

SIEM Benchmarking Process

The matrices that follow are designed as guidelines to assist readers in setting their own benchmark requirements for SIEM system testing. While this is a benchmark checklist, readers must remember that benchmarking, itself, is governed by variables specific to each organization. For a real-life example, consider an article in eSecurity Planet, in which Aurora Health in Michigan estimated that they produced 5,000–10,000 EPS, depending upon the time of day.¹ We assume that means during the normal ebbs and flow of network traffic. What would that load look like if it were under attack? How many security events would an incident, such as a virus outbreak on one, two or three subnets, produce?

An organization also needs to consider their devices. For example, a Nokia high-availability firewall is capable of handling more than 100,000 connections per second, each of which could theoretically create a security event log. This single device would seem to imply a need for 100,000 minimum EPS just for firewall logs. However, research shows that SIEM products typically handle 10,000–15,000 EPS per collector.

Common sense tells us that we should be able to handle as many events as ALL our devices could simultaneously produce as a result of a security incident. But that isn't a likely scenario, nor is it practical or necessary. Aside from the argument that no realistic scenario would involve all devices sending maximum EPS, so many events at once would create bottlenecks on the network and overload and render the SIEM collectors useless. So, it is critical to create a methodology for prioritizing event relevance during times of load so that even during a significant incident, critical event data is getting through, while ancillary events are temporarily filtered.

Speed of hardware, NICs (network interface cards), operating systems, logging configurations, network bandwidth, load balancing and many other factors must also go into benchmark requirements. One may have two identical server environments with two very different EPS requirements due to any or all of these and other variables. With consideration of these variables, EPS can be established for normal and peak usage times. We developed the equations included here, therefore, to determine Peak Events (PE) per second and to establish normal usage by exchanging the PE_n for NE_n (Normal Events per second).

List all of the devices in the environment expected to report to the SIEM. Be sure to consider any planned changes, such as adding new equipment, consolidating devices, or removing end of life equipment.

Benchmarking Security Information Event Management Sans:

Analyse sicherheitsrelevanter Geschäftsprozesse eines Anwendungsfalls aus der Finanzbranche und Ermittlung der hierfür geeigneten Methoden Peter von Oppenkowski, 2011-11-29 Inhaltsangabe Einleitung Die Informationstechnologie IT hat in den Finanzdienstleistungsbereichen schon lange einen bergreifenden Einzug erhalten und unterstützt Kunden sowie Mitarbeiter bei täglichen Routinen. Der Einsatz von mobilen und stark vernetzten IT-Systemen ist dabei in nahezu sämtlichen Geschäftsprozessen wiederzufinden und leistet als Rückgrat vieler Geschäftsmodelle einen wesentlichen Beitrag zur Erreichung der Unternehmensziele. Immer deutlicher zeigt die dabei eingesetzte IT-Infrastruktur zum wertvollen, besonders zu schätzenden Gut eines Unternehmens und ist zugleich zunehmend dem Einwirken komplexer Ereignisse resultierend aus Missbräuchen oder auch Fehlbedienungen auf sicherheitskritische Eigenschaften der Geschäftsprozesse ausgesetzt. Für die Finanzbranche entstehen auf diese Weise Schäden, die sehr vielfältig ausfallen können und dessen vorläufiger Höhepunkt sich verursacht durch einen einzelnen Fall von Computermissbrauch auf eine bedrohliche Schadenssumme von 4,9 Milliarden Euro beläuft. Der IT-Sicherheit wird damit eine enorme Bedeutung zuteil, dessen Erfolg gemessen an der Minimierung der Gefährdung des reibungslosen Geschäftsablaufs bzw. der Vermeidung wirtschaftlicher Schäden wesentlich von der effizienten Ermittlung und Bewertung von Bedrohungen und Risiken und anschließender Maßnahmen abhängt. Dem wird die Sicherheitsanalyse, deren Ergebnisse sich in den Sicherheitsanforderungen widerspiegeln, gerecht. Die allerdings aufgrund der Dynamik bei IT-Systemen bereits einen stetig wiederkehrenden Aufwand für das Unternehmen bedeutet. Zusätzlich und weitaus aufwendiger ergibt sich die Durchführung und Überwachung der aus den Anforderungen hervorgehenden Sicherheitsmaßnahmen im Tagesgeschäft. Um diesen Aufgaben Herr zu werden, bedienen sich Finanzdienstleister FDL technischer Hilfsmittel, dessen Leistungsfähigkeit einen gewichtigen Einflussfaktor auf ein optimales Verhältnis zwischen höchstmöglichem Schutz bei geringstmöglichem Arbeitsaufwand ausmacht. Zu den von den FDL genutzten technischen Hilfsmitteln zählen unter anderem Firewalls, Virens Scanner, Intrusion Detection bzw. Intrusion Protection Systeme (IDS/IPS), die im Wesentlichen sicherheitskritische Aktivitäten innerhalb eines Rechnernetzes oder Systems erkennen bzw. anzeigen und ggf. unterbinden sowie zunehmend Security Information and Event Management (SIEM) Lösungen. Letztere nehmen eine koordinierte Rolle ein, da diese auf erstgenannte aufsetzen.

The Cyber Security Network Guide

Fiedelholz, 2020-11-11 This book presents a unique step by step approach for monitoring, detecting, analyzing and mitigating complex network cyber threats. It includes updated processes in response to asymmetric threats as well as descriptions of the current tools to mitigate cyber threats. Featuring comprehensive computer science material relating to a complete network baseline with the characterization hardware and software configuration, the book also identifies potential emerging cyber threats and the vulnerabilities of the network architecture to provide students with a guide to responding to threats. The book is intended for undergraduate and graduate college students who are unfamiliar with the cyber paradigm and processes in

responding to attacks Industrial Network Security Eric D. Knapp, 2024-03-26 As the sophistication of cyber attacks increases understanding how to defend critical infrastructure systems energy production water gas and other vital systems becomes more important and heavily mandated Industrial Network Security Third Edition arms you with the knowledge you need to understand the vulnerabilities of these distributed supervisory and control systems Authors Eric Knapp and Joel Langill examine the unique protocols and applications that are the foundation of Industrial Control Systems ICS and provide clear guidelines for their protection This comprehensive reference gives you thorough understanding of the challenges facing critical infrastructures new guidelines and security measures for infrastructure protection knowledge of new and evolving security tools and pointers on SCADA protocols and security implementation worth recommendation for people who are interested in modern industry control systems security Additionally it will be advantageous for university researchers and graduate students in the network security field as well as to industry specialists in the area of ICS IEEE Communications Magazine All new real world examples of attacks against control systems such as Trisys Pipedream and more diagrams of systems Includes all new chapters on USB security and OT Cyber Kill Chains including the lifecycle of an incident response from detection to recovery Expanded coverage of network anomaly detection and Beachhead systems for extensive monitoring and detection New coverage of network spans mirrors and taps as well as asset discovery log collection and industrial focused SIEM solution Distributed Sensing and Intelligent Systems Mohamed Elhoseny, Xiaohui Yuan, Salah-dine Krit, 2022-06-27 This book is the proceeding of the 1st International Conference on Distributed Sensing and Intelligent Systems ICDSIS2020 which will be held in The National School of Applied Sciences of Agadir Ibn Zohr University Agadir Morocco on February 01 03 2020 ICDSIS2020 is co organized by Computer Vision and Intelligent Systems Lab University of North Texas USA as a scientific collaboration event with The National School of Applied Sciences of Agadir Ibn Zohr University ICDSIS2020 aims to foster students researchers academicians and industry persons in the field of Computer and Information Science Intelligent Systems and Electronics and Communication Engineering in general The volume collects contributions from leading experts around the globe with the latest insights on emerging topics and includes reviews surveys and research chapters covering all aspects of distributed sensing and intelligent systems The volume is divided into 5 key sections Distributed Sensing Applications Intelligent Systems Advanced theories and algorithms in machine learning and data mining Artificial intelligence and optimization and application to Internet of Things IoT and Cybersecurity and Secure Distributed Systems This conference proceeding is an academic book which can be read by students analysts policymakers and regulators interested in Distributed Sensing Smart Network approaches Smart Cities IoT Applications and Intelligent Applications It is written in plain and easy language and describes new concepts when they appear first so that a reader without prior background of the field finds it readable The book is primarily intended for research students in sensor networks and IoT applications including intelligent information systems and smart sensors applications academics in higher

education institutions including universities and vocational colleges policy makers and legislators **Study Guide to Secure Software Development** Cybellium, **Information Security Management with ITIL® V3** Jacques

Cazemier,Louk Peters,Paul Overbeek,1970-01-01 This groundbreaking new title looks at Information Security from defining what security measures positively support the business to implementation to maintaining the required level and anticipating required changes It covers Fundamentals of information security providing readers insight and give background about what is going to be managed Topics covered include types of security controls business benefits and the perspectives of business customers partners service providers and auditors Fundamentals of management of information security explains what information security management is about and its objectives Details are also given on implementing the process and the continuous effort required to maintain its quality ITIL V3 and Information Security Management shows the links with the other ITIL processes Shows how integrating the Information Security Management activities into existing processes and activities not only supports efficiencies but ultimately is the key way to achieve effective Information Security Management Implementing Information Security Management gives practical advice how to put Information Security Management into practice From awareness in the organization via documentation required to maturity models this guidance describes best practices for realizing Information Security Management *Study Guide to Incident Response* Cybellium,2024-10-26

Designed for professionals students and enthusiasts alike our comprehensive books empower you to stay ahead in a rapidly evolving digital world Expert Insights Our books provide deep actionable insights that bridge the gap between theory and practical application Up to Date Content Stay current with the latest advancements trends and best practices in IT AI Cybersecurity Business Economics and Science Each guide is regularly updated to reflect the newest developments and challenges Comprehensive Coverage Whether you re a beginner or an advanced learner Cybellium books cover a wide range of topics from foundational principles to specialized knowledge tailored to your level of expertise Become part of a global network of learners and professionals who trust Cybellium to guide their educational journey www.cybellium.com

Internet of Things Ovidiu Vermesan,Peter Friess,2013 Today we see the integration of Industrial Business and Consumer Internet This integration is bringing together the Internet of People Internet of Things Internet of Energy Internet of Vehicles and Internet of Media Services and Enterprises In this way it forms the backbone of the digital economy and digital society and the foundation for the future knowledge and innovation based economy in supporting solutions for the emerging challenges of public health aging population environmental protection and climate change the conservation of energy and scarce materials enhancements to safety and security and the continuation and growth of economic prosperity Penetration of smartphones and advances in machine to machine M2M and wireless communication technology will be the main drivers for Internet of Things IoT development The IoT contribution is in the increased value of information created by the number of interconnections and the transformation of the processed information into knowledge shared in the Internet of Everything

The connected devices are part of ecosystems connecting people processes data and things which are communicating in the cloud using the increased storage and computing power and pushing for standardization of communication and metadata In this context the next generation of the cloud technologies will need to be flexible enough to scale autonomously adaptive enough to handle constantly changing connections and resilient enough to stand up to the huge flows in data that will occur For 2025 analysts forecast that there will be six devices per human on the planet which means 50 billion more connected devices over the next 12 years The IoT market is connected to this growth from industrial M2M systems smart meters and wireless sensors Enabling technologies such as nanoelectronics MEMS embedded systems intelligent device management smart phones telematics smart network infrastructure cloud computing and software technologies will create new products new services and new interfaces by creating smart environments and smart spaces with applications ranging from Smart Cities smart transport buildings energy and grid to smart health and life Internet of Things provides a broad overview of various topics of the IoT from the research and development priorities to enabling technologies architecture security privacy interoperability and industrial applications It is intended to be a standalone book in a series that covers the IoT activities of the Internet of Things European Research Cluster IERC from technology to international cooperation and the global state of play The book builds on the ideas put forward by the IERC Strategic Research Agenda and presents global views and state of the art results on the challenges that the research development and deployment of IoT faces at the global level Technical topics discussed in the book include Introduction Internet of Things in a wider context Time for convergence Internet of Things Strategic Research Agenda Interconnection and Integration of the Physical World into the Digital World Scalable Architectures for IoT Applications IoT standardisation requirements and initiatives Standardisation and Innovation Service Openness and Interoperability Software define and virtualization of network resources Mobile devices enable IoT evolution from industrial applications to mass consumer applications Innovation through Interoperability and Standardisation when everything is connected anytime at anyplace

Benchmarking Security Information Event Management Sans Introduction

In the digital age, access to information has become easier than ever before. The ability to download Benchmarking Security Information Event Management Sans has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Benchmarking Security Information Event Management Sans has opened up a world of possibilities. Downloading Benchmarking Security Information Event Management Sans provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Benchmarking Security Information Event Management Sans has democratized knowledge.

Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Benchmarking Security Information Event Management Sans. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Benchmarking Security Information Event Management Sans. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites

that prioritize the legal distribution of content. When downloading Benchmarking Security Information Event Management Sans, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Benchmarking Security Information Event Management Sans has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Benchmarking Security Information Event Management Sans Books

1. Where can I buy Benchmarking Security Information Event Management Sans books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Benchmarking Security Information Event Management Sans book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Benchmarking Security Information Event Management Sans books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets:

You can create your own spreadsheet to track books read, ratings, and other details.

7. What are Benchmarking Security Information Event Management Sans audiobooks, and where can I find them?
Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Benchmarking Security Information Event Management Sans books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
