## **Between Mackinder And Spykman Geopolitics Containment:**

*Raumdeutungen* Sabine Feiner, Karl G. Kick, Stefan Krauss, 2001      *Weltordnung durch US-Leadership?* Sabine Feiner, 2013-10-05 Die Rolle der einzigen Supermacht USA bei der Gestaltung einer neuen Weltordnung ist seit Beginn der neunziger Jahre Gegenstand einer kontroversen Debatte Diese Studie befaßt sich mit der Konzeption von Zbigniew K Brzezinski der in einer aktiven amerikanischen Führungsrolle die maßgebliche Voraussetzung für die Entstehung einer globalen Ordnung erkennt Der ehemalige Nationale Sicherheitsberater zählt seit fast dreißig Jahren zu den prominentesten Kommentatoren amerikanischer Weltpolitik Seine Einschätzungen werden in der vorliegenden Arbeit diskutiert und in ihrem theoretischen Kontext analysiert Dabei stehen die machtpolitischen und ideologischen Voraussetzungen die Möglichkeit internationaler Akzeptanz und die geopolitische Umsetzung von Weltführung im Mittelpunkt Am Ende steht die Frage inwieweit Brzezinskis Konzeption als eine allgemeine Strategie für eine zukünftige Weltordnung gelten kann      Great Powers and Geopolitical Change Jakub J. Grygiel, 2007-02-01 Named by Foreign Affairs as a book to read on geopolitics In an era of high technology and instant communication the role of geography in the formation of strategy and politics in international relations can be undervalued But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns Here political scientist Jakub J Grygiel brings to light the importance of incorporating geography into grand strategy He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication Grygiel examines case studies of Venice the Ottoman Empire and China in the global fifteenth century all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered The location of resources the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers Grygiel asserts that though many other aspects of foreign policy have changed throughout history strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena      *The Foreign Policy of Modern Turkey* Ozgur Tufekci, 2017-01-30 In the last three decades Turkey has attempted to build close relationships with Russia Iran and the Turkic World As a result there has been ongoing debate about the extent to which Turkey's international relations axis is shifting eastwards Ozgur Tufekci argues that Eurasianist ideology has been fundamental to Turkish foreign policy and continues to have influence today The author first explores the historical roots of Eurasianism in the 19th century comparing this to Neo Eurasianism and Pan Slavism The Ozal era 1983 1993 the Cem era 1997 2002 and Davutoglu era since 2003 are then examined to reveal how foreign policy making has been informed by discourses of Eurasianism and how Eurasianist ideas were implemented through internal and external socio economic and political factors      **Space Strategy and Military Doctrine** Bert Chapman, 2025-07-24 Examining open access civilian and military space policy strategy and doctrine documents this book highlights emerging trends and

developments in military space strategy Bert Chapman collects public documents from Australia Canada the European Union NATO the United States and the United Kingdom from 2017 onward to illustrate space s critical importance to national and international security and to multiple areas of civilian economic and personal use including climate change food security personal and global communications and the potential for expanded space exploration In light of recent revelations that Russia may be capable and desirous of exploding nuclear weapons in space to damage civilian and military space based infrastructures of the U S and other countries and China s increasing space assertiveness and capabilities it is more important than ever that civilian readers have the access and background knowledge necessary to parse publicly available documents relating to space strategy so that they may effectively participate in the legislative and regulatory policymaking processes of their governments

**The Struggle for the Eurasian Borderlands** Alfred J. Rieber,2014-03-20 A major new account of the Eurasian borderlands as shatter zones which have generated some of the world s most significant conflicts

Eurasian Politics: Ideas, Institutions and External Relations Mr Tulsiram,Mr Ajay Patnaik,2013-06-15 The transitional politics of Eurasian space is marked by a constant struggle among three sets of ideas and institutions the 1 is the remarkable resilience of Soviet ideas and institutions 2 an attempt by the regimes of these states to reinvent the historical and cultural traditions of preSoviet periods and third is an attempt by a section of the powerful elite to superimpose Western liberal ideas and institutions There is a strange intertwining of these ideas and institutions This book examines the extent to which the postSoviet politics has departed from the Soviet one What are the new ideational structures emerging in these states and how far have they crystallised into institutions What are the external influences which are shaping the institutions in the Eurasian space And finally what are the various dynamics of geopolitics in this region Experts from various countries will delve into the shifting dynamics of Eurasian politics

**The Revenge of Geography** Robert D. Kaplan,2012-09-11 NEW YORK TIMES BESTSELLER In this ambitious and challenging The New York Review of Books work the bestselling author of Monsoon and Balkan Ghosts offers a revelatory prism through which to view global upheavals and to understand what lies ahead for continents and countries around the world In The Revenge of Geography Robert D Kaplan builds on the insights discoveries and theories of great geographers and geopolitical thinkers of the near and distant past to look back at critical pivots in history and then to look forward at the evolving global scene Kaplan traces the history of the world s hot spots by examining their climates topographies and proximities to other embattled lands The Russian steppe s pitiless climate and limited vegetation bred hard and cruel men bent on destruction for example while Nazi geopoliticians distorted geopolitics entirely calculating that space on the globe used by the British Empire and the Soviet Union could be swallowed by a greater German homeland Kaplan then applies the lessons learned to the present crises in Europe Russia China the Indian subcontinent Turkey Iran and the Arab Middle East The result is a holistic interpretation of

the next cycle of conflict throughout Eurasia Remarkably the future can be understood in the context of temperature land allotment and other physical certainties China able to feed only 23 percent of its people from land that is only 7 percent arable has sought energy minerals and metals from such brutal regimes as Burma Iran and Zimbabwe putting it in moral conflict with the United States Afghanistan's porous borders will keep it the principal invasion route into India and a vital rear base for Pakistan India's main enemy Iran will exploit the advantage of being the only country that straddles both energy producing areas of the Persian Gulf and the Caspian Sea Finally Kaplan posits that the United States might rue engaging in far flung conflicts with Iraq and Afghanistan rather than tending to its direct neighbor Mexico which is on the verge of becoming a semifailed state due to drug cartel carnage A brilliant rebuttal to thinkers who suggest that globalism will trump geography this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms *Walling, Boundaries and Liminality* Agnes Horvath, Marius Ion Bența, Joan Davison, 2018-08-06

Contemporary challenges related to walls borders and encirclement such as migration integration and endemic historical conflicts can only be understood properly from a long term perspective This book seeks to go beyond conventional definitions of the long dur e by locating the social practice of walling and encirclement in the broadest context of human history integrating insights from archaeology and anthropology Such an approach far from being simply academic has crucial contemporary relevance as its focus on origins helps to locate the essential dynamics of this practice and provides a rare external position from which to view the phenomenon as a transformative exercise with the area walled serving as an artificial womb or matrix The modern world with its ingrained ideas of borders nation states and other entities often makes it very difficult to gain a critical distance and detachment to see beyond conventional perspectives The unique approach of this book offers an antidote to this problem Cases discussed in the book range from Palaeolithic caves the ancient walls of G bekli Tepe Jericho and Babylon to the foundation of Rome the Chinese Empire medieval Europe and the Berlin Wall The book also looks at contemporary developments such as the Palestinian wall Eastern and Southern European examples Trump's proposed Mexican wall the use of Greece as a bulwark containing migration flows and the transformative experience of voluntary work in a Calcutta hospice In doing so the book offers a political anthropology of one of the most fundamental yet perennially problematic human practices the constructing of walls As such it will appeal to scholars of sociology anthropology and political theory **The Wiley-Blackwell Companion to Human Geography** John A. Agnew, James S.

Duncan, 2011-03-01 This volume provides an up to date authoritative synthesis of the discipline of human geography Unparalleled in scope the companion offers an indispensable overview to the field representing both historical and contemporary perspectives Edited and written by the world's leading authorities in the discipline Divided into three major sections Foundations the history of human geography from Ancient Greece to the late nineteenth century The Classics the roots of modern human geography Contemporary Approaches current issues and themes in human geography Each

contemporary issue is examined by two contributors offering distinctive perspectives on the same theme *The Return of Eurasia* Glenn Diesen, Alexander Lukin, 2021-07-23 This book defines Eurasianism a political idea with a long tradition for a new century Historically Eurasia was depicted as a third continent with a geographical and historical space distinctively different from both Europe and Asia Today the concept is mobilized by the Russian foreign policy elite to imagine a close relationship with China and indirectly inspires the Chinese Belt and Road Initiative A Russian Chinese partnership forms the core of a new Eurasian region yet Turkey India Hungary Central Asia and the other parts of the supercontinent are also embracing Eurasian concepts This book is of interest to scholars of Russian and Chinese foreign policy to economists and to scholars of political thought

**The Emergence of Globalism** Or Rosenboim, 2017-03-28 How competing visions of world order in the 1940s gave rise to the modern concept of globalism During and after the Second World War public intellectuals in Britain and the United States grappled with concerns about the future of democracy the prospects of liberty and the decline of the imperial system Without using the term globalization they identified a shift toward technological economic cultural and political interconnectedness and developed a globalist ideology to reflect this new postwar reality The Emergence of Globalism examines the competing

visions of world order that shaped these debates and led to the development of globalism as a modern political concept. Shedding critical light on this neglected chapter in the history of political thought, Or Rosenboim describes how a transnational network of globalist thinkers emerged from the traumas of war and expatriation in the 1940s and how their ideas drew widely from political philosophy, geopolitics, economics, imperial thought, constitutional law, theology, and philosophy of science. She presents compelling portraits of Raymond Aron, Owen Lattimore, Lionel Robbins, Barbara Wootton, Friedrich Hayek, Lionel Curtis, Richard McKeon, Michael Polanyi, Lewis Mumford, Jacques Maritain, Reinhold Niebuhr, H. G. Wells, and others. Rosenboim shows how the globalist debate they embarked on sought to balance the tensions between a growing recognition of pluralism on the one hand and an appreciation of the unity of humankind on the other. An engaging look at the ideas that have shaped today's world, *The Emergence of Globalism* is a major work of intellectual history that is certain to fundamentally transform our understanding of the globalist ideal and its origins.

### **Indo-Pacific Strategies**

Brendon J. Cannon, Kei Hakata, 2022-01-14. This book focuses on the Indo-Pacific region's growing prominence as the world's major powers gravitate toward this space to expand their influence. With dynamic shifts taking place in the globe's most strategically volatile region, *Indo-Pacific Strategies* aims at clarifying the geopolitics of the Indo-Pacific, expounded both as a strategic concept and nascent region, thus contributing to the burgeoning policy and academic debate. The book offers indispensable insights and appropriate remedies to maintain the rules-based international order as threatened by China's increasingly assertive and bellicose posturing. It offers up-to-date analyses of COVID-19 related geopolitical trends, the strategies of various Indo-Pacific states against the backdrop of great power competition, the increasingly confrontational stance of Indo-Pacific states against China, and the 2020 US election results. This unique book presents deep insights into the roles of Eurasia, small island states, the Middle East, and Africa, in addition to Australia, India, Japan, and the US, thereby providing much-needed comparative studies. It also closely investigates the strategic and tactical operationalization of the Indo-Pacific, making it an essential read for scholars, policymakers, students, and strategists in the field of international politics and Area Studies. Excerpt from the foreword by ABE Shinzō, former Prime Minister of Japan: "I think this book is the timeliest attempt to bring together the wisdom of eleven people to present a multifaceted view of the FOIP (Free and Open Indo-Pacific)." As a reader, I would like to express my gratitude to the editors and contributors for their valuable intellectual contributions. See the preview function on this website to access the full text.

### **The Geopolitics of Regional Power**

Sören Scholvin, 2016-03-09. In the last two decades, various states from the Global South have emerged as important players in international relations. Most popular among them is China. Brazil, India, and South Africa have also taken essential roles in global and regional politics. Compared to traditional great powers, they can be labelled regional great powers or regional powers because their influence is, with the exception of China, concentrated on their neighbourhood. The impact of regions, meaning the impact of geography on the economics and politics of regional powers, is surprisingly understudied. This book

analyses how geographical conditions influence the regional economics and politics of South Africa allowing the author to delineate its region of influence      *The Geopolitics of Resource Wars* Philippe Le Billon, 2017-09-19 This new book provides fresh and in depth perspectives on so called resource wars Highlighting the multiple forms of violence accompanying the history of resources exploitation business practices supporting predatory regimes insurgent groups and terrorists this is an authoritative guide to the struggle for control of the world s resources It includes key conceptual chapters and covers a wide range of case studies including the geopolitics of oil control in the Middle East Central Asia and Columbia spaces of governance and petro violence in Nigeria blood diamonds and other minerals associated with conflicts in Sierra Leone and the Congo This book was previously published as a special issue of the journal Geopolitics
