Humboldt Sexton, 2016-08-30 Excerpt from Fuel and Refractory Materials IT has not been felt necessary to make any alteration in the scope or general arrangement of the book but since the first edition was published there have been changes and developments in many directions especially in connection with coke ovens gas producers and pyrometry Considerable additions have therefore been made in the chapters dealing with these subjects The modern forms of plant and apparatus are now described Some descriptions of older types of plant have been deleted and the whole book has been carefully revised In spite of the progress which is being made in the adoption of the metric system in this country it is unfortunately still necessary to use the British system of weights and measures These have therefore been retained The author hopes that the
