**Between Logic and Reality** Majda Trobok, Nenad Mišćević, Berislav Žarnić, 2011-11-23 Is reality logical and is logic real What is the origin of logical intuitions What is the role of logical structures in the operations of an intelligent mind and in communication Is the function of logical structure regulative or constitutive or both in concept formation This volume provides analyses of the logic reality relationship from different approaches and perspectives The point of convergence lies in the exploration of the connections between reality social natural or ideal and logical structures employed in describing or discovering it Moreover the book connects logical theory with more concrete issues of rationality normativity and understanding thus pointing to a wide range of potential applications The papers collected in this volume address cutting edge topics in contemporary discussions amongst specialists Some essays focus on the role of indispensability considerations in the justification of logical competence and the wide range of challenges within the philosophy of mathematics Others present advances in dynamic logical analysis such as extension of game semantics to non logical part of vocabulary and development of models of contractive speech act *New Waves in Epistemology* Vincent F. Hendricks, Duncan Pritchard, 2008-01-15 In the past thirty years epistemology has been one of the fastest moving disciplines in philosophy The reason for the rapid advancement is partly due to the fact that various schools and movements inside epistemology have developed different answers to classical epistemological problems and partly due to the fact that formal methods from logic probability theory and computability have been utilized to deal with many of the same issues and used for applications outside traditional epistemology *New Waves in Epistemology* reflects these changes by letting up and coming scholars describe the current trends as well as discussing the prospects for future development **The Philosopher's Index** Richard H. Lineback, 1978 [Model-Based Reasoning in Science and Technology](#) Ángel Nepomuceno-Fernández, Lorenzo Magnani, Francisco J. Salguero-Lamillar, Cristina Barés-Gómez, Matthieu Fontaine, 2019-10-24 This book discusses how scientific and other types of cognition make use of models abduction and explanatory reasoning in order to produce important and innovative changes in theories and concepts Gathering revised contributions presented at the international conference on Model Based Reasoning MBR18 held on October 24-26 2018 in Seville Spain the book is divided into three main parts The first focuses on models reasoning and representation It highlights key theoretical concepts from an applied perspective and addresses issues concerning information visualization experimental methods and design The second part goes a step further examining abduction problem solving and reasoning The respective papers assess different types of reasoning and discuss various concepts of inference and creativity and their relationship with experimental data In turn the third part reports on a number of epistemological and technological issues By analyzing possible contradictions in modern research and describing representative case studies this part is intended to foster new discussions and stimulate new ideas

All in all the book provides researchers and graduate students in the fields of applied philosophy epistemology cognitive science and artificial intelligence alike with an authoritative snapshot of the latest theories and applications of model based reasoning
