**Between the Middle Ages and Modernity** Charles H. Parker, Jerry H. Bentley, 2006-12-28 This groundbreaking book examines the complex relationships between individuals and communities during the profound transitions of the early modern period Historians have traditionally identified the origins of a modern individualist spirit in the European Renaissance and Reformation Yet since the 1960s evolving scholarship has challenged this perspective by calling into question its basic assumptions about individualism its exclusive focus on elite individuals and its inherent Eurocentric bias Arguing that

individual identity drew from traditional forms of community these essays by leading scholars convincingly show that individual and community created and recreated one another in the major structures interactions and transitions of early modern times The authors contend that on the one hand communities provided the stability that allowed for individual agency even as they imposed new forms of discipline that confined individuals to more rigid moral and social norms On the other hand individuals established forms of association to advance their own economic social political and religious agendas Offering an important contribution to our understanding both of the early modern period and of its historiography this volume will be an invaluable resource for scholars working in the fields of medieval early modern and modern history and on the Renaissance and Reformation Contributions by Jerry H Bentley Thomas A Brady Jr Douglas Catterall Donald J Harreld Susan C Karant Nunn Marie Seong Hak Kim Henk van Nierop Charles H Parker Michael N Pearson Carla Rahn Phillips William D Phillips Jr Elizabeth Bradbury Pollnow Kathryn L Reyerson Hugo de Schepper Ulrike Strasser Sanjay Subrahmanyam and Markus P M Vink

*The Oxford World History of Empire* Peter Fibiger Bang, C. A. Bayly, Walter Scheidel, 2020-11-07 This is the first world history of empire reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume I The Imperial Experience is dedicated to synthesis and comparison Following a comprehensive theoretical survey and bold world history synthesis fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages The broad range of perspectives includes scale world systems and geopolitics military organization political economy and elite formation monumental display law mapping and registering religion literature the politics of difference resistance energy transfers ecology memories and the decline of empires This broad set of topics is united by the central theme of power examined under four headings systems of power cultures of power disparities of power and memory and decline Taken together these chapters offer a comprehensive and unique view of the imperial experience in world history

**Global History, Globally** Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope Global History Globally addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the

book's chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work. The authors hail from various world regions and are themselves leading global historians. Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history. As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them, *Global History Globally* is a must-read book for all students and scholars of global history.

Renaissance Humanism, from the Middle Ages to Modern Times John Monfasani, 2016-12-05 Starting with an essay on the Renaissance as the concluding phase of the Middle Ages and ending with appreciations of Paul Oskar Kristeller the great twentieth-century scholar of the Renaissance, this new volume by John Monfasani brings together seventeen articles that focus both on individuals such as Erasmus of Rotterdam, Angelo Poliziano, Marsilio Ficino, and Niccolò Perotti and on large-scale movements such as the spread of Italian humanism, Ciceronianism, Biblical criticism, and the Plato-Aristotle controversy. In addition to entering into the persistent debate on the nature of the Renaissance, the articles in the volume also engage what of late have become controversial topics, namely the shape and significance of Renaissance humanism and the character of the Platonic Academy in Florence.

Big and Little Histories Marnie Hughes-Warrington, Anne Martin, 2021-08-19 This book introduces students to ethics in historiography through an exploration of how historians in different times and places have explained how history ought to be written and how those views relate to different understandings of ethics. No two histories are the same. The book argues that this is a good thing because the differences between histories are largely a matter of ethics. Looking to histories made across the world and from ancient times until today, readers are introduced to a wide variety of approaches to the ethics of history, including well-known ethical approaches such as the virtue ethics of universal historians and utilitarian approaches to collective biography writing, while also discovering new and emerging ideas in the ethics of history. Through these approaches, readers are encouraged to challenge their ideas about whether humans are separate from other living and non-living things and whether machines and animals can write histories. The book looks to the fundamental questions posed about the nature of history making by Indigenous history makers and asks whether the ethics at play in the global variety of histories might be better appreciated in professional codes of conduct and approaches to research ethics management. Opening up the topic of ethics to show how historians might have viewed ethics differently in the past, the book requires no background in ethics or history theory and is open to all of those with an interest in how we think about good histories.
