Hemostasis Management of the Pediatric Surgical Patient Nina A. Guzzetta, David Faraoni, Cassandra D.

Josephson, 2023-10-19 Hemostasis Management of the Pediatric Surgical Patient provides knowledge on the emerging area of pediatric hemostasis and its management. It discusses aspects of perioperative blood management in the pediatric population including how to accurately estimate and monitor bleeding and determine optimal treatment regimens for bleeding in pediatric surgical patients. It also provides information on the implementation of intraoperative blood conservation strategies, goal directed transfusion therapy, and postoperative estimation of bleeding and thrombotic risks. This book is a valuable resource to pediatric practitioners and researchers who need comprehensive information on pediatric hematology from basic physiology to pre intra and postoperative care of pediatric patients. The coagulation system of children evolves with age as evidenced by marked physiological differences in the concentration of hemostatic proteins between children of different age groups and adults. Consequently, there are distinct differences in hemostatic management between adult and pediatric patients. Covers essential concepts in hemostasis, indicating instances where pediatric and adult data conflict, along with foundational information on disorders of hemostasis in children and blood bank management for pediatric patients. Concisely covers specifics of perioperative hemostatic management in neonates and children, including bedside monitoring of coagulation and goal directed treatment of coagulopathy. Discusses hemostatic management in the entire perioperative period from preoperative assessment until discharge from the hospital.
