*Origin Story* David Christian, 2018-05-22 This New York Times bestseller elegantly weaves evidence and insights into a single accessible historical narrative Bill Gates and presents a captivating history of the universe from the Big Bang to dinosaurs to mass globalization and beyond Most historians study the smallest slivers of time emphasizing specific dates individuals and documents But what would it look like to study the whole of history from the big bang through the present day and even into the remote future How would looking at the full span of time change the way we perceive the universe the earth and our very existence These were the questions David Christian set out to answer when he

created the field of Big History the most exciting new approach to understanding where we have been where we are and where we are going In Origin Story Christian takes readers on a wild ride through the entire 13.8 billion years we've come to know as history By focusing on defining events thresholds major trends and profound questions about our origins Christian exposes the hidden threads that tie everything together from the creation of the planet to the advent of agriculture nuclear war and beyond With stunning insights into the origin of the universe the beginning of life the emergence of humans and what the future might bring Origin Story boldly reframes our place in the cosmos

Obsession der Gegenwart Alexander C.T. Geppert, Till Kössler, 2015-10-28 Time is an obsession of the present yet current debates seem largely unaware of its historical formation throughout the twentieth century Given a century characterized by frequent ruptures and supersessions of competing temporal regimes it is remarkable that time has not played a more central role in its historicisation neither as analytical category nor thematic research subject The nine articles in this special issue set in Germany England Spain and Japan pursue both perspectives On the one hand they examine the conceptual role function and importance of time in and for the writing of history on the other they analyse changing regimes and historicity and the transformation of time practices empirically Criticising established standard narratives of a global standardization of time or its relentless acceleration this volume rather emphasizes the pluritemporality of the twentieth century and foregrounds the historical preconditions of our digitally driven present day simultaneities Thus it explores the possibilities of the historicisation of time as a fundamental category for thinking the twentieth century and offers a building block for a new time history

**How the Biosphere Works** Fred Spier, 2022-04-25 How the Biosphere Works Fresh Views Discovered While Growing Peppers offers a simple and novel theoretical approach to understanding the history of the biosphere including humanity's place within it It also helps to clarify what the possibilities and limitations are for future action This is a subject of wide interest because today we are facing a great many environmental issues many of which may appear unconnected Yet all these issues are part of our biosphere For making plans for the future and addressing our long term survival and well being an integrated knowledge of our biosphere and its history is therefore indispensable Key Features Documents what the biosphere is and what our position as humans within it is today Describes how the biosphere has become the way it is Summarizes the novel simple theoretical model proposed in the book and thus how the biosphere functions Predicts what the possibilities and limitations are for future human action Emphasizes how simple but careful observations can lead to far reaching theoretical implications

British Modernism and the Anthropocene David Shackleton, 2023 British Modernism and the Anthropocene Experiments with Time assesses the environmental politics of modernism in relation to the idea of the Anthropocene a proposed geological epoch in which humans have fundamentally changed the Earth System The early twentieth century was marked by environmental transformations that were so complex and happened on such great scales that they defied representation Modernist novelists responded with a range of innovative narrative forms that started to make environmental crisis on a

planetary scale visible Paradoxically however it is their failures to represent such a crisis that achieve the greatest success David Shackleton explores how British modernists employed types of narrative breakdown including fragmentation and faltering passages devoid of events to expose the limitations of human schemes of meaning negotiate the relationship between different scales and types of time produce knowledge of ecological risk and register various forms of non human agency Situating modernism in the context of fossil fuel energy systems plantation monocultures climate change and species extinctions Shackleton traces how H G Wells D H Lawrence Olive Moore Virginia Woolf and Jean Rhys undertook experiments with time in their novels that refigure history and the historical situations into which they were thrown Ultimately British Modernism and the Anthropocene shows how modernist novels provide rich resources for rethinking the current environmental crisis and cultivating new structures of environmental care and concern *Doom* Niall Ferguson,2021-09-13 Corona ist nicht die letzte Katastrophe der Menschheit nur ihre j ngste Katastrophen lassen sich nicht vorhersagen Und dennoch Wenn das Unheil zuschl gt sollten wir besser ger stet sein als die R mer beim Ausbruch des Vesuv die Menschen im Mittelalter bei der rasenden Verbreitung der Pest in ganz Europa oder die Russen bei der Reaktorkatastrophe von Tschernobyl Aber sind wir das Haben wir nicht gerade in der Corona Pandemie alles erlebt an imperialer berheblichkeit b rokratischer Erstarrung und tiefer Spaltung Doom schaut mit dem Blick des Historikers und konomen auf die unterschiedlichsten Desaster in der Menschheitsgeschichte Wir m ssen unsere Lektionen aus diesen historischen Beispielen lernen damit k nftige Katastrophen uns nicht in den Untergang f hren Mit einem aktuellen Vorwort des Autors f r die deutsche Ausgabe **Yearbook of Transnational History** Thomas Adam,2018-05-31 The Yearbook of Transnational History is dedicated to disseminating pioneering research in the field of transnational history This inaugural volume provides readers with articles on topics such as soccer travel music and social policy These articles highlight the movement of ideas people policies and practices across various cultures and societies and explore the relations and connections and spaces created by these movements These articles make clear that historical phenomena from travel to music cannot be contained and explained within just one national setting The volume offers further a number of theoretical and methodological articles that provide insights into the concept of transnational history and the approach of intercultural transfer studies Last but not least the volume also includes a number of review articles These review articles provide an examination of books central to teaching transnational history as well as a historiographical exploration of the impact of transnational history on the field of sports history **Kondrarieff waves** Brian J. L. Berry,Leonid E. Grinin,Andrey V. Korotayev,Philippe Jourdon,Lucas Bernard,Aleksandr V. Gevorkyan,Tom Palley,Willi Semmler,William R. Thompson,Arno Tausch,Denis J. Dean,Euel Elliott,Jonas Van Vossle,Peter Herrmann,Stephen I. Ternyik,Leo Nefiodow,Simone Nefiodow,Anton L. Grinin,Valentina M. Bondarenko,Nikolai D. Kondratieff,Barry K. Gills,Robert A. Denemark,2015-05-29 In the period from the 1920s to 1930s the theory of economic cycles underwent dramatic changes Due to the research of such

famous economists as Nikolay Kondratieff Joseph Kitchin Wesley Mitchell Simon Kuznets and Joseph Schumpeter the idea of a whole system of economic cycles with characteristic periods between two and sixty years was developed The idea of a system of intertwined economic cycles is nowadays paramount to the school of evolutionary economics and its development promises rather interesting future outcomes That is why this issue of our Kondratieff Waves Yearbook is devoted to the interconnections between various economic cycles As to the subtitle of this volume one should note that many of the contributors refer to the system of cycles and the fact that real economic cycles make up a system whereas among different types of cycles the Juglar Kuznets and Kondratieff cycles are the most important ones for the present day economic dynamics Although Kondratieff himself considered long waves as above all an economic phenomenon the theory of the long waves became however very actively developed in connection with their political and geopolitical aspects In this Yearbook the political aspect of Kondratieff waves is the subject of several articles in the second section The last section of this Yearbook is devoted to the heritage of Kondratieff and other prominent economists The year 2015 marks the 150th anniversary of the outstanding Russian economist one of the most prominent researchers of medium term economic cycles Mikhail Tugan Baranovsky and the volume is concluded with Kondratieff's article about him Concerning 2015 we should mention another anniversary namely 30 years since the death of Simon Kuznets 1901-1985 This edition will be useful for economists social scientists as well as for a wide range of those interested in the problems of the past present and future of global economy and globalization

*The Great Silence* Milan M. Ćirković, 2018-04-26 The Great Silence explores the multifaceted problem named after the great Italian physicist Enrico Fermi and his legendary 1950 lunchtime question Where is everybody In many respects Fermi's paradox is the richest and the most challenging problem for the entire field of astrobiology and the Search for ExtraTerrestrial Intelligence SETI studies This book shows how Fermi's paradox is intricately connected with many fields of learning technology arts and even everyday life It aims to establish the strongest possible version of the problem to dispel many related confusions obfuscations and prejudices as well as to offer a novel point of entry to the many solutions proposed in existing literature Ćirković argues that any evolutionary worldview cannot avoid resolving the Great Silence problem in one guise or another

**Time and Space in the Internet Age** Stephen Kern, 2024-08-01 This book analyzes how new technologies transformed life and thought between two periods 1880-1920 and 1980-2020 with a focus on temporal experiences of past present future and the spatial experiences of form distance and direction The signature contrast is between experiences of time and space transformed by the telephone in the earlier period and the Internet in the later period along with other sharp contrasts the sinking of the Lusitania in 1915 and the attack on the World Trade Center on 9/11 World War I and the Gulf Wars gravity bombs and smart bombs the pandemics of 1918 and 2020 assembly lines and flexible production Farmer's Almanacs and computer based weather predictions cash transactions and one click ordering decolonization and globalization internationalism and planetarity The book also makes three interpretive arguments the

Epistemological Argument covers how greater knowledge introduced uncertainties the Ethical Argument tracks how new technologies prompted ethical judgments about their value and the Re hierarchizing Argument tracks the erosion of spatial hierarchies most notably in religion society and politics with the increasing progress of secularization social mobility and democratization Time and Space in the Internet Age is a thought provoking study for academics and general readers interested in the history of technology and science
