

The background of the book cover is a photograph of a modern building's exterior. The building features a prominent vertical garden facade, which is a wall covered in a dense, multi-layered arrangement of various green plants, including ferns, succulents, and leafy greens. The building's structure is visible through the foliage, showing dark brown or black metal frames and large glass windows. The sky is visible through the windows and the top of the frame. The overall image conveys a sense of sustainability and integration of nature with urban architecture.

Environmental & Economic Impact on Sustainable Development J.L. Miralles i Garcia, 2016-12-28. Delegates to the 3rd International Conference on Environmental and Economic Impact on Sustainable Development contributed the peer-reviewed papers contained in this book. The papers discuss the most serious problems affecting sustainable development. They consider the impact of economic constraints on the environment, taking into account the social aspects as well as the over-use of natural resources. Uncontrolled development can also result in damage to the environment in terms of the release of toxic substances and hazardous waste. Thus, attention is paid to issues related to whether some forms of development are compatible with environmental protection, particularly in cases of possible serious contamination and toxicity. The focus in the book is on more constructive and progressive approaches to the problems discussed to ensure sustainability. The hope is that through the shared experiences of experts, we can learn from past failure to avoid repeating similar mistakes while attempting to prevent emerging threats to the environmental and ecological systems. Fundamental to these concepts are an analysis of the inherent risks and the development of appropriate strategies. The papers in this book cover such topics as Environmental assessments, Environmental policies and planning, Water resources management, Natural resources management, Legislation and regulations, Development issues, Economic impact.

*Smart, Sustainable Manufacturing in an Ever-Changing World* Konrad von Leipzig, Natasha Sacks, Michelle McClelland, 2023-03-03. This book presents recent developments, research results, and industrial experience to increase the knowledge base of academics and industry. In a small world where trade is the new global driving force, conquering countries and continents alike, international competitiveness is becoming the ultimate challenge. It requires high-quality products manufactured with state-of-the-art technologies at low cost under the assumption of highly efficient operations management, as well as clear corporate goals and strategy. This in turn is based on improved engineering training and education, relevant applied research, and an active interaction between academia and industry.
