## History of Basketball

### ***Basketball:***

A game played with a round leather-covered ball by two teams on a rectangular court. *James A. Naismith* invented basketball in **1891**. Naismith was a physical education teacher at the International YMCA Training School (now Springfield College) in Springfield, Massachusetts. He was asked by the school to create a team sport that could be played indoors during the winter.

At first two *wooden peach baskets* were chosen as goals. They were hung at each end of the gymnasium. A soccer ball was selected and play was begun with seven, eight, and sometimes nine men on each side. The game was started, as it is today, by having a referee toss the ball up at midcourt between two players from opposing sides. The sport proved an immediate success with players. The *peach baskets* were quickly replaced by metal ones and, **1906**, by open hoops of the kind used today. *Backboards* were introduced to keep over enthusiastic spectators from interfering with the ball.

Basketball spread rapidly across the United States and was being played by many YMCA groups, high schools, colleges, and semi-professional and professional teams. Naismith published his *13 original rules* in the YMCA Training School newspaper. But many groups established their own rules and were still playing by them as late as **1915**. This led to confusion, and for several years basketball was an undisciplined game without uniform interpretation. Not until late in 1915 did the *National Collegiate Athletic Association* and the *Amateur Athletic Union* get together and form the Joint Basketball Rules Committee. This committee through the years **1915-1934** developed a standard set of basketball rules.

The object of the game is to score more points than your opponents. The development of scoring opportunities is the ability to perform the basic fundamental skills to get the ball into position where shooting percentages are the highest. To do this players must be skillful shooters, and they must be able to move skillfully without the basketball. When a player is not shooting and has the ball, he must cut through the lane, fake, and set screens. All of these fundamentals are necessary to get the best possible percentage shot. One of the most important fundamentals of basketball is the defense each team plays. If players work hard on defense and keep the other player and team from scoring, then the offense does not have to score as many points. This gives a chance to teams that are not so skillful offensively but have the determination to work hard on defense.
