### *The End of Cheap Labour?* Florian Butollo, 2014-11-06

Can China s economy overcome its excessive dependence on exports The Chinese government and international observers argue that this is needed if growth is to be sustained in the future But substantial growth of domestic consumption can only be achieved if China also steps beyond its reliance on cheap migrant labour Florian Butollo approaches this issue by means of a thorough empirical investigation of

the recent transformation of industries in the Pearl River Delta China's largest industrial hub He uncovers that industrial upgrading rarely supports improvements in the basic employment pattern in enterprises in the garment and LED lighting industry This failure of social upgrading threatens to undermine the project of a rebalancing of the Chinese economy The book shows that the implementation of collective labour rights remains an important precondition for the future of the Chinese growth model

**Judgment on the Front Line** Chris DeRose, Noel M. Tichy, 2012-10-11 Front line employees who deal directly with customers are the face of any organization Not only do they have the most impact on how a brand is perceived but they are also the most valuable source of insight into what customers want and how to give it to them Unfortunately as management experts Chris DeRose and Noel M Tichy explain most organizations don't know how to evaluate the risk of giving employees more autonomy Many of those who are willing to try haven't even invested resources in ensuring that once the shackles are off front line employees make good judgments Tichy and DeRose offer powerful examples of front line leadership such as How Zappos trusts its people to do anything in service of a customer including providing free product or reimbursing for mistakes How Mayo Clinic of Arizona enabled its nurses to challenge the hierarchy in order to improve patient care

**Global Sourcing** Nebahat Tokatli, 2010 Until recently Zara a major international clothing retailer and pioneer of fast fashion principles kept almost half of its production in Spain and Portugal earning the reputation of being one of the exceptions to globalization Since the 1980s the existence of such exceptions has been fueling an expectation that the production of high quality fashion garments and tailored suits would remain in the industrialized core Here I revisit this expectation in the light of the current seminal change in the culture of fashion from ready to wear to fast fashion and report that the increased variety and fashionability associated with fast fashion represented by Zara have tilted the balance of competitive advantage towards rather than away from firms in partially industrialized countries As a number of supplier firms in countries such as Morocco India and Turkey have gained the competence to manufacture intricately worked high quality garments with the required flexibility and speed Zara has turned to sourcing from these countries It appears that instead of Zara changing the
