**Wheat and Rice in Disease Prevention and Health** Ronald Ross Watson, Victor R Preedy, Sherma Zibadi, 2014-01-22  
Wheat and Rice in Disease Prevention and Health reviews the wide range of studies focusing on the health benefits and disease prevention associated with the consumption of wheat and rice the two most widely consumed whole grains This book provides researchers clinicians and students with a comprehensive definitive and up to date compendium on the diverse basic and translational aspects of whole grain consumption and its protective effects across human health and disease It serves as both a resource for current researchers as well as a guide to assist those in related disciplines to enter the realm of whole grain and nutrition research Overall studies have shown that a decrease in the amount of whole grains in the modern diet is related to a corresponding increase in health problems that are attributed to this all too common dietary imbalance The resulting health issues associated with an over processed diet which provides inadequate levels of nutrients from whole grains may include obesity diabetes high blood lipids chronic inflammatory states and an excess of oxidative stress Strength and endurance may also suffer as a result of these nutrient deficiencies followed by declines in energy and immunity Saves researchers and clinicians time in quickly accessing the latest details on a broad range of nutritional and epidemiological issues Provides a common language for nutritionists nutrition researchers epidemiologists and dietitians to discuss how the action of wheat and rice protect against disease and modify human health Preclinical clinical and population studies help nutritionists dieticians and clinicians map out key areas for research and further clinical recommendations **Herbal Nutraceuticals** Santosh Kumar Upadhyay, Sudhir Pratap Singh, 2024-10-07 Holistic approach to the herbal aspects of nutraceuticals and their implementation in the health and agriculture sectors Herbal Nutraceuticals Products and Processes delivers comprehensive coverage of the herbal aspects of nutraceuticals along with their many applications in the health and agriculture sectors The book begins with an overview of plant based nutraceuticals and the role of plant biotechnology in nutraceutical production Each chapter covers a unique topic related to nutraceuticals and the positive and negative implications associated with each substance discussed The text concludes by addressing safety concerns associated with microalgal nutraceuticals and discussing toxicity evaluation of nutraceuticals overall Written by two academics with significant experience in the field Herbal Nutraceuticals Products and Processes includes information on Significance of nutraceuticals in modern health maintenance and disease prevention and applications of spices in nutraceuticals Antioxidant properties and anti ageing potential of food plants beverages such as herbal wine and nutraceuticals Nutraceuticals with anti diabetic anti inflammatory and anti carcinogenic potentials and sources medicinal properties and applications of carotenoids in food and the nutraceutical industry Nutraceuticals in legumes herbal beverages edible oils conventional and nonconventional fruits staple food crops and pseudocereals Herbal Nutraceuticals Products and Processes is an essential up

to date reference on the subject for academics and researchers as well as professionals and research institutions involved in agri biotech product development      *Rice Bran and Rice Bran Oil* Ling-Zhi Cheong,Xuebing Xu,2019-01-14 Rice Bran and Rice Bran Oil RBO provides much needed best practices on the science and technology of RBO including the chemistry detection methods nutrition including the effect of processing technologies on micronutrients and applications RBO contains many nutritional components including up to 2% oryzanol tocotrienol and phytosterols In addition the fatty acid composition is well balanced with mainly oleic acid and very little linolenic acid which allows for versatile uses in frying cooking and in formulating oil blends for food uses especially as a trans free alternative Many food industrial sectors are seeking possibilities to use RBO in their products from not only Asia and South America but also Europe and North America However there are many processing analytical and nutritional considerations that must be documented in one resource This volume is perfect for those interested in understanding the many emerging potential uses for this alternative oil Written by a team of experts from academia and industry this book is the first of its kind In addition it provides an overview of related rice bran products and their development including Rice bran protein Rice dietary fiber Dietary rice bran meal Rice husk ash applications Paddy straw applications Valued added products including rice bran wax Delivers practical application guidance in the selection and storage of raw materials ensuring processing conditions address stability concerns during production Presents simple and reliable detection methods as well as the international and national rice bran oil standards Provides core scientific insights into this trans free oil option      *Gnotobiotics* Trenton R Schoeb,Kathryn A Eaton,2017-08-11 Gnotobiotics summarizes and analyzes the research conducted on the use of gnotobiotics providing detailed information regarding actual facility operation and derivation of gnotobiotic animals In response to the development of new tools for microbiota and microbiome analysis the increasing recognition of the various roles of microbiota in health and disease and the consequent expanding demand for gnotobiotic animals for microbiota microbiome related research this volume collates the research of this expanding field into one definitive resource Reviews and defines gnotobiotic animal species Analyzes microbiota in numerous contexts Presents detailed coverage of the protocols and operation of a gnotobiotic facility

**Ethnopharmacological Properties, Biological Activity and Phytochemical Attributes of Medicinal Plants, Volume 1** Bharat Singh,2023-10-24 This book covers the morphological characteristics ethnopharmacological properties isolated and identified structurally diverse secondary metabolites biological and pharmacological activities of medicinal plants Ethnopharmacology is the systematic study of folklore traditional medicines which continue to provide innovative drugs and lead molecules for the pharmaceutical industry In fact plant secondary metabolites used as a single molecule or as a mixture are medicines that can be effective and safe even when synthetic drugs fail Therefore the description of these secondary metabolites as well as methods for the targeted expression and or purification is of high interest In addition to surveying the morphological features ethnopharmacological properties biological and pharmacological activities and studies

of clinical trials this book offers a comprehensive treatment of 56 plant species It also presents the cell culture conditions and various methods used for increasing the production of medicinally important secondary metabolites in plant cell cultures This volume Provides the morphological features habitat and distribution of each species of 56 genera selected from the different regions of the world Presents ethnopharmacological applications of various species of the 56 genera included in this book Different species of 56 genera are used for ethnomedicinal uses by the people of various countries of the world Describes structures of various secondary metabolites identified in 56 plant species together with their biological and pharmacological activities Discusses strategies of secondary metabolites production such as organ culture pH elicitation hairy root cultures light and mutagenesis Provides a complete overview of each species of 56 genera and complete information up to 2022 Ethnopharmacological Properties Biological Activity and Phytochemical Attributes of Medicinal Plants is an important book for undergraduate and postgraduate students pharmacologists phytochemists Ayurvedic practitioners medical doctors and biotechnologists interested in the ethnopharmacological properties phytochemistry and biological and pharmacological activities of plants

**Biotechnological Production of Natural Ingredients for Food Industry** Juliano Lemos Bicas,Mário Roberto Maróstica Jr,Glaucia Maria Pastore,2016-06-27 Increasing public health concern about healthy lifestyles has sparked a greater demand among consumers for healthy foods Natural ingredients and environmental friendly food production and processing chains are more aligned to meeting the demand for healthy food There is a wide array of food additives and chemicals that have nutritional value The biotechnological food production processes therefore vary for different types of food chemicals and ingredients accordingly Biotechnological Production of Natural Ingredients for Food Industry explains the main aspects of the production of food ingredients from biotechnological sources The book features 12 chapters which cover the processes for producing and adding a broad variety of food additives and natural products such as sweeteners amino acids nucleotides organic acids vitamins nutraceuticals aromatic pleasant smelling compounds colorants edible oils hydrocolloids antimicrobial compounds biosurfactants and food enzymes Biotechnological Production of Natural Ingredients for Food Industry is a definitive reference for students scientists researchers and professionals seeking to understand the biotechnology of food additives and functional food products particularly those involved in courses or activities in the fields of food science and technology food chemistry food biotechnology food engineering bioprocess engineering biotechnology applied microbiology and nutrition

**Lignocellulosic Biorefining Technologies** Avinash P. Ingle,Anuj Kumar Chandel,Silvio Silverio da Silva,2020-04-13 A text to the advances and development of novel technologies in the production of high value products from economically viable raw materials Lignocellulosic Biorefining Technologies is an essential guide to the most recent advances and developments of novel technologies in the production of various high value products from economically viable raw materials Written by a team of experts on the topic the book covers important topics specifically on production of economical and sustainable products such as various biofuels organic acids enzymes

biopigments biosurfactants etc The book highlights the important aspects of lignocellulosic biorefining including structure function and chemical composition of the plant cell wall and reviews the details about the various components present in the lignocellulosic biomass and their characterizations The authors explore the various approaches available for processing lignocellulosic biomass into second generation sugars and focus on the possibilities of utilization of lignocellulosic feedstocks for the production of biofuels and biochemicals Each chapter includes a range of clear informative tables and figures and contains relevant references of published articles This important text Provides cutting edge information on the recent developments in lignocellulose biorefinery Reviews production of various economically important and sustainable products such as biofuels organic acids biopigments and biosurfactants Highlights several broad ranging areas of recent advances in the utilization of a variety of lignocellulosic feedstocks Provides a valuable authoritative reference for anyone interested in the topic Written for post graduate students and researchers in disciplines such as biotechnology bioengineering forestry agriculture and chemical industry Lignocellulosic Biorefining Technologies is an authoritative and updated guide to the knowledge about various biorefining technologies

**Green Extraction and Valorization of By-Products from Food Processing** Francisco J. Barba, Elena Rosello Soto, Mladen Brncic, Jose Manuel Lorenzo Rodriguez, 2019-09-09 Generating of agricultural wastes and by products during the production processing and consumption of agricultural commodities is unavoidable and over the last decades an increased public interest has been shown in the challenge of food wastage Apart from its significant quantities the physicochemical characteristics of the various agricultural waste and by products denote that there is immense potential for their reuse recycle and valorisation through various different processes Green Extraction and Valorization of By Products from Food Processing provides an overview about the valorization or reuse of agricultural wastes and by products during the production processing and consumption of agricultural commodities Waste disposal and by product management in food processing industry pose problems in the areas of environmental protection and sustainability However they could be a great source of valuable nutraceuticals which can be used to deal with the prospects of feeding fast growing population in 21st century Features Gives detailed guidance and presents case studies about valorization of food wastes and by products Shows the main conventional and innovative extraction techniques for food waste and by products valorization Provides an estimated idea regarding the recovery of high added value compounds Discusses the recovery of high added value compounds Perspectives originated from the enormous amounts of food related materials that are discharged worldwide and the existing technologies which promise the recovery recycling and sustainability of high added value ingredients inside food chain will be discussed in this book This book is of value to academics research institutes and food industry engineers particularly the research and development professionals who are looking for effective management and utilization of food processing wastes and byproducts In addition it is suitable for undergraduate post graduate students research scholars postdoctoral fellows and faculty members from universities and colleges who pursue
