EASYUNI Ultimate University Guide 2014 EasyUni Sdn Bhd,2014-07-02 Hi there It s nice to present you once again with another hot issue of easyuni On 11 June this year we launched the unifrens social platform an extension to easyuni s existing vision of providing comprehensive and accurate information to students about colleges and universities This is another milestone in the history of easyuni as one of Asia s most popular education portals committed to helping students with their higher education plans unifrens is a social platform which allows students searching for universities and colleges with similar interests to connect with each other to help them make unbiased and community driven decisions about their higher education It also allows them to connect with students who are currently enrolled at universities who can tell them about their experiences about a particular city country university or a course unifrens is something we had been planning for a while to complement our current family of tools for students We always knew that our users would love it as they want more community driven information instead of promotional content from universities and study abroad consultants I believe this feature will democratise the way information about speci c courses countries or institutions is presented and this can only mean good news for students and their parents visitors as it helps them make more informed decisions about which course institution or country to pick Students can also pose questions to their groups which will be answered by experts and the community The feature is still in its beta stage but has gained massive traction with over 100 000 users already registered and assigned to groups Exciting isn t it The issue you re holding now has so much to offer as well So read every page and ll yourself with all the knowledge needed to make informed decisions about your higher education **LIFE**

Perhaps one of the most surprising if not actually unsettling things about the Internet and the Web is that there is always something new on the horizon and that it is very difficult to see where this new technology will take us When ICT was just about big computers and organisational systems it was pretty obvious where the technology was moving us We all knew about Moore s Law and that we were going to have greater capacity smaller and faster devices every year And during the 1990s and the first decade of the third millennium we all became used to what the Internet and the Web had to offer But Social Software in the form of Web 2 0 is different It has put technology in the hands of people who we would never have given it a second thought a few years ago Leading Issues in Social Knowledge Management contains leading edge research which addresses some of the main issues for those of us who want to use Social Software in a Knowledge Management context or who want to study it or research it There are 10 research papers as well as an introduction from David Gurteen
