Simulators in Anesthesiology Education Lindsey C. Henson,Andrew C. Lee,2013-06-29 In the past ten years full scale simulation training has become dramatically more evident in undergraduate and graduate medical education This increase has been due pri marily to two factors the development of new computer driven technology and an interest in simulation specific training techniques Technologically simulators have evolved from simple anatomical reproductions to full scale accurate reproductions of anatomy and physiology powered by multiple computers High technology simulation centers run by teams of faculty are emerging as integral tools in fulfilling medical centers educational missions In addition educational techniques specific to simulation which have been de veloped and used by other industries for over half a century are being applied to medical training Aviation and aerospace have used sophisticated simulation since the 1950s to train pilots and astronauts Extrapolating these methods for use in the medical world has been a natural course of events particularly in specialties that require some of the same basic thought processes and interactions required of the pilot or astronaut It is not surprising then that anesthesiology would be the medical specialty to take the lead in adding simula tion training to its educational programs The anesthesiologist s job in the operating room is similar to that of a pilot in a cockpit not in the specific tasks but in decision making technological and human interfaces and crisis management Minox D. Scott Young,2000-06-14 On Sunday September 11 2011 tens of thousands of people including the daughter of the CIA Director and her children are shopping when The Mall of America the largest shopping mall in the country is torn apart by massive explosions The CIA Director s daughter is gravely injured and later dies in the hospital In New York at a small regional airport six missiles destroy the control tower the passenger terminal a plane and fuel truck and a corporate hanger and several private jets Among the victims are the parents of the head of the FBI counter terrorism department The country comes to a standstill A shocked president addresses the nation and promises action But a recalcitrant Congress refuses to recognize that its inability to deal with illegal immigrants has enabled these new attacks to take place The president authorizes the CIA and FBI to work together to find who is behind the attacks and bring them to justice by any means The leaders of the two agencies know their working together is against federal law But they are motivated by hate and revenge What they learn shocks the country and the world
