This text requires no prior programming experience and only a modest amount of high school algebra. It provides an approachable introduction to fundamental programming techniques and design skills helping students master basic concepts and become competent coders. It takes a traditional route first stressing control structures, procedural decomposition, and array algorithms. Objects are used where appropriate in early sections of the text. All sections include built-in activities, open-ended review exercises, programming exercises, and projects to help students practice programming and build confidence. These activities go far beyond simplistic multiple choice questions and animations. They have been designed to guide students along a learning path for mastering the complexities of programming. Students demonstrate comprehension of programming structures then practice programming with simple steps in scaffolded settings and finally write complete automatically graded programs. The perpetual access VitalSource Enhanced eText when integrated with your school's learning management system provides the capability to monitor student progress in VitalSource SCORECenter and track grades for homework or participation.
