Beyond Freedom And Dignity Bf Skinner:

Beyond Freedom and Dignity B. F. Skinner, 2002-03-15 In this profound and profoundly controversial work a landmark of 20th century thought originally published in 1971 B F Skinner makes his definitive statement about humankind and society Insisting that the problems of the world today can be solved only by dealing much more effectively with human behavior Skinner argues that our traditional concepts of freedom and dignity must be sharply revised They have played an important historical role in our struggle against many kinds of tyranny he acknowledges but they are now responsible for the futile defense of a presumed free and autonomous individual they are perpetuating our use of punishment and blocking the development of more effective cultural practices Basing his arguments on the massive results of the experimental analysis of behavior he pioneered Skinner rejects traditional explanations of behavior in terms of states of mind feelings and other mental attributes in favor of explanations to be sought in the interaction between genetic endowment and personal history He argues that instead of promoting freedom and dignity as personal attributes we should direct our attention to the physical and social environments in which people live It is the environment rather than humankind itself that must be changed if the traditional goals of the struggle for freedom and dignity are to be reached Beyond Freedom and Dignity urges us to reexamine the ideals we have taken for granted and to consider the possibility of a radically behaviorist approach to human problems one that has appeared to some incompatible with those ideals but which envisions the building of a world in which humankind can attain its greatest possible achievements Beyond Freedom and Dignity Burrhus Frederic Skinner, 1971

Threads of Life Richard Freadman, 2001-02 Many autobiographers share profound questions about human life with their readers: questions like "To what extent was my life imposed on me?" "To what extent did I bring it about through particular choices and actions through the activity of my own will?" Indeed, the issue of the will is central to autobiographical writing, and some of the greatest autobiographies give extended consideration to the will: its nature, its powers, its limitations, the forms of freedom, constraint, and expression it finds in various cultures, its role in particular human lives. In this new study, unprecedented in subject and scope, Richard Freadman offers the first sustained account of how changing theological, philosophical, and psychological accounts of the human will have been reflected in the writing of autobiography, and of how autobiography in its turn has helped shape various understandings of the will. Early chapters trace narrative representations of the will from antiquity, the Greeks, and Augustine to postmodernism, Derrida, and Barthes, with particular emphasis on late modernity's culture of the will. Later chapters then present detailed and powerfully original readings of autobiographical texts by Louis Althusser, Roland Barthes, B. F. Skinner, Ernest Hemingway, Simone de Beauvoir, Arthur Koestler, Stephen Spender, and Diana Trilling. Freadman's interdisciplinary approach to autobiography and the will includes a theoretical defense of the view that autobiographers are, in varying degrees, agents in their own texts. Threads of Life argues that late modernity has inherited deeply conflicted attitudes to the will. Freadman suggests that these attitudes, now deeply embedded in contemporary cultural discourse, need reexamining. In this, he contends, reflective autobiography has an important part to play.

Brainstorms, Fortieth Anniversary Edition Daniel C. Dennett, 2017-12-15 An anniversary edition of a classic in cognitive science with a new introduction by the author. When Brainstorms was published in 1978, the interdisciplinary field of cognitive science was just emerging. Daniel Dennett was a young scholar who wanted to get philosophers out of their armchairs and into conversations with psychologists, linguists, computer scientists. This collection of seventeen essays by Dennett offers a comprehensive theory of mind encompassing traditional issues of consciousness and free will. Using careful arguments and ingenious thought experiments, the author exposes familiar preconceptions and hobbling intuitions. The essays are grouped into four sections: Intentional Explanation and Attributions of Mentality; The Nature of Theory in Psychology; Objects of Consciousness and the Nature of Experience; and Free Will and Personhood. This anniversary edition includes a new introduction by Dennett, Reflections on Brainstorms after Forty Years, in which he recalls the book's original publication by Harry and Betty Stanton of Bradford Books and considers the influence and afterlife of some of the essays. For example, Mechanism and Responsibility was Dennett's first articulation

Cooper, Religious Thought and the Modern Psychologies has pioneered the broader and deeper critique of psychological theories and practice Informed by hermeneutical theory Browning s widely acclaimed work drew much needed attention to the ethical and metaphysical even religious assumptions that underlie present day psychology It has been deeply influential in many social sciences in addition to the fields of pastoral counseling and practical theology In this much needed second edition Browning and his new co author show how the field of social science has indeed grasped and appropriated the hermeneutical approach though with only slight appreciation of the religious dimensions of the social scientific endeavor Browning and Cooper provide a completely new first chapter newly situating the discussion and update the core chapters of the book They also add two new chapters carrying the dialogue on with three new psychotherapeutic theorists then with new evangelical writers on the relation of theology and psychology This new edition like its predecessor will set the stage for the religion psychology dialogue for years to come *Zeitschrift für Medienwissenschaft* 32 Gesellschaft für

The Morals of Life Davide Tarizzo, 2024-08-06 A theory of biopolitical power that updates Foucault illustrating the moral implications of modern evolutionary theory In our day the individual has become a life the singular of the plural noun population From this new understanding of what it means to be human comes a new form of biopolitical power with a new set of moral rules In The Morals of Life moral philosopher Davide Tarizzo presents a theoretical framework for understanding this transformation of the old fashioned government of living beings as Michel Foucault characterized biopolitics into a new government of modular living beings as well as a template for making sense of biopolitical power that operates on the scale of populations rather than individuals Tarizzo traces population thinking the notion of modular optimization and other conceptual keystones of the current biopolitical regime an ethopolitical regime in the author's terms to their origins in twentieth century biological thought more precisely and critically evolutionary theory Neo Darwinism Tarizzo argues should be seen not only as a scientific paradigm but also as a philosophy per se because it is evolutionary theory that today provides an answer to the old philosophical question What is man This new kind of philosophy his book suggests largely determines the way in which people look at themselves and society Not only does it contribute to designing new technologies of power but it also fosters subjection to the new ethopolitical regime

The Age of Surveillance Capitalism Shoshana Zuboff, 2019-01-31 THE TOP 10 SUNDAY TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF THE YEAR ONE OF BARACK OBAMA'S TOP BOOKS OF THE YEAR Shortlisted for The Orwell Prize 2020 Shortlisted for the FT Business Book of the Year Award 2019 Easily the most important book to be published this century I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas Zadie Smith The Guardian The challenges to humanity posed by the digital future the first detailed examination of the unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control us The heady optimism of the Internet's early days is gone Technologies that were meant to liberate us have deepened inequality and stoked divisions Tech companies gather our information online and sell it to the highest bidder whether government or retailer Profits now depend not only on predicting our behaviour but modifying it too How will this fusion of capitalism and the digital shape our values and define our future Shoshana Zuboff shows that we are at a crossroads We still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century Our choices allow technology to enrich

the few and impoverish the many or harness it and distribute its benefits The Age of Surveillance Capitalism is a deeply reasoned examination of the threat of unprecedented power free from democratic oversight As it explores this new capitalism's impact on society politics business and technology it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization Most critically it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves Contemporary Issues in Behavior Therapy

Joseph R. Cautela, Waris Ishaq, 2013-11-21 Contemporary Issues in Behavior Therapy presents innovative approaches to various societal problems worldwide Contributors explore issues from diverse areas such as behavioral medicine education developmental disability poverty problematic behavior and developmental considerations ie early family experiences and aging process The volume stimulates ideas for research prevention and treatment as well as for managing other modern ills including homelessness crime and aggression *Teaching Machines* Audrey Watters, 2023-02-07

How ed tech was born Twentieth century teaching machines from Sidney Pressey's mechanized test giver to B F Skinner's behaviorist bell ringing box Contrary to popular belief ed tech did not begin with videos on the internet The idea of technology that would allow students to go at their own pace did not originate in Silicon Valley In Teaching Machines education writer Audrey Watters offers a lively history of predigital educational technology from Sidney Pressey's mechanized positive reinforcement provider to B F Skinner's behaviorist bell ringing box Watters shows that these machines and the pedagogy that accompanied them sprang from ideas bite sized content individualized instruction that had legs and were later picked up by textbook publishers and early advocates for computerized learning Watters pays particular attention to the role of the media newspapers magazines television and film in shaping people's perceptions of teaching machines as well as the psychological theories underpinning them She considers these machines in the context of education reform the political reverberations of Sputnik and the rise of the testing and textbook industries She chronicles Skinner's attempts to bring his teaching machines to market culminating in the famous behaviorist's efforts to launch Didak 101 the pre verbal machine that taught spelling Alternate names proposed by Skinner include Autodidak Instructomat and Autostructor Telling these somewhat cautionary tales Watters challenges what she calls the teleology of ed tech the idea that not only is computerized education inevitable but technological progress is the sole driver of events *The Human Being* Hans Schwarz, 2013-12-20

This overview of Christian anthropology by Hans Schwarz uniquely emphasizes three things 1 the biblical testimony 2 the historical unfolding of Christian anthropology through the centuries and 3 the present affirmation of Christian anthropology in view of rival options and current scientific evidence Schwarz begins by elucidating the special place occupied by human beings in the world then ponders the complex issue of human freedom and concludes by investigating humanity as a community of men and women in this world and in the world beyond While maintaining a strong biblical orientation Schwarz draws on a wide range of resources including philosophy and the natural sciences in order to map out what it means to be human Schwarz's

Libertarianism Defended Tibor R. Machan, 2021-08-29 Ever since the publication in 1974 of Robert Nozick's *Anarchy, State and Utopia* libertarianism has been much discussed within political philosophy science and economy circles Yet libertarianism has been so strongly identified with Nozick's version of it that little attention has been devoted to other than Nozick's ideas and arguments While Nozick's version of libertarianism has preoccupied the academic discussion Nozick himself did not respond to the many criticisms raised and yet other defenders of libertarianism have not remained silent Jan Narveson Loren Lomasky Eric Mack Douglas Rasmussen Douglas Den Uyl and many others have contributed impressive arguments of their own in support of the libertarian idea that a political system is just when it successfully secures the rights of individuals understood within the Lockean classical liberal tradition In this book Tibor R Machan analyses the state of the debate on libertarianism post Nozick Going far beyond the often cursory treatment of libertarianism in major books and other publications he examines closely the alternative non Nozickian defenses of libertarianism that have been advanced and by applying these arguments to innumerable policy areas in the field Machan achieves a new visibility and prominence for libertarianism
