Financial Innovation and Value Creation Martin Užík, Christian Schmitz, Sebastian Block, 2023-03-10 This contributed volume provides academic insights into the digital financial world It illustrates the state of the art research on financial technology and innovation with special focus on the impact in society

Technologies are not only door openers for the digital world but they are also key drivers of change. These key drivers of digitalization accelerating the pace are literally forcing individuals to adapt. The authors discuss these dynamics and reflect on society's adaptability. The first part of the book focuses on cryptocurrencies as disruptive technology. It discusses the status quo, future trends, and legal frameworks for virtual money. The second part of the book sheds light on value creation in a digitalized world. The authors discuss digital platforms and economic networks and the impact of digital dominance.

Advances in Digital Forensics XIX Gilbert Peterson, Sujeet Sheno, 2023-10-18. Digital forensics deals with the acquisition, preservation, examination, analysis, and presentation of electronic evidence. Computer networks, cloud computing, smartphones, embedded devices, and the Internet of Things have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence in legal proceedings. Digital forensics also has myriad intelligence applications; furthermore, it has a vital role in cyber security investigations. Security breaches yield valuable information that can be used to design more secure and resilient systems. This book, *Advances in Digital Forensics XIX*, is the nineteenth volume in the annual series produced by the IFIP Working Group 11.9 on Digital Forensics, an international community of scientists, engineers, and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book presents original research results and innovative applications in digital forensics. Also, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. This volume contains fourteen revised and edited chapters based on papers presented at the Nineteenth IFIP WG 11.9 International Conference on Digital Forensics held at SRI International in Arlington, Virginia, USA, on January 30-31, 2023. A total of 24 full-length papers were submitted for presentation at the conference.

Automatisierte Governance in der Ära der Blockchain-Technologie
Jan-Gero Alexander Hannemann, Robert Müller, 2024-02-15. Die Entwicklung der Blockchain-Technologie wird weltweit mit großem Interesse verfolgt, da sie in zahlreichen Wirtschaftsfeldern aufgrund ihrer revolutionären, aber auch disruptiven Eigenschaften große Veränderungen ermöglicht. Die Innovationskraft der Blockchain-Technologie reicht inzwischen über Kryptowährungen deutlich hinaus. Heutzutage generieren Milliarden von IoT-Sensoren, IoT-Anwendungen und Maschinen eine hohe Anzahl von Echtzeitdaten und Informationen. Wir steuern auf eine Zukunft zu, in der intelligente Maschinen gesteuert von künstlicher Intelligenz mittels Mikro-Transaktionen durch Blockchain-basierte Decentralized Autonomous Organizations (DAOs) ihre transformative Wirkung entfalten können. Es sind sogenannte Smart Contracts, also der Wesenskern einer jeden DAO, welche die automatisierte Steuerung von Operationen über eine programmierbare Geschäftslogik ermöglichen. Man muss sich nicht mehr auf eine zentrale Infrastruktur verlassen, sondern ist dezentral aufgestellt. So verringert sich das Risiko von Cyberangriffen. Zukünftig wird eine neue Welt autonomer Systeme entstehen, die auch die Robotik umfasst. DAOs können darüber hinaus neue Organisations- sowie Kooperationsmöglichkeiten für Menschen und Organisationen bieten. Das Buch erläutert

aktuelle Fragestellungen im Bereich der DAOs insbesondere im Gesellschafts Steuer und Aufsichtsrecht und diskutiert mögliche Lösungsmöglichkeiten für rein digital existierende DAOs sowie die Interaktion von KI und DAO *Digital Innovation in Financial Services* Phoebus L. Athanassiou, 2016-04-24 Consumer behaviour is rapidly trending towards the use of digital devices as instruments through which to transact day to day business This original and timely book shows how this trend creates new opportunities not only for retail consumers but also for financial service providers regulators and central banks The author offers a comprehensive overview of these opportunities and their countervailing legal and regulatory challenges The author describes and analyses in unprecedented detail the application of digital financial innovation FinTech and some of its core manifestations including virtual currencies Blockchain and distributed ledger technologies to the delivery of financial services in areas such as payments securities clearing and settlement central banking real time access to financial information instant completion of core financial transactions data validation and reconciliation processes and digital contracting smart contracts Also clarified are the legal and other barriers to be overcome including cybersecurity and risks to privacy before any widespread adoption of digital innovation in the highly regulated financial sector context can occur As an informed assessment of the legal merits and risks of technological innovation for financial service providers and central banks and as a contribution to establishing a conceptual framework within which to analyse and better understand the applications of digital innovation to the financial sector this practical work is bound to be welcomed by legal practitioners and legal scholars alike with an interest in financial services Policymakers and regulators will also appreciate its guidance on how to temper the less benevolent aspects of FinTech with targeted risk focused regulation so as to promote innovation and preserve the potential benefits for financial markets and their participants alike **Smart Contracts und die juristischen Rahmenbedingungen in Deutschland. Zum Einsatz Digitaler Verträge auf Blockchain-Basis** Jens Baudy, 2022-02-18 Bachelorarbeit aus dem Jahr 2022 im Fachbereich BWL Recht Note 1,0 Technische Universität Kaiserslautern Sprache Deutsch Abstract In dieser Arbeit werden juristische Hindernisse untersucht die beim Einsatz von Smart Contracts auftreten können und Rahmenbedingungen formuliert innerhalb derer eine Nutzung nach dem geltenden Recht möglich ist Im Bereich Legal Tech sind Smart Contracts heutzutage immer häufiger als Schlagwort vorzufinden Sie dienen der Schließung Automatisierung und Rechtsdurchsetzung klassischer Verträge und wollen auf diesem Weg Rechtsstreitigkeiten auf ein Minimum reduzieren Auch wenn sie von einigen bereits als unausweichliche Technologie angepriesen werden ist ihre regulatorische Zulässigkeit noch nicht abschließend geklärt Selten waren die Meinungen über eine Technologie so zwiespältig wie es bei der Blockchain der Fall ist Befürworter sehen in ihrer dezentralen Natur die Lösung für eine Vielzahl an Problemen des digitalen Zeitalters Als disruptive Technologie wird ihr nachgesagt die Digitalisierung in verschiedenen Bereichen wesentlich voranzutreiben und die Wirtschaft grundlegend auf den Kopf zu stellen Gleichzeitig steht das Konzept vor dem Hintergrund der Klimadebatte massiv unter Kritik da es teils enorme Rechenleistung und somit Ressourcen

erfordert Entgegen der häufig vorzufindenden Gleichstellung der Blockchain mit Kryptowährungen gehen ihre Anwendungsfelder aber weit über diese hinaus Blockchain basierte Smart Contracts sollen zukünftig zur Obsoleszenz zentraler Institutionen über alle Branchen hinweg beitragen und die traditionelle Kautelarpraxis grundlegend revolutionieren Verträge werden sodann direkt zwischen Parteien geschlossen und die Rechtsdurchsetzung mittels selbstausführender Software automatisiert Der damit einhergehende Verzicht auf zentrale Intermediäre hat Zeit und Kosteneinsparungen zur Folge und steht damit vor allem im Finanzsektor auf Begeisterung Dennoch werden von Gegnern sinnvolle Einsatzzwecke der Smart Contracts angezweifelt während andere dem bestehenden Rechtssystem bereits seine Daseinsberechtigung entziehen
