Duvall, 2006 Don DeLillo's satiric novel *White Noise* prophetic in 1985 about American society's rampant consumerism information overload overreliance on the media and environmental problems may seem to today's students simply a description of their lived reality The challenge for teachers then is to help them appreciate both the postmodern qualities of the novel and its

social critique This volume like others in the MLA's Approaches to Teaching World Literature series is divided into two parts. The first part, Materials, suggests readings and resources for both instructor and students of *White Noise*. The second part, Approaches, contains eighteen essays that establish cultural, technological, and theoretical contexts, e.g., whiteness studies, place the novel in different survey courses, e.g., one that explores the theme of American materialism, compare it with other novels by DeLillo, e.g., *Mao II*, and give examples of classroom techniques and strategies in teaching it, e.g., the use of disaster films.

Death in Don DeLillo's 'White Noise' Jan Riepe, 2005-05-06 Seminar paper from the year 2002 in the subject American Studies Literature grade 1-5 University of Freiburg Englisches Seminar course Proseminar Postmodern American Fiction after 1975 language English abstract In the following pages I will discuss the role of Death in Don DeLillo's *White Noise* and I will show that the protagonist Jack Gladney is not only obsessed with death but that fear and obsession are the main driving forces in his life. Further, it is the aim of this paper to show that Jack Gladney goes through a change which results in him being able to cope with his fear and that DeLillo holds technology responsible for Jack's obsessive fear. In order to support the thesis of this paper, I will analyze the role that death plays in Jack's life in regard to his family, his job, consumption, and technology. To support the thesis of Jack going through a change, I will discuss Jack's relationship to death before and after the exposure to the chemical spillage and most important, before and after Jack's being nearer to death when attempting to kill Willie Mink. Concluding, I will look at the novel's link between death and technology. Jack Gladney lives with his wife Babette and their children from previous marriages in a house at the end of a quiet street in the quiet town of Blacksmith. He is head of the department of Hitler Studies at the College on the Hill. Jack has specialized on Hitler and built a whole department around this single figure of history. In academic circles, he is widely known as the leading expert on Hitler, and his articles are printed in the appropriate journals. But Jack neither reads nor speaks the German language, a fact he desperately tries to keep a secret. He hides behind his dark glasses and academic robe.

Site Reading David J. Alworth, 2018-11-20 Site Reading offers a new method of literary and cultural interpretation and a new theory of narrative setting by examining five sites: supermarkets, dumps, roads, ruins, and asylums that have been crucial to American literature and visual art since the mid-twentieth century. Against the traditional understanding of setting as a static background for narrative action and character development, David Alworth argues that sites figure in novels as social agents. Engaging a wide range of social and cultural theorists, especially Bruno Latour and Erving Goffman, Site Reading examines how the literary figuration of real material environments reorients our sense of social relations. To read the sites of fiction, Alworth demonstrates, is to reveal literature as a profound sociological resource, one that simultaneously models and theorizes collective life. Each chapter identifies a particular site as a point of contact for writers and artists: the supermarket for Don DeLillo and Andy Warhol; the dump for William Burroughs and Mierle Laderman Ukeles; the road for Jack Kerouac, Joan Didion, and John Chamberlain; the ruin for Thomas Pynchon and Robert Smithson; and the

asylum for Ralph Ellison Gordon Parks and Jeff Wall and shows how this site mediates complex interactions among humans and nonhumans The result is an interdisciplinary study of American culture that brings together literature visual art and social theory to develop a new sociology of literature that emphasizes the sociology in literature

Simulacrum America Elisabeth Kraus,Carolin Auer,2000 A collection of articles that analyses the role of the media in America from a deconstructionist viewpoint This collection of original essays is a response to the paradigm shift that has taken place in cultural studies in the wake of postmodernism and poststructuralism Such concepts as truth or reality have been increasingly called into question since the realization that our experience of the real is always mediated through an empire of signs as Roland Barthes put it After a predominantly optimistic evaluation of the effects of the media in the 1960s by Marshall McLuhan Hans Magnus Enzensberger and others a growing awareness of the total manipulation of society by mass media imagery has emerged The very concept of representation has become problematic witness the influential essay The Precession of Simulacra by the French sociologist Jean Baudrillard in which he defines simulation as the generation by models of a real without origin or reality a hyperreal the current boom in realityTV comes to mind In the seventeen years since the publication of Baudrillard s Simulacra and Simulation ever more sophisticated technologies based on the computer as the simulacrum machine par excellence have offered us powerful new means of manipulating data and consequently means of manipulating editing and inventing reality The aim of this study is to unmask false representations showing history personal and cultural identity especially gender and racial identities the simulacrum of speed and American reality itself to be constructs

Democracy's Literature

Patrick J. Deneen, Joseph Romance, 2005-07-28

American literature is profoundly almost inescapably political. America's most thoughtful authors long ago realized that it was through the novel, the novella, and the story that philosophic education of America's citizens would best be undertaken. In this fascinating new anthology of original essays, ten leading scholars explore the ways in which American civic education has been informally advanced through literature. Delving into the works of authors ranging from Mark Twain to William Faulkner to Octavia Butler, these essays reflect on the close relationship between democracy and literature. They convey an understanding that the greatest American literary works are also works of profound philosophical insight. Through careful analysis, *Democracy's Literature* illustrates that democracy and literature are natural partners forging a relationship that America's greatest authors have long realized in their subtle efforts to craft a democratic public philosophy.
