The Oxford Handbook of Derivational Morphology Rochelle Lieber, Pavol Stekauer, 2014-09-25 The Oxford Handbook of Derivational Morphology is intended as a companion volume to The Oxford Handbook of Compounding OUP 2009 Written by distinguished scholars its 41 chapters aim to provide a comprehensive and thorough overview of the study of derivational morphology The handbook begins with an overview and a consideration of definitional matters distinguishing derivation from inflection on the one hand and compounding on the other From a formal perspective the handbook treats affixation prefixation suffixation infixation circumfixation etc conversion reduplication root and pattern and other templatic processes as well as prosodic and subtractive means of forming new words From a semantic perspective it looks at the processes that form various types of adjectives adverbs nouns and verbs as well as evaluatives and the rarer processes that form function words The book also surveys derivation in fifteen language families that are widely dispersed in terms of both geographical location and typological characteristics

The Morphology of Loanwords in Urdu Riaz Ahmed Mangrio, 2016-06-22 Although a major language in itself Urdu has borrowed words from three major languages of the world namely Persian Arabic and English with various loan morphological and phonological features There have been very few studies on this phenomenon and many features are still unexplored This study focuses on loanword morphology and looks at the nature of loanwords borrowed from these three languages The book begins by examining the morphological adaptation of loanwords Secondly parallels and differences are explored between the relatively recent adaptation of English loans and the older adaptation of words from Arabic and Persian The descriptive content of the book covering as it does not only English loanwords but those from Arabic and Persian as well in addition to examining native Urdu structures is refreshingly broad The study itself is primarily descriptive carefully teasing apart the sometimes complex interactions between syntax semantics and linguistic function relative to loanword adaptation However even beyond the question of loanword adaptation there is much to recommend itself descriptively here with regard to the morphological structures of Urdu including endocentric exocentric copulative postpositional and verbal compounds In addition to such

derivational processes this study also considers various inflectional issues such as gender number and case morphology the pluralisation of English nominal loans and the adaptation of English verbs through the use of Urdu dummy verbs The book offers a good foundation for a more in depth examination of the data against current morphological theory Taken as a whole it not only presents a large quantity of interesting data in pursuing the immediate question of loanword adaptation in Urdu but also provides a fruitful starting point for a wealth of further investigations into Urdu and into loanword adaptation more generally

One-to-many-relations in morphology, syntax, and semantics Berthold Crysmann, Manfred Sailer, 2021
The standard view of the form meaning interfaces as embraced by the great majority of contemporary grammatical frameworks consists in the assumption that meaning can be associated with grammatical form in a one to one correspondence Under this view composition is quite straightforward involving concatenation of form paired with functional application in meaning In this book we discuss linguistic phenomena across several grammatical sub modules morphology syntax semantics that apparently pose a problem to the standard view mapping out the potential for deviation from the ideal of one to one correspondences and develop formal accounts of the range of phenomena We argue that a constraint based perspective is particularly apt to accommodate deviations from one to many correspondences as it allows us to impose constraints on full structures such as a complete word or the interpretation of a full sentence instead of deriving such structures step by step Most of the papers in this volume are formulated in a particular constraint based grammar framework Head driven Phrase Structure Grammar The contributions investigate how the lexical and constructional aspects of this theory can be combined to provide an answer to this question across different linguistic sub theories
