Geography and Development James Samuel

Fisher, 1995 Developed around the theme of economic development this edition has been completely revised The text

comprehensively covers the basic concepts of regional geography exploring topics such as population resources cultural

elements and our relationship with the environment Alternative Capitalisms: Geographies of Emerging Regions Robert

Gwynne, Denis Shaw, Thomas Klak, 2014-05-12 This book aims to examine the effects of globalization and economic and

political transformations in those parts of the world which are now regularly referred to as emerging regions These are Latin

America and the Caribbean East Central Europe and the former Soviet Union and East Asia This book breaks new ground in

three areas First of all it develops a critique of the use of the term emerging regions for geographers and social scientists

and relates this to world systems theory Secondly it explores the development trajectories and challenges of countries in this

so called emerging world countries that will be crucial to the evolution of the world economy in the twenty first century

Thirdly it compares and contrasts the pathways of both economic and political change in the three world regions under focus

This is a unique approach in terms of books published in both geography and the social sciences Within the context of the

three world regions the book combines historical and contemporary analysis of the evolving world system In these regions we

are concerned to understand the historical expansion and extension of capitalism and how its contemporary forms of

production exchange and regulation are evolving The authors believe that at the present time these processes have produced

alternative capitalisms economic and associated developments which while assuredly capitalist differ in various ways from

those typical of the capitalist West or core economies of North America and Western Europe **The Middle East and**

North Africa Alasdair Drysdale, 2024-10-15 This contemporary text the first in over a decade on the region presents the

geography of the Middle East and North Africa defined as the Arab World Israel Turkey Iran and Afghanistan Thematically

organized the book s eleven chapters focus on the region s physical and climatic setting demographic characteristics

migration patterns religious and linguistic diversity political map offshore claims oil and gas resources and subregions and

states Within this framework Drysdale emphasizes pressing current problems the impact of climate change in a region where

some areas already suffer from extreme summer heat and aridity the challenge of providing additional water in a region

where per capita availability of freshwater is already the lowest in the world the impact of high fertility and rapid population

growth in a fragile environment where economies are often unable to absorb young workers entering the labor force the

looming prospect of an aging population the effects of out and in migration the diverse impact and role of Islam in daily and

public life the integrative consequences of linguistic and ethnic diversity the evolution and imperfections of the political map

ongoing territorial and boundary disputes that often have global repercussions external dependence on the region s prolific

oil and gas resources and the extreme regional inequalities associated with their presence or absence This timely and

insightful analysis is essential reading for students of the region who need a better understanding of key regional characteristics challenges and issues **Patterns of Regional Geography: World regions** R. B. Mandal,1990-01-01 Contributed papers on integrated geographical study of regions *Studyguide for World Regional Geography* Cram101 Textbook Reviews,2014-05-22 Never HIGHLIGHT a Book Again Includes all testable terms concepts persons places and events Cram101 Just the FACTS101 studyguides gives all of the outlines highlights and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanies 9780321939654 This item is printed on demand **Encyclopedia of World Geography** R. Siddle, C. T. Smith, Mr C. T. Smith, E. Thomas-Hope, 2013-04-15 The label of Third World covers half the land surface and three quarters of the population of the planet. The problems and potential of this region and its peoples are attracting increasing concern and interest. Fully revised and updated, this edition includes a wealth of photographic and line illustrations, boxed case studies, chapter summaries, guides to further reading. Issues of increasing concern at the end of the twentieth century are fully addressed, for example the widening gap in economic performance between countries in the Third World and the assertion of national cultures in the face of globalisation. New material on gender issues and the environmental impact of development has been included. Regional Geography (RLE Social & Cultural Geography) Ron Johnston, Joost Hauer, G. Hoekveld, 2014-01-23 This book urges the case for reinstating regional geography as a contemporary and relevant methodology. Much interest was shown in the 1980s in reviving yet restructuring the field of regional geography. The essays in this book both review that work and propose a way forward. The essays divide into three sections. The first assesses traditional regional geography and its relevance to the study of contemporary situations; the second the alternative approaches of world systems analysis, diffusion and structuration theory. The book concludes by considering the potential of regional geography to interpret the structures within which society operates and its claim to remain at the core of the discipline.
