of critical philosophy that has been written from within the business school in order to examine how this sheltered process of educating in role corporate executives operates Thompson claims that executive education is based on a very simple premise that an executive executes an order and that executive education is an amelioration of that process Thompson argues that the easiest way to conceive of executive education is to treat order and execution as cognates as a single conceptual entity Thus he asks if educating executives in line with the order execution cognate involves swapping the boardroom for the classroom and in keeping with the critical tag shouldn't executive education be about questioning not only the execution but also the dominant order The author uses time as the philosophical method by which one can undo the order execution cognate question the sanctity of the cognate and thereby halt the seemingly inexorable temporal sequence from order through to those orders becoming executed This book uses Martin Heidegger's exotic philosophy of time in order to mount a philosophical challenge to the temporal sequentiality of executive education It will therefore be of great interest to academics researchers and postgraduates who are interested in Heidegger the philosophy of education and executive education It should also be essential reading for those involved in training developing and educating corporate executives

**Kierkegaard on Dialogical Education** Anna Strelis Soderquist, 2016-07-14 Kierkegaard on Dialogical Education Vulnerable Freedom examines a unique conception of freedom that underscores the productive role of human vulnerability as found in the work of Søren Kierkegaard Anna Strelis Soderquist uncovers Kierkegaard's method of indirect communication as a formative and dialogical approach to education that guides a person in becoming not only free and independent but also receptive and empathetic This approach bestows upon a human being the dignity that comes from being both capable and humble It emphasizes the need for trust and courage alike in our dialogical relations freeing us to receive and respond to the other both in our need and through our own choosing Freedom's secret is that it is at the same time self-empowered and vulnerable self-giving and receptive independent and dependent Kierkegaard's method in both form and content hinges upon the narrativity of human experience No human being is immune to the
