Innovations in Big Data Mining and Embedded Knowledge Anna Esposito, Antonietta M. Esposito, Lakhmi C. Jain, 2019-07-03 This book addresses the usefulness of knowledge discovery through data mining With this aim contributors from different fields propose concrete problems and applications showing how data mining and discovering embedded knowledge from raw data can be beneficial to social organizations domestic spheres and ICT markets Data mining or knowledge discovery in databases KDD has received increasing interest due to its focus on transforming large amounts of data into novel valid useful and structured knowledge by detecting concealed patterns and relationships The concept of knowledge is broad and speculative and has promoted epistemological debates in western philosophies The intensified interest in knowledge management and data mining stems from the difficulty in identifying computational models able to approximate human behaviors and abilities in resolving organizational social and physical problems Current ICT interfaces are not yet adequately advanced to support and simulate the abilities of physicians teachers assistants or housekeepers in domestic spheres And unlike in industrial contexts where abilities are routinely applied the domestic world is continuously changing and unpredictable There are challenging questions in this field Can knowledge locked in conventions rules of conduct common sense ethics emotions laws cultures and experiences be mined from data Is it

acceptable for automatic systems displaying emotional behaviors to govern complex interactions based solely on the mining of large volumes of data

Discussing multidisciplinary themes the book proposes computational models able to approximate to a certain degree human behaviors and abilities in resolving organizational social and physical problems

The innovations presented are of primary importance for a

- a The academic research community
- b The ICT market
- c Ph D students and early stage researchers
- d Schools hospitals rehabilitation and assisted living centers
- e Representatives from multimedia industries and standardization bodies
