The Palgrave Companion to MIT Economics Robert A. Cord, 2025-07-10 The Massachusetts Institute of Technology

has been and continues to be one of the most important global centres for economics With four chapters on themes in MIT economics and 38 chapters on the lives and work of MIT economists this book shows how economics became established at the Institute how it produced some of the world's best known economists including Paul Samuelson Franco Modigliani and Robert Solow and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of MIT economics

World Development Report 2015 World Bank, 2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberately and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The World Development Report 2015 offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community

Economic Efficiency Ben Van Rompuy, 2012-08-01 Over the past decade we have witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement Antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare Recent EU Commission Guidelines on the application of Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public

health and consumer protection from the application of Article 101 TFEU Arguing that the professed adoption of an exclusive efficiency approach to Article 101 TFEU does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in EU and US antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of Article 101 TFEU could and should be under the modernized enforcement regime *Law and Economics for Civil Law Systems* Mackaay, Ejan,2021-11-18 This second edition of Law and Economics for Civil Law Systems substantially updates a unique work that presents the core ideas of law and economics for audiences primarily familiar with civil law systems

Democracy and the Cartelization of Political Parties Richard S. Katz, Peter Mair, 2018-07-11 Political parties have long been recognized as essential institutions of democratic governance Both the organization of parties and their relationships with citizens the state and each other have evolved since the rise of liberal democracy in the 19th and early 20th centuries Going into the 21st century it appears that parties losing popular support putting both parties and potentially democracy in peril This book traces the evolution of parties from the model of the mass party through the catch all party model to argue that by the late 20th century the principal governing parties and their allied smaller parties collectively the political mainstream were effectively forming a cartel in which the form of competition might remain and indeed even appear to intensify while its substance was increasingly hollowed out The spoils of office were increasingly shared rather than restricted to the temporary winners contentious policy questions were kept off the political agenda and competition shifted from large questions of policy to minor questions of managerial competence To support this cartel the internal arrangements of parties changed to privilege the party in public office over the party on the ground The unintended consequence has been to stimulate the rise of extra cartel challengers to these cozy arrangements in the form of anti party system parties and populist oppositions on the left but especially on the right Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow John and Rebecca Moores Professor of Political Science University of Houston
