World Civilizations 4th Edition:

The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all The Epic of Latin America, Fourth Edition John A. World History and the Eonic Effect John C. Landon, 2010-04-27 At a time when theories of evolution are undergoing renewed controversy the study of the Eonic Effect can break the deadlock by looking at world history in the light of evolution The assumption that evolution occurs at random is the crux of the dispute and one confused with issues of religion and secularism We can detect a non random pattern in the record of civilization itself to see evolution in action on a stupendous scale We live in the first generations with enough data to detect this phenomenon In the confusion of evolutionary theories the unexpected discovery of deep level structure can allow us to deconstruct flat history and assess claims of directionality in evolution In the process the theory of natural selection applied to human evolution is seen to fail a photo finish test The book provides a new model for the study of the overlap of history and evolution and a critique of current views of the descent of man

The Human Record: To 1700 Alfred J. Andrea, James H. Overfield, 2001 Unlike some other world history texts that center on the West *The Human Record* provides balanced coverage of the global past The book features both written and artifactual sources that are placed in their full historical contexts through introductory essays footnotes and focus questions The text sheds light on the experiences of women and non elite groups while maintaining overall balance and a focus on the major patterns of global historical developments through the ages

An Environmental History of the World J. Donald Hughes, 2002-09-26 *An Environmental History of the World* is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history

The Myth

of the Free Market Mark Anthony Martinez, 2009 Explains how the 2008 financial meltdown came about and how to revitalize global and domestic economies Shows how capitalist economies developed and why the state matters in their functioning Free market purists claim that the state is an inefficient institution that does little for society beyond providing stability and protection The activities related to distributing resources and economic growth they say are better left to the invisible hand of the marketplace These notions now seem tragically misguided in the wake of the 2008 market collapse and bailout Mark Martinez describes how the flawed myth of the invisible hand distorted our understanding of how modern capitalist markets developed and actually work Martinez draws from history to illustrate that political processes and the state are not only instrumental in making capitalist markets work but that there would be no capitalist markets or wealth creation without state intervention He brings his story up to the present day to show how the seeds of an unprecedented government intervention in the financial markets were sown in past actions The Myth of the Free Market is a fascinating and accessible introduction to comparative economic systems as well as an incisive refutation of the standard mantras of neoclassical free market economic theory

Connectivity and Global Studies Jan Nederveen Pieterse, 2021-02-19 This textbook provides readers with evocative and analytical accounts of social processes that are linked to globalization and connectivity which includes a wide range of multi centred connections in history DNA analysis technology art populism and political economy Rather than globalization Nederveen Pieterse focuses on connectivity His approach to globalization differs from both structuralist accounts of the world system and the institutionally centred focus of much work in international studies This synthesis will provide a new resource to reconstruct theoretical approaches to globalization and global studies Fluently written clearly organized and with an interdisciplinary approach the book will be accessible to upper division undergraduates and graduates in social sciences including students and researchers from the fields of sociology politics political economy development studies and international relations

Re-imagining International Relations Barry Buzan, Amitav Acharya, 2021-12-09 Buzan and Acharya challenge the discipline of International Relations to reimagine itself in the light of the thinking about and practice of international relations and world order from premodern India China and the Islamic world This prequel to their 2019 book The Making of Global International Relations takes the story back from the two century tale of modern IR to reveal the deep global history of the discipline It shows the multiple origins and meanings of many concepts thought of as only modern and Western It opens pathways for the rest of the world into this most Eurocentric of disciplines encouraging them to bring their own histories concepts and theories with them The authors have written this book with the hope of inspiring others to extend these pathways by bringing in a wider array of cultures and exploring how they thought about and acted in worlds composed of multiple independent collective actors

Early Civilizations of the Old World Charles Keith Maisels, 2003-12-16 In this new paperback edition of Early Civilizations of the Old World Charles Keith Maisels traces the development of some of the earliest and key civilizations in history In each case the ecological and economic background to

growth geographical factors cross cultural intersection and the rise of urbanism are examined explaining how particular forms of social structure and cultural interaction developed from before the Neolithic period to the time of the first civilizations in each area This volume challenges the traditional assumption of a band tribe chiefdom state sequence and instead demonstrates that large complex societies can flourish without social classes and the state as dramatically shown by the Indus civilization Such features as the use of Childe s urban revolution theory as a means of comparison for each emerging civilization and the discussion of the emergence of archaeology as a scientific discipline make Early Civilizations of the Old World a valuable innovative and stimulating work
