The Comprehensive Guide to Interdisciplinary Veterinary Social Work Sana Loue, Pamela Linden, 2022-09-27 This book responds to the needs that arise at the intersection of people and animals focusing on human-animal interaction, human-animal studies, the emotional work of caring for animals, and animal-assisted interventions and therapies. Unlike many works that focus primarily on issues at the micro level such as animal-assisted interventions, this volume is unique in its focus on issues arising at the micro, macro, and mezzo levels encompassing human-animal issues and interactions at the level of individuals and family groups, institutions, and communities. Accordingly, this comprehensive guide addresses the need to better prepare practitioners to work in interdisciplinary environments, whether in the context of theory, research, practice, or advocacy. The authorship of the volume reflects the interdisciplinary foundations of veterinary social work, with contributions from social workers, psychologists, veterinarians, physicians, anthropologists, and bioethicists. The volume is divided into five parts that examine, respectively, the foundations, history, and scope of veterinary social work; Part I, the practice of veterinary social work with individuals in the context of community programs and in social work practice; Part II, veterinary social work and the veterinary setting, including veterinary well-being and conflict management; Part III, veterinary social work education; Part IV, and the future of veterinary social work; Part V. Importantly, the volume addresses not only practice issues in the veterinary clinical and community settings but also examines ethical concerns in the clinical and research contexts and the implications of cultural and societal variations on the practice of veterinary social work. *The Comprehensive Guide to Interdisciplinary Veterinary Social Work* is the definitive resource for social workers and psychologists new to practice issues relating to animals, social work and psychology students at the graduate and undergraduate levels, veterinarians and veterinary students, hospital administrators, human hospitals, and veterinary hospital managers.

Zoo Veterinarians Irus Braverman, 2020-10-20 Despite their centrality to the operation of contemporary accredited zoo and aquarium institutions, the work of zoo veterinarians has rarely been the focus of a critical analysis in the social science and humanities. Drawing on in-depth interviews and observations of zoo and aquarium veterinarians, mainly in Europe and North America, this book highlights the recent transformation that has occurred in the zoo veterinarian profession during a time of ecological crisis and what these changes can teach us about our rapidly changing planet. Zoo vets, Braverman instructs us with a wink, have gone wild. Originally an individual welfare-centered profession, these experts are increasingly concerned with the sustainability of wild animal populations and with ecological health. The story of zoo vets going wild in their subjects of care, their motivations, and their ethical standards, as well as in their professional practices and scientific techniques, is also a story about zoo animals going wild, wild animals encroaching the zoo, and more generally, a wild world that is becoming zooified. Such transformations have challenged existing veterinary

standards and practices Exploring the regulatory landscape that governs the work of zoo and aquarium veterinarians Braverman traverses the gap between the hard and soft sciences and between humans and nonhumans At the intersection of animal studies socio legal studies and science and technology studies this book will appeal not only to those interested in zoos and in animal welfare but also to scholars in the posthumanities **Anesthesia and Analgesia in Laboratory**

Animals Melissa Dyson,Paulin Jirkof,Jennie Lofgren,Elizabeth Nunamaker,Daniel Pang,2023-05-17 Anesthesia and Analgesia in Laboratory Animals focuses on the special anesthetic analgesic and postoperative care requirements associated with experimental interventions Fully revised and updated this new edition provides the reader with agents methods and techniques for anesthesia and analgesia that ensure humane reproducible and successful procedural outcomes Sections cover ethical regulatory and scientific considerations principles of anesthesia and analgesia anesthetic equipment and monitoring periprocedural care including dedicated chapters to the assessment and management of pain in laboratory species and practical considerations by species including relevant anatomy physiology and behavior of a broad range of lab animal species This will be a complete reference for veterinarians involved in lab animal research as well as senior graduate graduate students post docs and researchers who utilize animals in biomedical research Provides researchers with the most comprehensive and up to date review of the use of anesthesia and analgesia in laboratory animals Includes complete coverage of agents impact in research outcomes Thoroughly updated with new material on ferrets birds reptiles amphibians fish and cephalopods Covers hot topic areas such as pain research ethical issues legal issues and imaging studies
