rate law and reaction order video khan academy - Jan 06 2023

web a rate law shows how the rate of a chemical reaction depends on reactant concentration for a reaction such as $a \rightarrow \text{products}$ the rate law generally has the form $\text{rate} = k a^n$ where k is a proportionality constant called the rate constant and n is the order of the reaction with respect to a the value of n is not related to the reaction stoichiometry and

determination of rate laws springerlink - Mar 28 2022

web the rate determining slower step gives a rate law showing second order dependence on the no_2 concentration and the sum of the two elementary equations gives the overall net reaction in general when the rate determining slower step is the first step in the reaction mechanism the rate law for the overall reaction is the same as the rate
