Optimal Positive Thinking Secrets Raymond Wayne, 2019-09-25 Discover How Optimal Positive Thinking Secrets Will Lead to Success When you hear the idea that a positive mindset always leads to success it is very close to the truth but not 100% There are a few exceptions to that rule One such exception is the person who has a very positive mindset towards their business goals only They will achieve some success but not as much as the well rounded person who understands that a positive mindset is a multi faceted concept The higher number of success stories actually belongs to the people who are thinking positively about all the areas of their lives Those people tend to reach all the goals they set out whereas the single minded person who is bent only on the business will have greater difficulty reaching the goals they have laid out for themselves Build up your self esteem the ability to be optimistic and have gratitude for everything in your daily life As you do this your personal goals will become beacons of positivity Those who focus on business goals only tend to be negative thinkers in many areas Their self esteem is not where it should be As a result they frame their questions about themselves in a negative light and try to survive business and personal situations They ask themselves questions such as how can I survive this or what short cut can I use and I don't care if I step on others' toes Powerful positive minded people do not think in
