Fundamental Concepts of Political Geography: An Introduction

Introduction

The simple answer to the question “what is political geography about?” is what it says it is about: politics and geography. But that is altogether *too* simple. Political geography is by no means the sum of its two parts. In political geography, “geography” is drawn on in selective ways: in ways which illumine the political. By the same token, “politics” is drawn on in ways which shed light on the geographic. Above all, political geography focuses on the twin ideas of territory and territoriality.

Territory and territoriality are the defining concepts of political geography in that they bring together the ideas of power and space: territories as spaces that are defended, contested, claimed against the claims of others; in short, through territoriality. Territory and territoriality mutually presuppose one another. There can’t be one without the other. Territoriality is activity: the activity of defending, controlling, excluding, including; territory is the area whose content one seeks to control in these ways.¹

But again, that only takes us so far. To understand territory and territoriality as opposed to describing what they are about, we need understandings of space relations and politics. As geographic concepts territory and territoriality have their roots, their conditions, in other spatial practices; in particular those relating to movement and those that have to do with the embedding of people and their activities in particular places – ideas that are fundamental to contemporary human geography. Likewise, in order to understand the political in political geography we need to come to terms with *the* central concept

¹ Consider in this regard the definitions given by *The Dictionary of Human Geography* (1986). Territory: “A general term used to describe areas of land or sea over which states and other political entities claim to exercise some form of control” (p. 483); territoriality: “The attempt by an individual or group to influence or establish control over a clearly demarcated territory” (p. 482).

Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes.
