How Societies Work, 5th Edition Joanne Naiman, 2020-04-28T00:00:00Z In 2011 protesters around the world including Canada called for changes to the societies in which they live Many observers were asking What do they want Some answers to this question can be found in *How Societies Work* a unique and accessible introductory sociology textbook that introduces

students to the structure of contemporary societies and the power relationships within them. In contrast to most introductory textbooks, *How Societies Work* explores a broad range of sociological concepts and theories while simultaneously creating a coherent picture of modern societies. Drawing on fields as diverse as anthropology, genetics, economics, social psychology, history, and politics, this innovative and popular text looks at both the roots of modern societies and the current structures within them. This approach helps undergraduate students make sense of our complex social world and encourages them to connect the social world to their own lived experiences. This extensively revised and updated fifth edition includes discussions of the roots of the recent global economic crisis and worldwide responses to it, growing social inequality, broader global struggles for change, the growth of the security state in Canada, and the sudden resurgence of political protest in North America. The final chapter looks to the future, examining such issues as the possible consequences of climate change, increased forced migration of peoples, and the changing dynamic of global power. More boxes, quotes, and think about it elements have been added to the fifth edition, while the language clarity of presentation and many examples make it even more accessible to readers. It is an introductory textbook that truly engages students in the sociological imagination. This fifth edition is presented in a large format, making it easier to read and even more student friendly. A testbank and power point presentation are available for instructors upon request.

Culture, Economy, Power Winnie Lem, Belinda Leach, 2012-02-01. Grounded in a conviction that anthropological knowledge implies critique and that engaging in anthropology is also ultimately an act of praxis, various contributors explore the ways in which the precepts of Marxism continue to illuminate and enhance our understanding of culture, economy, and politics. They focus on the question of

epistemology to examine the process of anthropological intellectual production in different national settings and analyze the ways in which hierarchies of power and forms of state domination figure in the formation of subjectivities in different ethnographic contexts The authors also reflect upon how class gender ethnicity racialized forms of ethnicity as well as regional and national identities are configured through the relationships involved in making a living under late capitalism

the labour market and how it intersects with sexism from the perspective of both older workers and employers Critical Disability Theory Dianne Pothier, Richard Devlin, 2011-11-01 People with disabilities in Canada inhabit a system of deep structural economic social political legal and cultural inequality a regime of dis citizenship Despite the widespread belief that Canada is a country of liberty equality and inclusiveness many persons with disabilities experience social exclusion and marginalization They are socially constructed as second class citizens Conventional understandings of disability are dependent on assumptions that characterize disability as misfortune and by implication privilege the normal over the abnormal Consequently it is presumed that societal organization based upon able bodied and minded norms is inevitable and that the best we can do is show sympathy or pity The essays Critical Disability Theory contend instead that achieving equality for the disabled is not fundamentally a question of medicine or health nor is it an issue of sensitivity or compassion Rather it is a question of politics and of power and powerlessness This book argues that we need new ways to think about the nature of disability a new understanding of participatory citizenship that encompasses the disabled new policies to respond to their needs and a new vision of their entitlements Twenty four scholars from a variety of disciplines come together here to identify the problems with traditional approaches to disability and to provide new directions The essays range from focused empirical and experiential studies of different disabilities to policy analyses legal interrogations and philosophical reconsiderations The result will be of interest to policy makers professionals academics non governmental organizations and grassroots activists
