John Lobell

Between Silence And Light Spirit In The Architecture Of Louis I Kahn:

Between Silence and Light John Lobell, Louis I. Kahn, 1979 In the development of contemporary architecture few have had greater influence than Louis I Kahn whose many buildings included the Salk Institute the Yale Study Center and the Exeter Library For Kahn the study of architecture was the study of human beings their highest aspirations and most profound truths John Lobell who studied under Kahn while in architecture school sensitively edits Kahn s own words and provides commentary on Kahn s ideas and his major buildings In his work as an architect Kahn searched for beginnings the origin of joy and wonder of intelligence and intuition He sought the basic principles of being which he called Silence and Light Kahn spoke of these qualities with tremendous power and grace *Between Silence and Light* one of the few books on Kahn written for a general audience introduces us to Louis Kahn the architect and the visionary Copyright Libri GmbH All rights reserved

Between silence and light; spirit in the Architecture of Louis I. Kahn J. Lobell, 1979 *Louis I. Kahn* Glenn E.

Wiggins, 1997 This CD ROM explores a master work by some of the most influential architects of the 20th century In Exeter Library we see far more than a design that meets a program budget and constraints we learn about Louis Kahn s architectural ideology and aesthetics The completely interactive CD ROM provides the richest possible presentation of the library 48 page booklet and CD ROM **Rome and the Legacy of Louis I. Kahn** Elisabetta Barizza, Marco

Falsetti, 2018-08-15 Louis I Kahn was one of the most influential architects thinkers and teachers of his time This book examines the important relationship between his work and the city of Rome whose ancient ruins inspired in him a new design methodology Structured into two main parts the first includes personal essays and contributions from the architect s children writers and other designers on the experience and impact of his work The second part takes a detailed look at Kahn s residency in Rome its effects on his thinking and how his influence spread throughout Italy It analyses themes directly linked to his architecture through interviews with teachers and designers such as Franco Purini Paolo Portoghesi Giorgio Ciucci Lucio Valerio Barbera and the architects of the Rome Group of Architects and City Planners GRAU Rome and the Legacy of Louis I Kahn expands the current discourse on this celebrated twentieth century architect ideal for students and researchers interested in Kahn s work architectural history theory and criticism Rethinking the Forms of Visual Expression Robert

Sowers, 1990 Robert Sowers begins this book by questioning our conception of the visual arts painting sculpture and architecture as autonomous archetypal entities that can be defined independent of one another in terms of their materials and techniques He cuts through the limits of categorization we have come to accept to lay the groundwork for a coherent theory of the relation between the visual arts He proposes that we treat the pictorial the sculptural and the architectural not as palpable physical things but as activities the basic forms of visual expression employed to create such distinct artifacts as paintings statues and buildings By defining the expressive function of each art Sowers helps us to understand what we mean when we speak of the sculptural qualities of architecture or the pictorial qualities of sculpture The world of visual art then is

a structured whole a world in which the arts can meet merge with and mutually reinforce or swear at one another often in unexpected yet compelling ways *Tradition as Mediation: Louis I. Kahn* Dana Margalith, 2018-07-11 This book explores Louis I Kahn's approach to tradition as revealed in two of his important unbuilt projects Focusing on Kahn's designs for the Dominican Motherhouse of St Catherine de Ricci Media Pennsylvania 1965 1969 and the Hurva Synagogue Jerusalem Israel 1967 1974 the book challenges prevailing aesthetic and methodological assessments of Kahn's use of tradition It reveals how an authentic and critical theoretical historical and humanistic study of tradition nourished Kahn's designs enabling him to mediate historical rituals ideas and beliefs and to develop innovative designs rooted deep in human culture while addressing real modern concerns The book evaluates Kahn's works as a creative recreation and re interpretation of the past shedding light on the potential value of the meaningful consideration of tradition in modern times Louis Kahn John Lobell, 2020-06-30 For everyone interested in the enduring appeal of Louis Kahn this book demonstrates that a close look at how Kahn put his buildings together will reveal a deeply felt philosophy Louis I Kahn is one of the most influential and poetic architects of the twentieth century a figure whose appeal extends beyond the realm of specialists In this book noted Kahn expert John Lobell explores how Kahn's focus on structure respect for materials clarity of program and reverence for details come together to manifest an overall philosophy Kahn's work clearly conveys a kind of transcendent rootedness a rootedness in the fundamentals of architecture that also asks soaring questions about our experience of light and space and even how we fit into the world In *Louis Kahn Architecture as Philosophy* John Lobell seeks to reveal how Kahn's buildings speak to grand humanistic concerns Through examinations of five of Kahn's great buildings the Richards Medical Research Building in Philadelphia the Salk Institute for Biological Studies in La Jolla the Phillips Exeter Academy Library in New Hampshire the Kimbell Art Museum in Fort Worth and the Yale Center for British Art in New Haven Lobell presents a clear but detailed look at how the way these buildings are put together presents Kahn's philosophy including how Kahn wishes us to experience them An architecture book that touches on topics that addresses the universal human interests of consciousness and creativity *Louis Kahn Architecture as Philosophy* helps us understand our place and the nature of well being in the built environment **Louis I. Kahn in Rome and Venice** Elisabetta Barizza, 2021-07-22 This book examines the idea of organism in the work of Louis I Kahn from the turning point of Rome to the project for Venice It presents an original interpretation of the work of Kahn during one of the most fruitful periods of his career when he was working on a particular design method based on an entirely novel way of interacting with the past Beginning with a meticulous documentation and analysis of Kahn's experiences in the twenty years from 1930 to 1950 the book sheds new light on the relationship between Kahn's work and the modern movement The arguments are supported by case studies including that of the Palazzo dei Congressi in Venice based on Kahn's words like his lessons in Venice at IUA International University of Art in 1971 and others as the Trenton Bath House the Salk Institute La Jolla the Kimbell Museum Fort Worth the Yale Gallery and the Mellon

Center for British Art New Haven and more Unlike much of the by now well established literature on Kahn's work Louis I Kahn in Rome and Venice suggests that the basic premise of Kahn's invention is the idea of spatial constructive organism which explains how he created forms that were inextricably anchored in the past without imitating any one kind of ancient architecture The main objective of the book is to explain Kahn's methodology to architects and students showing how he was able to design an architectural object with the characteristics of the best designed objects organisms in which each part contributes with the whole to creating something made of indivisible parts Kenosis Creativity Architecture Randall S. Lindstrom, 2021-03-21 Kenosis Creativity Architecture locates and explores creativity's grounding in the ancient concept of kenosis the emptying that allows creativity to happen that makes appearance possible It concretises that grounding through architecture a primal expression of human creativity critically examining for the first time kenotic instantiations evidenced in four iconic international projects works by Kahn Pei Ando and Libeskind Then in a final turn the potentiality of architecture's own emptying is probed Architect and author Randall Lindstrom draws on Western and Eastern philosophy including that of Heidegger Levinas Derrida Vattimo Nishida and Nishitani as well as on the theology of Christianity Judaism and aspects of Buddhism Hinduism and Islam Every chapter expands the argument that if responsiveness to our world is taken seriously if proper and sustainable responses are to be realised then a deeper understanding of creativity and so kenosis is essential This book opens up a way of thinking about creativity and humanity's readiness to be creative It thereby presents a crucial enquiry at the nexus of architecture philosophy and theology for researchers graduate and postgraduate students and practitioners alike **Architecture, Power, and National Identity** Lawrence J. Vale, Professor Urban Studies and Planning Lawrence J Vale, 1992-01-01 Explores parliamentary complexes in capital cities on six continents showing how the buildings that house national government institutions are products of the political and cultural balance of power within pluralist societies Fabricating Architecture Robert Corser, 2012-03-20 In this increasingly digitized world any investigation of architecture inevitably leads to considerations of fabrication But despite its omnipresence in contemporary practice and theory digital design remains a fluid concept its development and current influence discussed in scattered articles **Thin Place Design** Phillip James Tabb, 2023-07-31 What makes the places we inhabit extraordinary Why are some urban spaces more vital and restorative Wonderful landscapes inspiring works of architecture and urban design and the numinous experiences that accompany them have been an integral dimension of our culture Up lifting spaces dramatic use of natural light harmonic proportional geometry magical landscapes historic sites and vital city centers create special even sacred moments in architecture and planning This quality of experience is often seen as an aesthetic purpose intended to inspire ennoble ensoul and spiritually renew Architecture and urban spaces functioning in this way are considered to be thin places **Theory Across Disciplines** Jeffrey R. Di Leo, 2025-08-07 Surveying the extraordinary scope of contemporary theory Jeffrey R Di Leo brings together contributors from around the world to speak to the ways in which theoretical

concerns from a variety of disciplines operate within their respective fields of concern Contemporary theory is a multi and inter disciplinary endeavour that operates within and among the humanities the social sciences and many of the professions In addition to its now somewhat more standard fare work in these areas it has also made substantial inroads into the natural sciences and the formal sciences To be sure more disciplines from across the academy have integrated theory into their practice than at any other time in history Di Leo and his fellow contributors survey the workings of contemporary theory within and among the humanities sciences and professions including contributions on literary studies film studies gender studies visual art law biology and geology They bring together distinguished theorists whose work spans the academy to speak to the ways in which theoretical concerns from a variety of disciplines work within their respective fields of concern

Design for Partnerships for Change Sandi Hilal, Merve Bedir, Mette Ramsgaard Thomsen, Martin Tamke, 2023-09-27 Architecture has played a very important role in colonization of the society and the earth and today we have the urgent task to crack the theory and practice of this same Architecture We can achieve this only by working collectively towards reframing concepts that has been at the centre of a dominant universalist western knowledge creation Rethinking and reframing the ideals of community participation commons agency design and land this book puts forward a collective effort to shift the centre of architectural thinking and practice and create as many ways possible to understand our role as architects today We acknowledge unrecognized practices by bringing back everyday life experiences different paths and forms of knowledge production and storytelling that inform our understanding of architecture The book is part of a series of six volumes that explore the agency of the built environment in relation to the SDGs through new research conducted by leading researchers The series is led by editors Mette Ramsgaard Thomsen and Martin Tamke in collaboration with the theme editors Design for Climate Adaptation Billie Faircloth and Maibritt Pedersen Zari Design for Rethinking Resources Carlo Ratti and Mette Ramsgaard Thomsen Eds Design for Resilient Communities Anna Rubbo and Juan Du Eds Design for Health Arif Hasan and Christian Benimana Eds Design for Inclusivity Magda Mostafa and Ruth Baumeister Eds Design for Partnerships for Change Sandi Hilal and Merve Bedir Eds **Architecture Re-assembled** Trevor Garnham, 2013-04-26

Beginning from the rise of modern history in the eighteenth century this book examines how changing ideas in the discipline of history itself has affected architecture from the beginning of modernity up to the present day It reflects upon history in order to encourage and assist the reader in finding well founded principles for architectural design This is not simply another history of architecture nor a history of histories Setting buildings in their contemporaneous ideas about history it spans from Fischer von Erlach to Venturi and Rossi and beyond to architects working in the fallout from both the Modern Movement Aalto Louis Kahn Aldo van Eyck and Post modernism such as Rafael Moneo and Peter Zumthor It shows how Soane Schinkel and Stirling amongst others made a meaningful use of history and contrasts this with how a misreading of Hegel has led to an abuse of history and an uncritical flight to the future This is not an armchair history but a lively discussion of our place

between past and future that promotes thinking for making Crafting the Considerate House David Gerstel,2010 Crafting the Considerate House tells the story of designing and building a home for our times one that is mindful of both environmental and dollar costs yet responsive to our needs and wants In his fast moving narrative David Gerstel a highly skilled builder and an author with several admired books that have enjoyed strong sales for decades to his credit involves the reader in the challenge and excitement of creating a house that is highly energy efficient healthy and a pleasure to live in You experience the project up close from the first imaginings through the final construction of interior finishes You meet and share in the camaraderie of the remarkable craftspeople who worked alongside the author Even as you are entertained by the lively and thoughtful chronicle you are educated in the crafting of a sturdy dollarwise and striking home **Reading**

Architecture and Culture Adam Sharr,2012 Architecture displays the values involved in its inhabitation construction procurement and design It traces the thinking of the individuals who have participated in it their relationships and their involvement in the cultures where they lived and worked In this way buildings their details and the documents used to make them can be read closely for cultural insights Introducing the idea of reading buildings as cultural artefacts this book presents perceptive readings by eminent writers which demonstrate the power of this approach The chapters show that close readings of architecture and its materials can test commonplace assumptions help architects to appreciate the contexts in which they work and indicate ways to think more astutely about design The readings collected in this innovative and accessible book address buildings specifications and photographs They range in time from the fifteenth century examining the only surviving drawing made by Leon Battista Alberti to the recent past projects completed by Norman Foster in 2006 and Herzog and De Meuron in 2008 They range geographically from France to Puerto Rico to Kazakhstan and they range in fame from buildings celebrated by critics to house extensions and motorway service areas Taken together these essays demonstrate important research methods which yield powerful insights for designers critics and historians and lessons for students **A Place of My Own** Michael Pollan,2013-03-06 A captivating personal inquiry into the art of architecture the craft of building and the meaning of modern work A room of one s own Is there anybody who hasn t at one time or another wished for such a place hasn t turned those soft words over until they d assumed a habitable shape When Michael Pollan decided to plant a garden the result was the acclaimed bestseller Second Nature In A Place of My Own he turns his sharp insight to the craft of building as he recounts the process of designing and constructing a small one room structure on his rural Connecticut property a place in which he hoped to read write and daydream built with his own two unhandy hands Invoking the titans of architecture literature and philosophy from Vitruvius to Thoreau from the Chinese masters of feng shui to the revolutionary Frank Lloyd Wright Pollan brilliantly chronicles a realm of blueprints joints and trusses as he peers into the ephemeral nature of houseness itself From the spark of an idea to the search for a perfect site to the raising of a ridgepole Pollan revels in the infinitely detailed complex process of creating a finished structure At once superbly written

informative and enormously entertaining A Place of My Own is for anyone who has ever wondered how the walls around us take shape and how we might shape them ourselves Praise for A Place of My Own A glorious piece of prose Pollan leads readers on his adventure with humor and grace Chicago Tribune Pollan alternates between describing the building process and introducing informative asides on various aspects of construction These explanations are deftly and economically supplied Pollan s beginner status serves him well for he asks the kind of obvious questions about building that most readers will want answered The New York Review of Books By shrewdly combining just the right mix of personal reflection architectural background and nuts and bolts detail Michael Pollan enables us to see feel and understand what goes into the building of a house The result is a captivating and informative adventure John Berendt author of Midnight in the Garden of Good and Evil An utterly terrific book an inspired meditation on the complex relationship between space the human body and the human spirit Francine du Plessix Gray A tour de force Phillip Lopate

Christian Norberg-Schulz's Interpretation of Heidegger's Philosophy Hendrik Aret, 2018-10-03 Christian Norberg Schulz s Interpretation of Heidegger s Philosophy investigates the theoretical contribution of the world renowned Norwegian architectural theorist Christian Norberg Schulz 1926 2000 and considers his architectural interpretation of the writings of German philosopher Martin Heidegger Though widely recognised as providing the most comprehensive reading of Heideggerian philosophy through the lens of architecture this book argues that Norberg Schulz neglected one of the key aspects of the philosopher s contributions the temporal nature of being in the world as care The undeveloped architectural implications of the ontological concept of care in his work prevented the fruition of his ultimate aim transforming the art of place into an art of living This book seeks to realign Norberg Schulz s understanding of time as continuity and change to present a holistic approach grounded in Heidegger s phenomenological philosophy architecture as art of care Aimed at academics and scholars in architectural theory history and philosophy Christian Norberg Schulz s Interpretation of Heidegger s Philosophy surveys the implications and significance of the theorist s works on architectural criticism in the late 20th century

Confabulations : Storytelling in Architecture Paul Emmons, Marcia F. Feuerstein, Carolina Dayer, 2016-12-19 Confabulation is a drawing together through storytelling Fundamental to our perception memory and thought is the way we join fractured experiences to construct a narrative Confabulations Storytelling in Architecture weaves together poetic ideas objects and events and returns you to everyday experiences of life through juxtapositions with dreams fantasies and hypotheticals It follows the intellectual and creative framework of architectural cosmopoesis developed and practiced by the distinguished thinker architect and professor Dr Marco Frascari who thought deeply about the role of storytelling in architecture Bringing together a collection of 24 essays from a diverse and respected group of scholars this book presents the convergence of architecture and storytelling across a broad temporal geographic and cultural range Beginning with an introduction framing the topic the book is organized along a continuous thread structured around four key areas architecture of stories stories of architecture stories of theory and

practice of stories Beautifully illustrated throughout and including a 64 page full colour section Confabulations is an insightful investigation into architectural narratives
