and non radical oxidants which then act through oxidative mechanisms to injury the body This volume will
discuss the damage caused by these radiological chemical and biological environmental stressors the mechanisms through
which the damage can occur and the novel strategies that can be used to reduce the injury inflicted by these toxic
compounds Using basic and clinical research approaches the contents of this book discuss new ideas for the development of
bioactive products and environmental approaches to lessen or negate the biological damage inflicted by these noxious
compounds **United States Congressional Serial Set, Serial No. 14848, House Reports Nos. 82-105 ,**
