Moscow to Washington that have created and exploited this world of chaos and division and offers practical solutions for what we can do about it A precise description of the punishment cell we have built around our minds and the first few steps back towards light and air Timothy Snyder Author of *On Tyranny* and Professor of History Yale University A seminal ground breaking documented and honest examination of two of the central dilemmas of our time what is truth and where to find it Bob Woodward associate editor at The Washington Post As the cofounder of NewsGuard a company that tracks online misinformation Steven Brill has observed the rise of fake news from a front row seat In *The Death of Truth* with startling often terrifying clarity he explains how we got here and how we can get back to a world where truth matters None of this conspiracy theories embraced expertise ridiculed empirical evidence ignored has happened by accident Brill takes us inside the decisions made by executives in Silicon Valley to code the algorithms embedded in their social media platforms to maximize profits by pushing divisive content He unravels the ingenious creation of automated advertising buying systems that reward that click baiting content and penalize reliable news publishers and describes how the use of these ad financed misinformation platforms by politicians hucksters and conspiracy theorists deceives ordinary citizens He documents how the most powerful adversaries of America have used American made social media and advertising tools against us with massive disinformation campaigns and how with the development of generative artificial intelligence everything could get exponentially worse unless we act The stakes are high for all of us including Brill himself whose company's role in exposing Russian disinformation operations resulted in a Russian agent targeting him and his family Crucially Brill lays out a series of provocative but realistic prescriptions for what we can do now to reverse course proposals certain to stir debate and even action that could curb the power of big tech to profit from division and chaos tamp down polarization and restore the trust necessary to bring us together

distorted by government interventions is a dysfunctional version of free market ideals As a result productivity and economic growth have slowed sharply shrinking the pie for everyone and stoking popular anger Since these flaws developed as the government expanded building an even bigger state will only double down on what s gone wrong The answer Sharma offers is a series of seven fixes to restore the balance between state support and free markets and lay the path to a more prosperous and happier future

Think for Yourself Vikram Mansharamani,2020-06-16 We've outsourced too much of our thinking How do we get it back Have you ever followed your GPS device to a deserted parking lot Or unquestioningly followed the advice of an expert perhaps a doctor or financial adviser only to learn later that your own thoughts and doubts were correct And what about the stories we've all heard over the years about sick patients whether infected with Ebola or COVID 19 who were sent home or allowed to travel because busy staff people were following a protocol to the letter rather than using common sense Why and how do these kinds of things happen As Harvard lecturer and global trend watcher Vikram Mansharamani shows in this eye opening and perspective shifting book our complex data flooded world has made us ever more reliant on experts protocols and technology Too often we've stopped thinking for ourselves With stark and compelling examples drawn from business sports and everyday life Mansharamani illustrates how in a very real sense we have outsourced our thinking to a troubling degree relinquishing our autonomy Of course experts protocols and computer based systems are essential to helping us make informed decisions What we need is a new approach for integrating these information sources more effectively harnessing the value they provide without undermining our ability to think for ourselves The author provides principles and techniques for doing just that empowering readers with a more critical and nuanced approach to making decisions Think for Yourself is an indispensable guide for those looking to restore self reliant thinking in a data driven and technology dependent yet overwhelmingly uncertain world
