Managing Information Technology Francisco Castillo, Korina Monoso, 2024-03-28

There are two different interdependent components of IT that are important to a CIO strategy which is long term and tactical and operational concerns which are short term Based on this distinction and its repercussions this book clearly separates strategy from day to day operations and projects from operations the two most important functions of a CIO It starts by discussing the ideal organization of an IT department and the rationale behind it and then goes on to debate the most pressing need managing operations It also explains some best industry standards and their practical implementation and discusses project management again highlighting the differences between the methodologies used in projects and those used in operations A special chapter is devoted to the cutover of projects into operations a critical aspect seldom discussed in detail Other chapters touch on the management of IT portfolios project governance as well as agile project methodology how it differs from the waterfall methodology and when it is convenient to apply each In this second edition besides a number of corrections and updates throughout the text chapter 8 on Agile Project Management replaces the former chapter 8 completely and chapter 10 on IT Security has been newly introduced as this topic has become more and more important for both management and operations during the last six years Taking the fundamental principles of IT service management and best practices in project management the book offers a single seamless reference for IT managers and professionals It is highly practical explaining how to apply these principles based on the author's extensive experience in industry ISA 95 Implementation Experiences WBF., 2011 The ISA International Society of Automation standards 88 and 95 are manufacturing standards established in the late 1990s and periodically updated by the governing bodies responsible for them the Instrumentation Society of America and the American National Standards Institute The two standards set up protocols and

uniform specifications for batch control systems including types of control equipment design of control systems and interpretation of batch control data The reader will find examples and case studies of how the ISA 95 standard is used to integrate manufacturing operations with the rest of the business enterprise from inventory to accounting to customer relations It features Explanation of ISA 95 and ERP MES integration How to map SAP PP PI ISAN 94 Production Schedule and ISA 95 Production Performance How to Use ISA 95 as a manufacturing enterprise Analytic tool **Instrumentation**

Applied Information Science, Engineering and Technology Gabriella Bognár, Tibor Tóth, 2013-09-30. The objective of the book is to give a selection from the papers which summarize several important results obtained within the framework of the József Hatvany Doctoral School operating at the University of Miskolc, Hungary. In accordance with the three main research areas of the Doctoral School established for Information Science, Engineering and Technology, the papers can be classified into three groups. They are as follows: 1. Applied Computational Science, 2. Production Information Engineering, IT for Manufacturing, 3. Material Stream Systems and IT for Logistics. As regards the first area, some papers deal with special issues of algorithms, theory and its applications with computing algorithms for engineering tasks as well as certain issues of database systems and knowledge intensive systems. Related to the second research area, the focus is on Production Information Engineering with special regard to discrete production processes. In the second research area, the papers show some new integrated systems suitable for optimizing discrete production processes in a top-down way. The papers connecting with the third research field deal with different issues of materials stream systems and logistics taking into consideration of applied mathematical models and IT tools. The book makes an effort to ensure certain equilibrium between theory and practice and to show some new approach both from theoretical modelling aspect as well as experimental and practical point of view.
